Internationally standardised methodological notes

Financial Accounts of the Spanish Economy: [Metodological Summary \(2019\)](#) and [Methodological Note \(ESA 2010\)](#), on the Financial Accounts statistics web page, contains a detailed description of the methodology used to estimate the Banco de España's statistics of Spain's Financial Accounts. Structured documentation under international schemes may also be consulted on the methodology used. These international schemes seek to ensure quality standards and provide for crosscountry comparison. This documentation includes the following:

1 Methodological notes of countries adhering to the IMF's Special Data Dissemination Standard (SDDS, SDDS+ for those countries that observe its more demanding level, such as Spain):

	SDDS	SDDS Plus
Access to the notes of adhering countries	SDDS countries	SDDS Plus countries
Spain		
Sectorial stocks of financial assets and liabilities		Balances
Debt securities		Debt

2 *Level 3* reports of Financial Accounts position under the quality assurance framework established by the European Union's Committee on Monetary, Financial and Balance of Payments Statistics (CMFB) for the European Union, for the statistics underlying the Macroeconomic Imbalance Procedure (MIP) indicators:

- Access to the report of other countries [Other countries](#)
- Access to Spain's report [Spain](#)
