## Footnote

- a) The manufacturer has declared that the machine(s) mentioned between brackets has/have the same performance regarding the tested functionality (authenticity/fitness/tracing ability).

## Explanations

### **Prior to testing, manufacturers are requested to provide the following information to the Banco de España:**

1. Country of origin (if not an EU Member State) of the machine,
2. Manner of note insertion, i.e. automated/batch processing or manual feeding; according to the framework only machines with automated processing are tested according to this test procedure,
3. Information on whether the machine complies with any national or Community health and safety legislation; if so, which,
4. Indication of which banknote denominations and banknote feeding orientations the machine is designed to support and whether information on this is shown clearly on the machine,
5. Statement concerning which authentication features, as specified by the company, the machine is checking and how these checks are carried out,
6. User manual; if the user manual is not in the official languages of the Member State of the NCB which is conducting the test, other similar information needed for operating the machine shall be provided,
7. Information on whether the user manual or other instructions given to the user indicate (a) how, and (b) how frequently the machine needs to be serviced (e.g. cleaning of sensors) in order to function reliably,
8. Information on whether the machine can be adapted to detect new counterfeits, and if so, how this is achieved and how this can be verified by the user,
9. Information on how the fitness sorting thresholds can be changed, and
10. Information on the machine's power supply.

## Disclaimer

- i. The counterfeit euro banknotes used in the test are, to the best of the knowledge of the ECB and the NCBs, those most commonly found in circulation in the euro area at the time of the update of the test deck used in the test. Since the ECB and the NCBs cannot foresee or exclude the possibility of new types of counterfeits appearing after the update of the test deck used, it is the responsibility of the manufacturers to regularly re-test the various types of machines. Furthermore, it is the responsibility of distributors and users of the machines to have the authentication devices integrated in their machines periodically updated in order to detect new counterfeits.
- ii. To the extent permitted by applicable law, the ECB and the NCBs do not accept any liability whatsoever for any direct or indirect damage resulting from the performance of the tests, the publication, non-publication or removal from the Internet of the test results, or for the tests' outcomes.

- iii. The published test results neither contain, nor imply, any recommendation by the ECB or the NCBs that third parties should or should not use the type of machine tested.
- iv. This statement does not imply any warranty by the ECB or the NCBs, whether express or implied, that the types of machine tested can detect counterfeit euro banknotes continuously and without error, or concerning their fitness for use, or their purpose irrespective of whether the users of the machine comply with the user requirements or not.
