ADDITIONS

Chapter 18. Customs statistics

With the publication of the January data of the Unit Value Indices for imports and exports in tables 18.6 and 18.7, the series are updated changing the base year from 2005 to 2022.

Chapters 23 and 24. General economic statistics

Pursuant to Commission Implementing Regulation (EU) 2020/1197, laying down technical specifications for European business statistics, it has been determined that 2021 will be the new base year, with the change taking effect this year, in 2024. The previous base year was 2015.

This change affects the main activity and price indicators prepared by the INE and other authorities such as Eurostat. In consequence, it also affects some of the short-term business statistics published by the Banco de España. As a result, some of the tables in Chapters 23 and 24 of the Statistical Bulletin, and in the Summary Indicators, will be restructured.

In addition, there may be methodological changes in how the INE's statistics are prepared. For more information, see the INE website.

These changes will be introduced gradually over the course of 2024.

(a) The significant rebalancing of the excess liquidity positions of credit institutions observed in September 2022, with reserve accounts decreasing in favour of deposit facility balances, is linked to the decision of the Governing Council of the ECB to increase the remuneration of the deposit facility to 0.75%, with effect from September 14, 2022.

Sources: ECB and in-house calculations.

- Also includes the counterpart of Central Government monetary transactions.

Table 1.9. Euro area monetary aggregates and counterparts of M3. Summary

Sources: ECB and in-house calculations.

Table 1.10. Euro area monetary aggregates and counterparts of M3. Consolidated balances. Original series

Source: ECB.

- Data refer to the changing composition of the euro area.
- Incorporates the adjustments made to certain instruments (shares in money market funds, money market instruments and securities other than shares issued with a maturity of up to two years), issued by MFIs resident in the euro area, in order to deduct that part of such issues which should not be included in M3 as it is held by non-residents. These adjustments, which it was not possible to make until 2001 owing to the limitations of the statistical sources, have been introduced in two stages and have entailed modification of the time series from January 1999, inclusive, onwards. In the first stage (May 2001), that part of the series corresponding to shares in money market funds was revised and in the second stage (October 2001), the part corresponding to all other instruments. For further details see Box 1 in the November 2001 issue of the ECB Monthly Bulletin. For data as from the reference period June 2010, and henceforth, repo operations conducted through central counterparties (CCPs) are excluded from the M3 component "repurchase agreements", and reverse repo operations conducted through CCPs are excluded from the M3 counterpart position "loans to other euro area residents". These items are instead now included in the residual category "Net remaining".
- Includes loans and securities.

Table 1.12. Euro area monetary aggregates and counterparts of M3. Consolidated balance-sheet and transactions (adjusted flows). Seasonally adjusted series

Source: ECB.

- Data refer to the changing composition of the euro area.
- For the details of the method used to calculate the seasonally adjusted series, see the ECB publication "Seasonal adjustment of monetary aggregates and HICP for the euro area", August 2000.
- See note (b) to the table 1.10.

Table 1.13. Contribution of the MFIs resident in Spain to the euro area monetary aggregates and counterparts of M3

Source: ECB.

- Data refer to the changing composition of the euro area.
- This table is a requirement of the IMF in connection with the Special Data Dissemination Standard (SDDS).
- See note (b) to the table 1.10.
- Includes loans and securities.
- These aggregates exclude cash held by the public, which is included under the counterparts. Since January 2002, cash held by the public has been calculated by applying to the euro banknotes in circulation the percentage assigned by the Banco de España in accordance with Eurosystem accounting arrangements (see the footnote to the summary balance sheet at the end of this bulletin), plus coins in euro and banknotes and coins in pesetas not converted into euro, minus MFIs' holdings of cash. Since January 2003, banknotes and coins in pesetas not converted into euro have been excluded.

Table 1.14. Euro area monetary aggregates and the contribution of MFIs resident in Spain to the aggregates

Sources: ECB and BE.

- Data refer to the changing composition of the euro area.
- Rates computed using transactions (adjusted flows).
- The contribution of MFIs resident in Spain refers to the original unadjusted series.

- d. Includes loans and securities.
- e. Rates calculated on the basis of contributions which exclude cash (see note (e) to Table 1.13).

Table 1.15. Interest rates

Source: ECB.

- a. With the exception of the overnight rate to December 1998, monthly and yearly values are period averages.
- b. To December 1998, 3-year euro area yields are end-of-period values and 10-year yields are period averages. Thereafter, all yields are period averages.
- c. Before January 1999 synthetic euro area rates were calculated on the basis of national rates weighted by GDP.
- d. From January 1999, column 5 shows the euro overnight index average (EONIA); other euro area money market rates from January 1999 are euro interbank offered rates (EURIBOR).
- e. The annual percentage rate of charge is the weighted average rate across all maturities and equals the total cost of the loans. These total costs comprise an interest rate component and a component of other charges.
- f. Interest rates on loans up to EUR 1 million.

Table 1.16. Exchange rates

Source: ECB, Economic Bulletin, "Statistics", tables 2.8 and 2.9

- a. To December 1998, rates for the ECU (source BIS); from January 1999, rates for the euro.
- b. The effective exchange rates of the euro are ECB calculated indices based on weighted averages of bilateral euro exchange rates. A positive change denotes an appreciation of the euro. Weights are based on manufactured goods trade with the main trading partners and capture third-market effects. Real rate are calculated using consumer prices (CPI). For more detailed information on the calculation of effective exchange rates, see the section 2.8 general notes in the ECB's Economic Bulletin, which can be downloaded from the ECB's website (www.ecb.europa.eu).

NOTES TO THE TABLES OF CHAPTER 4. CREDIT INSTITUTIONS AND CREDIT FINANCIAL INTERMEDIARIES

General note

Chapter 4 of the *Statistical Bulletin* presents information on credit institutions plus CFIs and deposit-taking institutions (until May 1994). The basic source of this information is the individual confidential returns that credit institutions and CFIs submit to the Banco de España for supervisory purposes in relation to their activity in Spain, in accordance with the criteria and rules laid down in the Accounting Circular CBE 4/2017 and prior provisions.

The information in Chapter 8 (also relates to credit institutions and CFIs). The difference between these two sets of data arises from the fact that they are compiled on the basis of different sources of information. Thus, while the data in this chapter are, as already mentioned, drawn from the financial statements credit institutions and CFIs send to the Banco de España for supervisory purposes, those of Chapter 8 are obtained from the accounting statements used to compile statistics for the euro area and, therefore, incorporate the conceptual framework common to all the countries that make up that area. There are certain differences in sectorisation and instrument valuation (see Table 4 and the notes thereto), but the structure of these two chapters means that they can be used to complement one other. Thus, while there is greater detail in this chapter on credit instruments (commercial, mortgage, etc.), deposits (sight, time, structured, etc.), capital accounts (capital, reserves, provisions, etc.) and other assets and liabilities (accruals, derivatives, etc.), the extra detail in Chapter 8 relates to counterpart sectors and residence, indicating whether the households or NPISHs, non-financial corporations and other financial intermediaries are resident in Spain, in other euro area countries or in the rest of the world (in which case, there is no information on the counterparty). Readers' attention is drawn to these details in order that they may benefit from the complementary information in these chapters.

Table 4.A

- a. From January 2009 to April 2011 there may be small differences between total credit institutions plus CFI and the sum of deposit-taking institutions, SCIs and ICO. This is because in this period electronic money institutions were considered to be credit institutions and CFIs, but upon the entry into force of Directive 2009/110/EC of the European Parliament and of the Council, they ceased to be considered as such. Given the scant quantitative importance of these institutions, it was decided to retain their amount in the credit institution totals but it was not considered necessary to retain the breakdowns. The detail of this column is given in Tables 4.1 and 4.2. As from 2017 (March), the breakdown among Spanish institutions and foreign branches is removed.
- b. See details in Tables 4.51 and 4.52.
- c. See details in Tables 4.81 and 4.82.

Table 4.1

- a. See the breakdown by subsector in Table 8.16. There are some small differences, owing to the fact that the tables use different definitions of credit and have been updated at different times.
- b. See breakdown by instrument in Table 4.3.
- c. See details in Table 4.4.
- d. See details in Table 4.6.
- e. See details in Table 4.99.
- f. Includes non-performing doubtful loans which are those in respect of which some amount of principal, interest or any other contractually agreed expense is more than three months past-due or exceeds 25% of total debt (unless these loans are specifically classified as written-off assets). It corresponds to the amount of column 14, Table 4.99

Table 4.2

- a. See the breakdown by subsector in Table 8.16. There are some small differences, owing to the different definition of deposits and the fact that the tables have been updated at different times.
- b. See breakdown by instrument in Table 4.5.
- c. See details in Table 4.7.
- d. See details in Table 4.8.

Table 4.3

- a. The breakdown by institutional sector can be consulted in Table 8.17. There are some discrepancies between this amount and that in Table 8.26, owing to differences in the institutional scope and in the concept of credit and the fact that the tables have been updated at different times.

From January 1983 to December 1989 there may be small differences between the total and the sum of the parts (trade credit, total other fixed term loans, debts repayable on demand, financial leases and doubtful debtors). This is due to "loans assumed by the State", which has data for the mentioned period, and it is no longer published.

- b. Doubtful loans are loans in relation to which there is reasonable doubt regarding full repayment (of principal and interest) in accordance with the contractual terms. They include non-performing loans, which are those in respect of which some amount of principal, interest or contractually agreed expense is more than three months past-due. See details in Table 4.99. There may be differences between the amounts in these two tables, owing to the fact that they have been updated at different times.

Table 4.4

- a. Short securities positions reflect the amount of the financial liabilities arising from the outright sale of financial assets acquired temporarily or received on loan. However, Table 4.4 shows short positions in the assets (columns 6 and 10) and deducts them from the total figures for "securities other than shares" of residents in Spain and in the rest of the world. Thus, columns 4 and 8 contain net figures and follow the same criterion as the returns the institutions submit for statistical purposes (and, therefore, the same criterion as Chapter 8 of this Bulletin), according to which short securities positions must be deducted from the item "securities other than shares" [see Rule 71. c) iii)].

Table 4.5

- a. The breakdown by institutional sector may be consulted in Table 8.20. There are discrepancies between the amounts of these two Tables, owing to differences in the institutional scope, the fact that the tables have been updated at different times, and differences in the accounting for the acquisition of securities of securitization special purpose entities used to securitize financial assets kept on the institution's balance sheet (see changes introduced in the *Statistical Bulletin* of January 2010).
- b. Overnight deposits. From June 2017 they include saving deposits.
- c. Funds received under financial asset transfers include the funds raised by institutions through financial asset transfer transactions when the transferred financial asset cannot be derecognized as the risk and benefits associated with its ownership have not been substantially transferred.
- d. Hybrid financial liabilities are financial liabilities that include simultaneously a principal contract other than a derivative and a financial derivative known as an "implicit derivative", which is not individually transferable. The flows generated by the hybrid contract normally vary in the same way as those of the derivative considered in isolation. For example, a deposit whose interest rate depends on the changes in the price of a share.
- e. Subordinated deposits include the amount of deposits received which, for the purposes of payment priority, rank behind ordinary debt.
- f. This column includes overnight deposits, savings accounts, deposits with agreed maturity and repurchase agreements. However, mortgage covered bonds with the character of deposits and funds received under financial asset transfers are not included. Mortgage covered bonds are securities whose capital and interest are secured and when they are non-marketable they are included under deposits. Funds received under financial asset transfers are defined in footnote d to Table 4.5. The amount recorded in column 10 of Table 4.5 is broken down by province and region in Tables 4.29 and 4.31.

Table 4.6

- a. See details in Table 4.9.
- b. From January 2018 the rights on assets held under finance lease are included in column 2, furnishings and real estate

Table 4.7

- a. The valuation adjustments to equity include the amounts of the adjustments made to assets and liabilities recorded temporarily in equity, under this heading, until they are extinguished or realized, when they are recorded in the income statement.
- b. Financial assets and liabilities valuation adjustments not include the accrued interest and impairment allowances which are presented under separate headings of the assets and/or liabilities.
- c. Impairment allowances include the amounts set aside to cover impairment losses, in relation to loans and other assets.
- d. Impairment allowances, total loans, include the amounts set aside to cover both specific and general insolvency risk attributable to loans and advances to other debtors.
- e. To December 2013, this column offers information on value adjustments for asset impairment, specifically for loans, i.e. it includes exclusively specific provisions for losses on doubtful loans granted to other resident sectors. Based on the data for 2014, the cumulative amounts of the changes in fair value attributable to changes in credit risk are added to these provisions
- f. The figure of net profit (column 6) (following the same criterion of other tables in Chapter 4) includes the sum of the profit or loss of each deposit-taking institution taken individually. This figure is highly influenced by the segregation process of the savings banks' banking business to newly-created banks. Given that a significant portion of the shares of these new banks are part of the savings banks' investment portfolio, the results recorded by the banks to which the business has been transferred, are transmitted to savings banks' results, amplifying the figure of aggregate net profit (or loss) of the deposit-taking institutions as a whole. In order to facilitate interpretation of the amount of net profit (column 6), this column includes the quantity of said net profit which is due to impairment losses on investments.

Table 4.8

- a. See details in Table 4.9.

Table 4.9

- a. Trading derivatives include the fair value in favor of the institution of derivatives which do not form part of hedge accounting.
- b. Hedging derivatives include the fair value in favor of the institution of derivatives designated as hedging instruments in hedge accounting.
- c. Insurance contracts linked to pensions include the fair value of the insurance policies to cover staff pension commitments that do not meet the requirements established by Rule thirty-five of Banco de España Circular CBE 4/17 for not recording them in the balance sheet.
- d. Tax assets include the amount of all assets of a tax nature such as taxes paid on account, assets arising from unused tax losses or credits for tax deductions.
- e. Trading derivatives include the fair value of the institution's liability in respect of derivatives that do not form part of hedge accounting.
- f. Hedging derivatives include the fair value of the institution's liability in respect of derivatives designated as hedging instruments in hedge accounting.
- g. Tax collection accounts include the amount collected on behalf of general government in respect of taxes, duties, excise and social security contributions until such monies are finally made over to the relevant agency.
- h. Tax liabilities include the amount of all liabilities of a tax nature, primarily the amount payable in respect of the tax on the taxable profit for the period.

Table 4.10

- a. Includes only the amount of the specific allowances for insolvency risk attributable to loans and advances to other resident sectors.
- b. From 2014 no information is available on this breakdown.

Table 4.11

- a. The details of each general government subsector can be found in Table 8.16. There are some small differences owing to the fact that the tables use different definitions of lending and they have been updated at different times. See footnote a to Table 4.A. Since 2022 there are differences between credit institutions plus CFIs data and the sum of deposit taken institutions, Official Credit and CFIs. These discrepancies appear due to the incorporation of the systemic investment firms into the data of the credit institutions, as indicated in the notice: <https://www.bde.es/wbe/en/estadisticas/anuncios/novedad-ec-y-efc-y-ofis-diciembre-2022.html>
- b. The breakdown by province and regional (autonomous) government may be consulted in Tables 4.28 and 4.29.

c. The breakdown of the total by instrument appears in Table 4.3. In addition, the breakdown by institutional sector can be consulted in Table 8.17. The small discrepancies between the amounts of this table and those of Table 8.17 are attributable to differences in institutional scope and in the definition of lending and the fact that the tables have been updated at different times.

- d. See notes to Table 4.1 column 13.

- f. Assets considered as doubtful because they are vis-à-vis countries in a certain risk group.

Table 4.32

a. See breakdown by subsector in Table 8.20. There are discrepancies between the amounts of these two Tables, owing to differences in the institutional scope, the fact that the tables have been updated at different times, and differences in the accounting for the acquisition of securities of securitization special purpose entities used to securitize financial assets kept on the institution's balance sheet (see changes introduced in the *Statistical Bulletin* of January 2010).

Since 2022 there are differences between credit institutions plus CFIs data and the sum of deposit taken institutions, Official Credit and CFIs. These discrepancies appear due to the incorporation of the systemic investment firms into the data of the credit institutions, as indicated in the notice: <https://www.bde.es/wbe/en/estadisticas/anuncios/novedad-ec-y-efc-y-ofis-diciembre-2022.html>

c. See breakdown by instrument in Table 4.5. Also, the amount of this column less MMF deposits at credit institutions and credit financial intermediaries is the same, apart from some small differences owing to the fact that the tables have been updated at different times, as that of column 1 of Table 8.20. The breakdown by institutional sector may be consulted in this latter Table.

c. As from June 2017, a reclassification takes place, and column 10 "Promissory notes and bills" becomes part of column 11.

d. As from June 2017, it comprises the finance cost corresponding to "Promissory notes and bills".

a. It includes credit institutions whose scope of operations is restricted and which, under Royal Decree 692/96 of 26 April 1996, became credit financial intermediaries. The specialized lending institutions in place at the time of this change were: finance companies, mortgage lending companies and financial leasing companies. Money Market Intermediaries disappeared in 1994, becoming broker-dealers or agency brokers, following their regulation under the Spanish Stock Market Act 24/88 of 24 July 1988.

NOTES TO THE TABLES OF CHAPTER 6. MONETARY FINANCIAL INSTITUTIONS

Certain headings of the balance sheets of monetary financial institutions according to the euro area returns, published in Chapters 6 and 8 of the Boletín Estadístico, were changed in December 2014 as a result of the entry into force of new accounting rules. These changes only affect the way in which part of the information is presented; they have no impact on the lending and deposits headings and they entail no change in equity in the institutions balance sheets.

Specifically, the entry into force of Banco de España Circular 5/2014 of 28 November 2014, which amends Circular 4/2004 of 22 December 2004 on credit institutions public and confidential financial reporting rules and formats and incorporates the statistical reporting requirements laid down by the European Central Bank¹, triggers a change in the way in which certain headings of the balance sheets according to the euro area returns are presented. This change means that, with the exception of data on loans and deposits which will continue to be reported at their principal amount, as from the December 2014 data, which are those now published, all the other headings will be reported at their carrying amount, in a further step towards harmonisation with the information reported for supervisory purposes. Accordingly, from December 2014, headings such as "Shares and other equity" on the asset side are reported net of their impairment allowances, and in turn these allowances are no longer carried over to the "Capital and reserves" heading as was the case previously (see Tables 6.2 and 6.3). This change explains the bulk of the variation seen in December 2014 in the size of the total balance sheet and of some of its components, such as "Shares and other equity" or "Capital and reserves".

(a) Total euro banknotes in circulation allocated to the Banco de España in accordance with its share in the capital of the European Central Bank. The difference between this amount and the net amount effectively placed in circulation by the ECB (Column 2) is recorded as an intra-Eurosystem claim/liability relating to banknote issuance (see Table 7.2 and the note to the summary Banco de España s balance sheet at the end of this Bulletin).

(b) This amount may be negative if the Banco de España puts into circulation fewer banknotes than it withdraws, since there are banknotes in circulation which were actually distributed by another Eurosystem central bank. This effect is significant due to, among other things, the high tourist inflow into Spain. Note that this column does not state the euro banknotes actually in circulation in Spain, but rather the banknotes distributed in net terms by the Banco de España.

(c) Banknotes distributed less banknotes withdrawn in each period. Calculated as the difference between column 1 of Table 7.17 (distributed) and column 1 of Table 7.18 (withdrawn).

- d. Including, since January 2002, the percentage of all euro banknotes in circulation allocated to the Banco de España under the accounting system established for the Eurosystem (see note to the summary balance sheet at the end of this bulletin).
- e. From January 2003, only the amount of banknotes allocated by the Eurosystem is included here.
- f. From January 2003, only the amount of euro coins is included here.
- g. Comprising the notes and coins actually put into circulation by the Banco de España (see tables 7.16 to 7.17).

Table 7.8

a. See breakdown in table 7.9.

Table 7.11

a. Until December 1998 repos are included in column 3 as separate data were not available.

Table 7.12

a. The design of this table follows the IMF's Special Data Dissemination Standard (SDDS) and is, thus, an alternative to that of tables 7.1 and 7.2.

Table 7.16

- a. Total euro banknotes in circulation allocated to the Banco de España in accordance with its share in the capital of the European Central Bank. The difference between this amount and the net amount effectively placed in circulation by the ECB (Column 2) is recorded as an intra-Eurosystem claim/liability relating to banknote issuance (see Table 7.2 and the note to the summary Banco de España's balance sheet at the end of this Bulletin).
- b. This amount may be negative if the Banco de España puts into circulation fewer banknotes than it withdraws, since there are banknotes in circulation which were actually distributed by another Eurosystem central bank. This effect is significant due to, among other things, the high tourist inflow into Spain. Note that this column does not state the euro banknotes actually in circulation in Spain, but rather the banknotes distributed in net terms by the Banco de España.
- c. Banknotes distributed less banknotes withdrawn in each period. Calculated as the difference between column 1 of Table 7.17 (distributed) and column 1 of Table 7.18 (withdrawn).

Table 7.19

a. Since January 2003, this total for euro coins, plus the total for banknotes placed in circulation by the Banco de España (table 7.16, column 1) make up the cash placed in circulation by the Banco de España (table 7.2, column 16). Until December 2002, the cash placed in circulation by the Banco de España is made up of the total for euro banknotes, plus the total for euro coins placed in circulation, plus unreturned peseta banknotes and coins (table 7.16, column 16 and table 7.17, column 17).

CHAPTER 8 OTHER MONETARY FINANCIAL INSTITUTIONS

NOTICE RELATED TO THE CHAPTER 8

Changes made to the series from June 2005

This chapter includes credit institutions (along with money market funds), although with an alternative presentation to that of Chapter 4. Its tables are based on Rule seventy-one and Annex VII of CBE 4/4004 (to apply IFRS to credit institutions), approved on 22 December 2004, which refer to the EMU statistical requirements. Although the returns have not been changed significantly, they have been affected by the new accounting rules. Accordingly, although these tables continue to be updated, there have been some changes as a consequence of the entry into force of the new Circular. The most relevant are: a) savings accounts, classified until May 2005 as deposits redeemable at notice up to three months (column 12 of Table 8.44 and columns 6 and 12 of Table 8.9, among others), are now included within overnight deposits (column 9 of Table 8.44 and columns 3 and 9 of Table 8.9, among others). This change is reflected in the tables of the interest rates of these instruments (Tables 9 and 15 of Chapter 19 relating to the interest rates of credit institutions); and b) the return to the balance sheet of some of the securitised assets that had been removed from the balance sheet in application of the rules in force until the approval and entry into force of CBE 4/2004. This change has led to an exceptional increase in the amount of credit (column 6 of Table 8.41 and column 6 of Table 8.2, among others) and in time deposits (column 6 of Table 8.42 and column 6 of Table 8.3, among others).

General note: Many columns are broken down in subsequent tables, as indicated at the foot of each table.

NOTES TO THE TABLES OF CHAPTER 8. OTHER MONETARY FINANCIAL INSTITUTIONS

Certain headings of the balance sheets of monetary financial institutions according to the euro area returns, published in Chapters 6 and 8 of the Statistical Bulletin, were changed in December 2014 as a result of the entry into force of new accounting rules. These changes only affect the way in which part of the information is presented; they have no impact on the lending and deposits headings and they entail no change in equity in the institutions' balance sheets.

Specifically, the entry into force of Banco de España Circular 5/2014 of 28 November 2014, which amends Circular 4/2004 of 22 December 2004 on credit institutions public and confidential financial reporting rules and formats and incorporates the statistical reporting requirements laid down by the European Central Bank¹, triggers a change in the way in which certain headings of the balance sheets according to the euro area returns are presented. This change means that, with the exception of data on loans and deposits which will continue to be reported at their principal amount, as from the December 2014 data, which are those now published, all the other headings will be reported at their carrying amount, in a further step towards harmonisation with the information reported for supervisory purposes. Accordingly, from December 2014, headings such as "Shares and other equity" on the asset side are reported net of their impairment allowances, and in turn these allowances are no longer carried over to the "Capital and reserves" heading as was the case previously (see Tables 8.2 and 8.3). This change explains the bulk of the variation seen in December 2014 in the size of the total balance sheet and of some of its components, such as "Shares and other equity" or "Capital and reserves".

NOTES TO THE TABLES OF CHAPTER 9. APPRAISAL COMPANIES

Overview

These tables, which are only available in the electronic edition of the *Statistical Bulletin*, contain information of the activity and financial statements of appraisal companies. The scope of this information is limited to the data compiled by the Banco de España in accordance with CBE 3/1998 of 27 January 1998 (amended by CBE 2/2009 and CBE 5/2003).

The tables contain information, broken down by appraised assets, on the number of appraisals (Table 9.30), on the amount of appraisals (Table 9.31) and on the appraised usable area of properties (Table 9.32). This information has been used to obtain the series on average value of appraised square metre (Table 9.33), which should not be interpreted as a reference price per unit of area, given the heterogeneity of the appraised properties included in the various aggregates. Nor can it be considered an accurate indicator of price behaviour, since it is not based on a homogeneous sample over time of appraised properties. Tables 9.34 and 9.35 give the number and amount of appraisals by type of customer and purpose of appraisal and Tables 9.36 to 9.41 contain a geographical breakdown. Finally, information is provided on the balance sheets (Table 9.42) and profit and loss accounts of appraisal companies (Table 9.43).

Notes on Tables 9.30 to 9.43

Table 11.2

Note: The quarterly percentages are calculated: 1) When the GDP for the four quarters of the year in question is available, using the GDP for that year; 2) when the GDP for the four quarters of the year in question is not available, using the annual GDP obtained by aggregating the quarterly GDP figures for the last four quarters. See notes to Table 11.1.

Table 11.3

See notes to Table 11.1 and 11.2.

Table 11.4

NOTES TO THE TABLES OF CHAPTER 12. CENTRAL GOVERNMENT AND SOCIAL SECURITY FUNDS

Table 12.1

- a. Liabilities issued by central government and held by other central government units, other accounts payable and adjustments for differences between the market value and the nominal value of the liabilities net incurrence of shares and other equity (PF.5), as well as other adjustments resulting from the reclassification of institutional units and other changes in the information.
- b. The figures for GDP at market prices are calculated using the official series of the Spanish Quarterly National Accounts (CNE) published by the INE, by aggregating the last four quarters as at each reference date.

Table 12.2

Note: The quarterly percentages are calculated: 1) When the GDP for the four quarters of the year in question is available, using the GDP for that year; 2) when the GDP for the four quarters of the year in question is not available, using the annual GDP obtained by aggregating the quarterly GDP figures for the last four quarters.
See notes to Table 12.1.

Table 12.3

- a. Annual change in column 9 of Table 12.1.
- b. A positive figure means that this item increases debt and a negative figure means that it decreases debt.
- c. Breakdown of column in Table 12.5.
- d. Includes effects such as those produced by the reclassification of institutional units or financial instruments.
- e. Includes adjustments for interest accrued less interest paid, for issue or redemption premiums, for the difference between the nominal and cash amount of discounted issues, for capital losses or gains arising from early payment of liabilities and net incurrence of shares and other equity (PF.5).

Table 12.4

See notes to Table 12.3

Table 12.6

- a. Breakdowns of debt securities by instrument and of issues denominated in euro and in other currencies are given in Tables 21.12, 21.13 and 21.15. The difference between column 4 of this table 'Total debt securities' and column 1 of Table 21.12 'Total securities other than shares, except financial derivatives' arises from the fact that debt according to the methodology of the excessive deficit protocol excludes the securities held by other general government units and takes currency swaps into account.
- b. Not deducted from column 1.

Table 12.10

- a. The units included here as public enterprises are the main non-administrative agencies, entities and enterprises not classified under central government. For ease of comparison with the central government debt shown in this chapter, the debt of public enterprises shown in this table has been calculated using the EDP methodology. The debt of public enterprises does not fall within the scope of the EDP and, therefore, unlike the debt of general government (public debt), it is not included in the notifications sent to the European Commission.
- b. As a consequence of the reallocation of assets and liabilities prompted by RDL 7/2004 of 27 September 2004, between November and December 2004, an amount of €5,458 million that formed part of the debt of RENFE was assumed by the State.
- c. Law 39/2003 on the railway industry of 17 November 2003 reorganised the state railway industry, the management of the railway infrastructure (which was previously entrusted to RENFE and GIF) being entrusted to ADIF. Also RENFE-Operadora was set up, as a company providing railway transport services. This company assumed the resources and assets previously assigned by RENFE to the provision of railway services.

Table 12.11

- a. Liabilities issued by social security funds and held by other social security funds, other accounts payable and adjustments for differences between the market value and the nominal value of the liabilities net incurrence of shares and other equity (PF.5), as well as other adjustments resulting from the reclassification of institutional units and other changes in the information.
- b. The figures for GDP at market prices are calculated using the official series of the Spanish Quarterly National Accounts (CNE) published by the INE, by aggregating the last four quarters as at each reference date.

Table 12.12

Note: The quarterly percentages are calculated: 1) When the GDP for the four quarters of the year in question is available, using the GDP for that year; 2) when the GDP for the four quarters of the year in question is not available, using the annual GDP obtained by aggregating the quarterly GDP figures for the last four quarters.
See notes to Table 12.11.

Table 12.13

- a. Annual change in column 9 of Table 12.11.
- b. A positive figure means that this item increases debt and a negative figure means that it decreases debt.
- c. Breakdown of column in Table 12.15.
- d. Includes effects such as those produced by the reclassification of institutional units or financial instruments.
- e. Includes adjustments for interest accrued less interest paid, for issue or redemption premiums, for the difference between the nominal and cash amount of discounted issues, for capital losses or gains arising from early payment of liabilities and net incurrence of shares and other equity (PF.5).

NOTES TO THE TABLES OF CHAPTER 13: REGIONAL (AUTONOMOUS) GOVERNMENTS

Table 13.1

a. Liabilities issued by Regional (autonomous) Governments and held by other Regional (autonomous) Governments, other accounts payable and adjustments for differences between the market value and the nominal value of the liabilities net incurrence of shares and other equity (PF.5), as well as other adjustments resulting from the reclassification of institutional units and other changes in the information.

b. The figures for GDP at market prices are calculated using the official series of the Spanish Quarterly National Accounts (CNE) published by the INE, by aggregating the last four quarters as at each reference date.

Table 13.2

Note: The quarterly percentages are calculated: 1) When the GDP for the four quarters of the year in question is available, using the GDP for that year; 2) when the GDP for the four quarters of the year in question is not available, using the annual GDP obtained by aggregating the quarterly GDP figures for the last four quarters.

See notes to Table 13.1.

Table 13.3

a. Annual change in column 9 of Table 13.1.

b. A positive figure means that this item increases debt and a negative figure means that it decreases debt.

c. Breakdown of column in Table 13.5.

d. Includes effects such as those produced by the reclassification of institutional units or financial instruments.

e. Includes adjustments for interest accrued less interest paid, for issue or redemption premiums, for the difference between the nominal and cash amount of discounted issues, for capital losses or gains arising from early payment of liabilities and net incurrence of shares and other equity (PF.5).

Table 13.4

See notes to Table 13.3.

Table 13.7

a. A breakdown of issues into those denominated in euro and those denominated in currencies other than the euro is given in Table 21.18. The difference between column 3 of this table, 'total debt securities issued' and column 1 of table 21.18 'total debt securities issued excluding financial derivatives' arises from the fact that debt according to the methodology of the excessive deficit procedure takes into account the currency swaps carried out by the various regional (autonomous) governments.

Table 13.8

a. Includes the governing bodies of the regional (autonomous) governments.

b. The figures for GDP at market prices are calculated using the official series of the Spanish Quarterly National Accounts (CNE) published by the INE, by aggregating the last four quarters as at each reference date.

Table 13.9

a. Each regional (autonomous) government includes the units concerned with the general administration of the region, the universities located within its territory and those bodies and enterprises reporting to the regional (autonomous) government that are classified under general government. The Autonomous Cities of Ceuta and Melilla are classified in subsector Local Governments of the national accounting system.

b. The provincial councils of the Basque Country are classified in subsector Local Governments of the national accounting system. Table 14.8, column 16, provides information about the debt of the provincial councils of the Basque Country

Table 13.10

c. The figures for GDP at market prices used for the total are calculated using the official series of the Spanish Quarterly National Accounts (CNE) published by the INE, by aggregating the last four quarters as at each reference date. For the individual regional (autonomous) governments, the regional GDP mp published in the Spanish Regional Accounts (CRE) of the INE has been applied to the national GDP mp.

See notes to Table 13.9.

Table 13.11

a. The units included here as public enterprises are the main non-administrative agencies, entities and enterprises of the regional (autonomous) governments, which are classified as Public Administration. For ease of comparison with the general government debt shown in the previous tables (which is public debt, as narrowly defined), the debt of public enterprises shown in this table has been calculated using EDP methodology. The debt of public enterprises does not fall within the scope of the EDP, and therefore, unlike the debt of general government (public debt), it is not included in the notifications sent to the European Commission.

Table 13.12

c. The figures for GDP at market prices used for the total are calculated using the official series of the Spanish Quarterly National Accounts (CNE) published by the INE, by aggregating the last four quarters as at each reference date. For the individual regional (autonomous) governments, the regional GDP mp published in the Spanish Regional Accounts (CRE) of the INE has been applied to the national GDP mp.
See note a to Table 13.11 and note b to table 13.9.

NOTES TO THE TABLES OF CHAPTER 14. LOCAL GOVERNMENTS

Table 14.1

a. Liabilities issued by Local Governments and held by other Local Governments, other accounts payable and adjustments for differences between the market value and the nominal value of the liabilities net incurrence of shares and other equity (PF.5), as well as other adjustments resulting from the reclassification of institutional units and other changes in the information.

b. The figures for GDP at market prices are calculated using the official series of the Spanish Quarterly National Accounts (CNE) published by the INE, by aggregating the last four quarters as at each reference date.

Table 14.2

Note: The quarterly percentages are calculated: 1) When the GDP for the four quarters of the year in question is available, using the GDP for that year; 2) when the GDP for the four quarters of the year in question is not available, using the annual GDP obtained by aggregating the quarterly GDP figures for the last four quarters.

See notes to Table 14.1.

Table 14.3

a. Annual change in column 9 of Table 14.1.

b. A positive figure means that this item increases debt and a negative figure means that it decreases debt.

c. Breakdown of column in Table 14.5.

d. Includes effects such as those produced by the reclassification of institutional units or financial instruments.

e. Includes adjustments for interest accrued less interest paid, for issue or redemption premiums, for the difference between the nominal and cash amount of discounted issues, for capital losses or gains arising from early payment of liabilities and net incurrence of shares and other equity (PF.5).

Table 14.4

See notes to Table 14.3.

Table 14.7

a. A breakdown of issues into those denominated in euro and those denominated in currencies other than the euro is given in Table 21.18.

Table 14.8

a. Classified under local government are the municipal, ordinary-regime and specific-status provincial and island authorities, municipal groupings, and those bodies and enterprises subordinate to local government that are classified under general government.

b. The figures for GDP at market prices are calculated using the official series of the Spanish Quarterly National Accounts (CNE) published by the INE, by aggregating the last four quarters as at each reference date.

a. The quarterly series of year n for quarter t includes the rates of the cumulative data for year n up to quarter t, compared with the same period a year earlier.

Table 15.8, Table 15.14 and Table 15.17

a. The ordinary net profit (ONP) used to calculate this ratio includes, for each quarter, the proportional part of the dividends received up to that quarter from the beginning of the year, determined on a straight-line basis; the ratio of Table 15.9 provides cumulative information for each period (Q1, Q1-Q2, Q1-Q3, Q1-Q4) in which the total dividend received is included.

Table 15.9, Table 15.12, Table 15.15, Table 15.18 and Table 15.21

a. The quarterly series of year n for quarter t includes the ratios of the cumulative data for year n up to quarter t.

Table 15.26, Table 15.28 and Table 15.30

a. Columns t and t-1 in the annual frequency block refer to the fourth quarter of year t and the fourth quarter of year t-1. In the quarterly frequency block, columns t and t-1 contain the information of the quarter in question (t) and of that immediately preceding it (t-1), respectively.

Table 15.31 and Table 15.32

Note: Ratios FSI.1 and FSI.2nd have been prepared in accordance with the methodology defined by the IMF in its document Financial Soundness Indicator. Compilation Guide.

a. Figures for 2010 and 2011, both for total and for different aggregates by sector and size, are obtained by applying the rate of change of the previous base to the current base.

b. Data from the last period is an estimate made from the latest quarterly information received in the quarterly survey of the Central balance sheet data office (CBQ).

a. The composition of economic areas is detailed in the notes at the end of the chapter.

b. The difference between the amount assigned to the world total and the sum of the amounts for all the geographical areas is due to data without a geographical assignment and data from international institutions other than European Union. The presence of information without geographical assignment may also promote that the total amount for continents are not necessarily equal to the sum of their components.

c. In the case of portfolio investment, the geographical breakdown of the investment income from liabilities (payments) is based on the available information. This refers to the first non-resident counterpart, which does not necessarily correspond to the final holder of the securities.

- a. The difference between the amount assigned to the world total and the sum of the amounts for all the geographical areas is due to data without a geographical assignation and data from international institutions other than European Union. The presence of information without geographical assignation may also promote that the total amount for continents are not necessarily equal to the sum of their components.
- b. Inaccurate data according to the primary-source sampling error. In these cases the primary source, namely ECIS - Encuesta de Comercio Intenacional de Servicios (survey on international trade in services), conducted by the INE - has a very high weight in total services and the coefficients of variation exceed on average the limits considered acceptable in terms of data accuracy.

17. BALANCE OF PAYMENTS AND INTERNATIONAL INVESTMENT POSITION
A) Balance of payments

a. La composición de las zonas económicas se detalla en las notas al final del capítulo./ The composition of economic areas is detailed in the notes at the end of the chapter.
b. La diferencia entre los importes asignados al total mundial y la suma de las zonas geográficas corresponde a información que ha quedado indeterminada geográficamente y a las cantidades de organismos internacionales distintos de los de la Unión Europea. La existencia de información indeterminada geográficamente también puede provocar que los totales por continente no coincidan con la suma de sus partes cuando estos se desglosan. / The difference between the amount assigned to the world total and the sum of the amounts for all the geographical areas is due to data without a geographical assignation and data from international institutions other than European Union. The presence of information without geographical assignation may also promote that the total amount for continents are not necessarily equal to the sum of their components.

Other financial assets and liabilities include other equity which does not take the form of securities and is not included in portfolio investment (this is the case of some stakes in international organisations), trade credit and advances, other accounts receivable/payable, insurance, pension schemes, standardised guarantee systems and allocations of special drawing rights.

a. The composition of economic areas is detailed in the notes at the end of the chapter.

b. The difference between the amount assigned to the world total and the sum of the amounts for all the geographical areas is due to data without a geographical assignment and data from international institutions other than European Union.

c. The geographical breakdown of portfolio investment liabilities (payments) is not published due to its little analytical meaning, since it is compiled on the basis of the first non-resident counterpart, which does not necessarily correspond to the final holder of the securities and, in some cases, the geographical breakdown is not available in data sources.

d. SPEs: Special Purpose Entities (EFE in their Spanish initials). SPEs definition can be found in the IMF methodological guideline:

<https://www.imf.org/external/pubs/ft/bop/2020/pdf/20-26.pdf>. In the Spanish case, SPEs essentially correspond to companies whose main purpose is to channel direct investment.

b. The composition of economic areas is detailed in the notes at the end of the chapter.

c. The difference between the amount assigned to the world total and the sum of the amounts for all the geographical areas is due to data without a geographical assignment and data from international institutions other than European Union.

d. SPEs: Special Purpose Entities (EFE in their Spanish initials). SPEs definition can be found in the IMF methodological guideline:

<https://www.imf.org/external/pubs/ft/bop/2020/pdf/20-26.pdf>. In the Spanish case, SPEs essentially correspond to companies whose main purpose is to channel direct investment.

e. The Development Assistance Committee (DAC) List of ODA Recipients shows all countries and territories eligible to receive official development assistance (ODA). These consist of all low and middle income countries based on gross national income (GNI) per capita as published by the World Bank, with the exception of G8 members, EU members, and countries with a firm date for entry into the EU. The list also includes all of the Least Developed Countries (LDCs) as defined by the United Nations.

(a) Official mortgage market reference rates (Order EHA/2899/2011 and BE Circular 5/2012) are official as of their publication in the Spanish Official State Gazette (BOE from its initials in Spanish). Until then, they are treated as provisional data, and as such they are reported in this table for information purposes only.

(b) In order to coincide with the data published in the BOE, the columns of this table that contain series for the new Euribor maturities (one week, one month, three months, six months), included by Order ETD/699/2020, show observations from January 2021. The complete statistical series, with prior data, are available in Table 9.1 of the publication Economic Indicators and in Table 1.15 of the Statistical Bulletin.

(c) This rate matches that compiled and published by the ECB with a lag of one month for the purposes of its use as a mortgage market reference rate. As laid down in Annex 8 of Banco de España Circular 5/2012, this index will not be corrected should the European Central Bank subsequently change the rate published.

(d) This official reference rate is defined as the weighted average by nominal trading volumes of the internal rate of return (IRR) on Government bonds with residual maturity between two and six years, traded in simple spot transactions within the preceding six months. This average is taken from the RODE index 2-6 Y (S) which is calculated by Sociedad de Bolsas, S.A. and published on the "BME Renta Variable" website since May 2021.

(e) To consult other reference rates that are no longer considered official mortgage market reference rates, see publications before January 2021.

(f) This interest rate ceased to be considered an official mortgage market reference rate for mortgage loans arranged as from 1 January 2000.

a. NDER rates do not include associated expenses, such as amortisation insurance premiums and fees to cover related direct costs. The purpose of the NDER rates is essentially to provide to the Eurosystem relevant information for the analysis of the transmission of monetary policy, unlike APRC rates, they are not an appropriate or comparable indication of the total cost to the customer of the financing granted.

b. Up to the reference month May 2010, this column includes only current account overdrafts (see the 'Changes' note in the July-August 2010 Statistical Bulletin).

c. Credit card debt for cardholders that have requested deferred payment with usually interest rates over 0%.

Note: The terms refer to the initial period of fixation of the rate. For example, a 15-year loan at an annually revisable rate is classified under the term 'Up to one year'.

a. Up to the reference month May 2010, this column includes only current account overdrafts (see the 'Changes' note in the July-August 2010 Statistical Bulletin).

Note: The terms refer to the initial period of fixation of the rate. For example, a 15-year loan at an annually revisable rate is classified under the term 'Up to one year'.

a. Up to the reference month May 2010, this column includes only current account overdrafts (see the 'Changes' note in the July-August 2010 Statistical Bulletin).

b. For these instruments, the CBE 1/2010 considers 'new business' as the outstanding amounts at the end of the month. For this reason in both columns the annual amount coincides with last month of the year.

e. Indices calculated as geometrical mean of bilateral exchange rates of the countries comprising the counterpart grouping using a double weighting system based on manufacturing foreign trade figures.

f. Relationship between the Spanish price index and that of the related grouping calculated as the geometrical mean of the price indices of the countries comprising the counterpart grouping, weighted as indicated in the preceding notes d. and e. for each type of index.

g. Quarterly series. Indices for Spain have been calculated using data for Unit Labour Costs (total and manufacturing) compiled from Quarterly Spanish National Accounts (INE), with series adjusted of seasonal and calendar effects, and employment series defined in terms of number of persons.

(b) There are included non-financial corporations, households and NPISHs and General Government.

NOTES TO THE TABLES OF CHAPTER 22. SECONDARY MARKETS FOR SECURITIES.

- a. The various breakdowns of holding sectors are obtained using information on securities portfolios provided by the holders themselves (in the case of much of the financial sector) and depositors (for the remaining holding agents). This information is received following the rules of Regulation (EU) No 1011/2012 of the European Central Bank concerning statistics on holdings of securities.
- b. The breakdown by term and currency of the issues can be consulted in Table 21.18. The difference between column 1 of this table and column 3 in Table 13.7 is due to the fact that, in the second case, Debt according to the excessive debt procedure (EDP) takes into account the foreign exchange swaps made by the various regional governments.

a. To December 2002 this includes: "Wind energy, urban solid waste and other solid fuels". From January 2003: "Wind energy, solar energy, biomass and residues (Renewable energies)". In 2010 Q2 there was a methodological change in the series relating to the production and consumption of "Renewable energies". This involves the inclusion for the first time of consumption for the final use of these energies. The change affects these series from January 2005. The monthly series are only available from April 2008. Accordingly, from January 2005 to March 2008, the monthly data were estimated by applying to the available annual totals the percentage accounted for by each month in the annual total in the series not included in consumption for final use.

Note: For all the monthly data, the annual figures do not always coincide with the annual addition of the monthly figures, in which case the difference is distributed evenly over the year.

General note to the tables: As a result of the change in the population base (2011 Census), all the series in this table have been revised as from 2002. In addition, since 2005Q1

the new obligatory variables referred to in Regulation (EC) 2257/2003 (on the adaptation of the list of labour force survey characteristics) have been included, a centralised procedure for telephone interviews has been set in place and the questionnaire has been modified. Thus, in 2005Q1, there is a break in the series of some variables. For further information, see www.ine.es.

General note to the tables: As a result of the change in the population base (2011 Census), all the series in this table have been revised as from 2002. In addition, since 2005Q1

the new obligatory variables referred to in Regulation (EC) 2257/2003 (on the adaptation of the list of labour force survey characteristics) have been included, a centralised procedure for telephone interviews has been set in place and the questionnaire has been modified. Thus, in 2005Q1, there is a break in the series of some variables. For further information, see www.ine.es.

General note to the tables: As a result of the change in the population base (2011 Census), all the series in this table have been revised as from 2002. In addition, since 2005Q1 the new obligatory variables referred to in Regulation (EC) 2257/2003 (on the adaptation of the list of labour force survey characteristics) have been included, a centralised procedure for telephone interviews has been set in place and the questionnaire has been modified. Thus, in 2005Q1, there is a break in the series of some variables. For further information, see www.ine.es.

(a) Seasonally adjusted series. In the case of countries, except Switzerland, the series are also adjusted for the calendar effect.

(b) The data for the OECD area is in USD and the data for the EU aggregate is in euros. The data for the euro area countries up to 1998 Q4 have been obtained applying the irrevocable euro conversion rates to the national currency series. As the euro area aggregate for that period has been obtained applying the respective exchange rates in ECU to the national currency series, this aggregate is not equal to the sum of the constituent countries.

(c) From May 2022 OECD data is used.

(a) Seasonally adjusted series. In the case of countries, the series are also adjusted for the calendar effect.

(b) The data for the OECD area is in USD and the data for the EU aggregate is in euros. The data for the euro area countries up to 1998 Q4 have been obtained applying the irrevocable euro conversion rates to the national currency series. As the euro area aggregate for that period has been obtained applying the respective exchange rates in ECU to the national currency series, this aggregate is not equal to the sum of the constituent countries.

(c) From May 2022 OECD data is used.

APPENDIX 1 BANCO DE ESPAÑA. OFFICIAL BALANCE SHEET

SUMMARIZED BALANCE SHEET OF THE BANCO DE ESPAÑA

Banco de España balance sheet published pursuant to the Resolution of 28.3.2000 (BOE 6.4.2000)

According to the accounting regime chosen by the Eurosystem on the issue of euro banknotes, a share of 8% of the total value of the euro banknotes in circulation is allocated to the ECB on a monthly basis. The counterpart of this adjustment is recorded as an Intra-Eurosystem liability related to banknote issue. The remaining 92% of the value of the euro banknotes in circulation are allocated to the NCBs on a monthly basis too, whereby each NCB shows in its balance sheet a share of the euro banknotes issued corresponding to its paid-up share in the ECB's capital. The difference between the value of the euro banknotes allocated to the NCB according to the aforementioned accounting regime, and the value of euro banknotes put into circulation, is also recorded as an Intra-Eurosystem claim/liability related to banknote issue.
