

CHANGES TO THE SUMMARY INDICATORS HOUSING MARKET INDICATORS

February 2009

The content of table “1.6 Housing market indicators” of the Summary Indicators has been revised. The main changes are: a) the inclusion of newly available information (e.g. the Housing Price Index compiled by Instituto Nacional de Estadística); b) the deletion of certain variables that the source has ceased to compile; and c) the revision of the methodology for calculating certain variables (e.g. real estate wealth and the housing stock).
