Source: ECB securities issues statistics.

1) "Short-term" means securities with an original maturity of one year or less (in exceptional cases two years or less). Securities with a longer original maturity, or with optional maturity dates, the latest of which is more than one year away, or with indefinite maturity dates, are classified as long-term.

2) The residual difference between total long-term debt securities and fixed and variable rate long-term debt securities consists of zero coupon bonds and revaluation effects.

3) As a full breakdown of net issues into gross issues and redemptions may not always be available, the difference between aggregated gross issues and redemptions may deviate from the aggregated net issues.

4) Monthly averages of the transactions during this period.

5) As of the reference period December 2009 a euro area country extended the coverage of debt securities issued to include also the non-MFI corporations as well as the short-term debt securities issued by the Government sector. This leads to higher levels of outstanding amounts of around EUR 800 billion, mainly for the long-term (variable rate) debt securities.

6) Annual growth rates are based on financial transactions that occur when an institutional unit incurs or redeems liabilities. The annual growth rates therefore exclude the impact of reclassifications, revaluations, exchange rate variations and any other changes which do not arise from transactions.

Source: ECB securities issues statistics.

1) Corresponding ESA 95 sector codes: MFIs (including Eurosystem) comprises the ECB and the national central banks of the euro area (S.121) and other monetary financial institutions (S.122); financial corporations other than MFIs comprises other financial intermediaries (S.123), financial auxiliaries (S.124) and insurance corporations and pension funds (S.125); non-financial corporations (S.11); central government (S.1311); other general government comprises state government (S.1312), local government (S.1313) and social security funds (S.1314).

2) The residual difference between total long-term debt securities and fixed and variable rate long-term debt securities consists of zero coupon bonds and revaluation effects.

3) As a full breakdown of net issues into gross issues and redemptions may not always be available, the difference between aggregated gross issues and redemptions may deviate from the aggregated net issues.

4) Monthly averages of the transactions during this period.

5) As of the reference period December 2009 a euro area country extended the coverage of debt securities issued to include also the non-MFI corporations as well as the short-term debt securities issued by the Government sector. This leads to higher levels of outstanding amounts of around EUR 800 billion, mainly for the financial corporations other than MFIs sector.

6) Annual growth rates are based on financial transactions that occur when an institutional unit incurs or redeems liabilities. The annual growth rates therefore exclude the impact of reclassifications, revaluations, exchange rate variations and any other changes which do not arise from transactions.

1) Corresponding ESA 95 sector codes: MFIs (including Eurosystem) comprises the ECB and the national central banks of the euro area (S.121) and other monetary financial institutions (S.122); financial corporations other than MFIs comprises other financial intermediaries (S.123), financial auxiliaries (S.124) and insurance corporations and pension funds (S.125); non-financial corporations (S.11); central government (S.1311); other general government comprises state government (S.1312), local government (S.1313) and social security funds (S.1314).

2) As of the reference period December 2009 a euro area country extended the coverage of debt securities issued to include also the non-MFI corporations as well as the short-term debt securities issued by the Government sector. This leads to higher levels of outstanding amounts (not seasonally adjusted) of around EUR 800 billion, mainly for the financial corporations other than MFIs sector.

3) Three-month annualised growth rates are based on financial transactions that occur when an institutional unit incurs or redeems liabilities. The three-month annualised growth rates therefore exclude the impact of reclassifications, revaluations, exchange rate variations and any other changes which do not arise from transactions. The rates are annualised to allow direct comparisons with annual rates (please note that the non-adjusted rates presented in Table 2 are almost identical to seasonally adjusted annual rates).

1) Corresponding ESA 95 sector codes: MFIs refers to other monetary financial institutions (S.122); financial corporations other than MFIs comprises other financial intermediaries (S.123), financial auxiliaries (S.124) and insurance corporations and pension funds (S.125); non-financial corporations (S.11).

2) Monthly averages of the transactions during this period.

3) As of the reference period December 2009 a euro area country extended the coverage of quoted shares, including also international listings.

This leads to higher levels of outstanding amounts of around EUR 120 billion, mainly in the non-financial corporations sector.

4) Percentage change between the amount outstanding at the end of the month and the amount outstanding 12 months earlier.

5) Annual growth rates are based on transactions that occur during the period and therefore exclude reclassifications and any other changes which do not arise from transactions.
