

12 March 2013

PRESS RELEASE

EURO AREA SECURITIES ISSUES STATISTICS: JANUARY 2013

The annual growth rate of the outstanding amount of debt securities issued by euro area residents decreased from 1.8% in December 2012 to 1.3% in January. For the outstanding amount of quoted shares issued by euro area residents, the annual growth rate was 1.1% in January 2013, compared with 1.2% in December.

New issuance of debt securities by euro area residents totalled EUR 891 billion in January 2013. Redemptions stood at EUR 896 billion and net redemptions amounted to EUR 2 billion.¹ The annual growth rate of outstanding debt securities issued by euro area residents decreased from 1.8% in December 2012 to 1.3% in January (see Table 1 and Charts 1 and 3).

The annual rate of change of outstanding short-term debt securities decreased from -7.2% in December 2012 to -8.2% in January. For long-term debt securities, the annual growth rate decreased from 2.7% in December 2012 to 2.3% in January. The annual growth rate of outstanding fixed rate long-term debt securities decreased from 5.2% in December 2012 to 4.8% in January. The annual rate of change of outstanding variable rate long-term debt securities decreased from -5.1% in December 2012 to -5.8% in January (see Table 1 and Chart 3).

As regards the sectoral breakdown, the annual growth rate of outstanding debt securities issued by non-financial corporations decreased from 14.0% in December 2012 to 13.3% in January. For the monetary financial institutions (MFIs) sector, this rate of change decreased from -1.3% in December 2012 to -2.0% in January. The annual growth rate of outstanding debt securities issued by financial corporations other than MFIs decreased from 1.5% in December 2012 to 1.2% in January. For the general government, this growth rate decreased from 2.9% in December 2012 to 2.4% in January (see Table 2 and Chart 4).

¹ As a full breakdown of net issues into gross issues and redemptions is not available due to missing data, the difference between aggregated gross issues and redemptions may deviate from the aggregated net issues.

The annual rate of change of outstanding short-term debt securities issued by MFIs decreased from -14.6% in December 2012 to -15.4% in January. The annual growth rate of outstanding long-term debt securities issued by MFIs decreased from 0.6% in December 2012 to 0.0% in January (see Table 2).

Concerning the currency breakdown, the annual growth rate of outstanding euro-denominated debt securities decreased from 1.5% in December 2012 to 0.8% in January. For debt securities in other currencies, this growth rate increased from 4.3% in December 2012 to 5.2% in January (see Table 1).

New issuance of quoted shares by euro area residents totalled EUR 4.6 billion in January 2013. Redemptions came to EUR 0.3 billion and net issues amounted to EUR 4.3 billion. The annual growth rate of the outstanding amount of quoted shares issued by euro area residents (excluding valuation changes) was 1.1% in January 2013, compared with 1.2% in December. The annual growth rate of quoted shares issued by non-financial corporations was 0.6% in January 2013, compared with 0.5% in December. For MFIs, the corresponding growth rate decreased from 4.9% in December 2012 to 2.7% in January. For financial corporations other than MFIs, this growth rate was 4.2% in January 2013, compared with 4.1% in December (see Table 4 and Chart 6).

The market value of the outstanding amount of quoted shares issued by euro area residents totalled EUR 4,656 billion at the end of January 2013. Compared with EUR 4,101 billion at the end of January 2012, this represents an annual increase of 13.5% in the value of the stock of quoted shares in January 2013, down from 16.0% in December.

Unless otherwise indicated, data relate to non-seasonally adjusted statistics. In addition to the developments for January 2013, this press release incorporates minor revisions to the data for previous periods. The annual growth rates are based on financial transactions that occur when an institutional unit incurs or redeems liabilities, they are not affected by the impact of any other changes which do not arise from transactions.

A complete set of updated securities issues statistics is available on the "Monetary and financial statistics" pages of the Statistics section of the ECB's website <http://www.ecb.europa.eu/stats/money/securities/html/index.en.html>. These data, as well as euro area data in accordance with the composition of the euro area at the time of the reference period, can be downloaded using the ECB's Statistical Data Warehouse (SDW). The tables and charts accompanying this press release are also available in the reports section of the SDW (<http://sdw.ecb.europa.eu/reports.do?node=1000002753>).

Data for the period up to January 2013 will also be published in the April 2013 issues of the ECB's Monthly Bulletin and Statistics Pocket Book. The next press release on euro area securities issues will be published on 11 April 2013.

Source: ECB securities issues statistics.

1) From October 2012, euro area statistics also include the European Stability Mechanism, an organisation resident in the euro area for statistical purposes. The first issuance of securities by the ESM took place in December 2012.

2) "Short-term" means securities with an original maturity of one year or less (in exceptional cases two years or less). Securities with a longer original maturity, or with optional maturity dates, the latest of which is more than one year away, or with indefinite maturity dates, are classified as long-term.

3) The residual difference between total long-term debt securities and fixed and variable rate long-term debt securities consists of zero coupon bonds and revaluation effects.

4) As a full breakdown of net issues into gross issues and redemptions may not always be available, the difference between aggregated gross issues and redemptions may deviate from the aggregated net issues.

5) Monthly averages of the transactions during this period.

6) Annual growth rates are based on financial transactions that occur when an institutional unit incurs or redeems liabilities. The annual growth rates therefore exclude the impact of reclassifications, revaluations, exchange rate variations and any other changes which do not arise from transactions.

Source: ECB securities issues statistics.

1) From October 2012, euro area statistics also include the European Stability Mechanism, an organisation resident in the euro area for statistical purposes. The first issuance of securities by the ESM took place in December 2012.

2) Corresponding ESA 95 sector codes: MFIs (including Eurosystem) comprises the ECB and the national central banks of the euro area (S.121) and other monetary financial institutions (S.122); financial corporations other than MFIs comprises other financial intermediaries (S.123), financial auxiliaries (S.124) and insurance corporations and pension funds (S.125); non-financial corporations (S.11); central government (S.131); other general government comprises state government (S.1312), local government (S.1313) and social security funds (S.1314).

3) The residual difference between total long-term debt securities and fixed and variable rate long-term debt securities consists of zero coupon bonds and revaluation effects.

4) As a full breakdown of net issues into gross issues and redemptions may not always be available, the difference between aggregated gross issues and redemptions may deviate from the aggregated net issues.

5) Monthly averages of the transactions during this period.

6) Annual growth rates are based on financial transactions that occur when an institutional unit incurs or redeems liabilities. The annual growth rates therefore exclude the impact of reclassifications, revaluations, exchange rate variations and any other changes which do not arise from transactions.

1) From October 2012, euro area statistics also include the European Stability Mechanism, an organisation resident in the euro area for statistical purposes. The first issuance of securities by the ESM took place in December 2012.

2) Corresponding ESA 95 sector codes: MFIs (including Eurosystem) comprises the ECB and the national central banks of the euro area (S.121) and other monetary financial institutions (S.122); financial corporations other than MFIs comprises other financial intermediaries (S.123), financial auxiliaries (S.124) and insurance corporations and pension funds (S.125); non-financial corporations (S.11); central government (S.1311); other general government comprises state government (S.1312), local government (S.1313) and social security funds (S.1314).

3) Three-month annualised growth rates are based on financial transactions that occur when an institutional unit incurs or redeems liabilities. The three-month annualised growth rates therefore exclude the impact of reclassifications, revaluations, exchange rate variations and any other changes which do not arise from transactions. The rates are annualised to allow direct comparisons with annual rates (please note that the non-adjusted rates presented in Table 2 are almost identical to seasonally adjusted annual rates).

1) Corresponding ESA 95 sector codes: MFIs refers to other monetary financial institutions (S.122); financial corporations other than MFIs comprises other financial intermediaries (S.123), financial auxiliaries (S.124) and insurance corporations and pension funds (S.125); non-financial corporations (S.11).

2) Monthly averages of the transactions during this period.

3) Percentage change between the amount outstanding at the end of the month and the amount outstanding 12 months earlier.

4) Annual growth rates are based on transactions that occur during the period and therefore exclude reclassifications and any other changes which do not arise from transactions.
