

Advancing together in the next 10 years

Harmonised, connected and integrated

- We work in interdisciplinary and multinational teams.
- We engage with supervisors and regulators around the world.
- We support progress towards completing the banking union.

We are fostering further integration within our supervisory community, sharing expertise, facilitating work experience in different institutions and building a common culture through SSM career paths.

We support a unitary approach towards the banking union and are strengthening international cooperation, in line with the increasingly mobile and interconnected nature of the banking business.

Highly skilled

- We are at the forefront of banking supervision.
- We are equipped with the necessary skill set to supervise traditional and emerging supervisory risks.
- We are prepared to meet future challenges thanks to continuous training and development.

We share a common supervisory skill set following the SSM Foundation training programme. We further advance our expertise with specialised learning paths, making use of innovative learning tools and academic partnerships.

Risk-focused, agile and impactful

- We focus on addressing our strategic priorities and bank-specific vulnerabilities.
- We deliver high-quality supervision of the biggest banking sector in the world.
- We address fast-changing economic circumstances with agility.

The multi-year Supervisory Review and Evaluation Process allows us to calibrate the intensity and frequency of our analyses. Using a risk tolerance framework, we can prioritise and adjust to specific vulnerabilities of individual banks, while ensuring consistent treatment of all banks with strong internal controls.

Innovative and digital

- We are a leading digital practitioner.
- We embrace digital transformation and innovation.
- We use supervisory technologies to streamline our work, analyse complex information and connect within the SSM.
