

10 July 2013

PRESS RELEASE

EURO AREA SECURITIES ISSUES STATISTICS: MAY 2013

The annual rate of change of the outstanding amount of debt securities issued by euro area residents was -0.1% in May 2013, compared with -0.3% in April. For the outstanding amount of quoted shares issued by euro area residents, the annual growth rate was 0.5% in May 2013, compared with 0.3% in April.

New issuance of debt securities by euro area residents totalled EUR 808 billion in May 2013. Redemptions stood at EUR 716 billion and net issues amounted to EUR 105 billion.¹ The annual rate of change of outstanding debt securities issued by euro area residents was -0.1% in May 2013, compared with -0.3% in April (see Table 1 and Charts 1 and 3).

The annual rate of change of outstanding short-term debt securities was -8.3% in May 2013, compared with -9.2% in April. For long-term debt securities, the annual growth rate was 0.8% in May 2013, compared with 0.6% in April. The annual growth rate of outstanding fixed rate long-term debt securities was 3.6% in May 2013, compared with 3.7% in April. The annual rate of change of outstanding variable rate long-term debt securities was -7.8% in May 2013, the same as in April (see Table 1 and Chart 3).

As regards the sectoral breakdown, the annual growth rate of outstanding debt securities issued by non-financial corporations decreased from 12.2% in April 2013 to 11.2% in May. For the monetary financial institutions (MFIs) sector, this rate of change decreased from -6.0% in April 2013 to -6.3% in May. The annual rate of change of outstanding debt securities issued by financial corporations other than MFIs was -1.3% in May 2013, compared with -1.6% in April. For the general government, this growth rate increased from 3.2% in April 2013 to 4.0% in May (see Table 2 and Chart 4).

The annual rate of change of outstanding short-term debt securities issued by MFIs was -17.7% in May 2013, compared with -18.2% in April. The annual rate of change of outstanding long-term debt securities issued by MFIs decreased from -4.2% in April 2013 to -4.6% in May (see Table 2). Concerning the currency breakdown, the annual rate of change of outstanding euro-

¹ As a full breakdown of net issues into gross issues and redemptions is not available due to missing data, the difference between aggregated gross issues and redemptions may deviate from the aggregated net issues.

denominated debt securities was -0.4% in May 2013, compared with -0.7% in April. For debt securities in other currencies, this growth rate increased from 2.3% in April 2013 to 2.7% in May (see Table 1).

New issuance of quoted shares by euro area residents totalled EUR 10.8 billion in May 2013. Redemptions came to EUR 1.8 billion and net issues amounted to EUR 8.9 billion. The annual growth rate of the outstanding amount of quoted shares issued by euro area residents (excluding valuation changes) was 0.5% in May 2013, compared with 0.3% in April. The annual growth rate of quoted shares issued by non-financial corporations was 0.1% in May 2013, the same as in April. For MFIs, the corresponding growth rate increased from 0.9% in April 2013 to 1.9% in May. For financial corporations other than MFIs, this growth rate was 2.5% in May 2013, compared with 2.7% in April (see Table 4 and Chart 6).

The market value of the outstanding amount of quoted shares issued by euro area residents totalled EUR 4,853 billion at the end of May 2013. Compared with EUR 3,763 billion at the end of May 2012, this represents an annual increase of 29.0% in the value of the stock of quoted shares in May 2013, up from 16.3% in April.

Unless otherwise indicated, data relate to non-seasonally adjusted statistics. In addition to the developments for May 2013, this press release incorporates minor revisions to the data for previous periods. The annual growth rates are based on financial transactions that occur when an institutional unit incurs or redeems liabilities, they are not affected by the impact of any other changes which do not arise from transactions.

A complete set of updated securities issues statistics is available on the "Monetary and financial statistics" pages of the Statistics section of the ECB's website <http://www.ecb.europa.eu/stats/money/securities/html/index.en.html>.

These data, as well as euro area data in accordance with the composition of the euro area at the time of the reference period, can be downloaded using the ECB's Statistical Data Warehouse (SDW). The tables and charts accompanying this press release are also available in the reports section of the SDW (<http://sdw.ecb.europa.eu/reports.do?node=1000002753>).

Data for the period up to May 2013 will also be published in the August 2013 issues of the ECB's Monthly Bulletin and Statistics Pocket Book. The next press release on euro area securities issues will be published on 12 August 2013.

Source: ECB securities issues statistics.

1) From October 2012, euro area statistics also include the European Stability Mechanism, an organisation resident in the euro area for statistical purposes. The first issuance of securities by the ESM took place in December 2012.

2) "Short-term" means securities with an original maturity of one year or less (in exceptional cases two years or less). Securities with a longer original maturity, or with optional maturity dates, the latest of which is more than one year away, or with indefinite maturity dates, are classified as long-term.

3) The residual difference between total long-term debt securities and fixed and variable rate long-term debt securities consists of zero coupon bonds and revaluation effects.

4) As a full breakdown of net issues into gross issues and redemptions may not always be available, the difference between aggregated gross issues and redemptions may deviate from the aggregated net issues.

5) Monthly averages of the transactions during this period.

6) Annual growth rates are based on financial transactions that occur when an institutional unit incurs or redeems liabilities. The annual growth rates therefore exclude the impact of reclassifications, revaluations, exchange rate variations and any other changes which do not arise from transactions.

1) From October 2012, euro area statistics also include the European Stability Mechanism, an organisation resident in the euro area for statistical purposes. The first issuance of securities by the ESM took place in December 2012.

2) Corresponding ESA 95 sector codes: MFIs (including Eurosystem) comprises the ECB and the national central banks of the euro area (S.121) and other monetary financial institutions (S.122); financial corporations other than MFIs comprises other financial intermediaries (S.123), financial auxiliaries (S.124) and insurance corporations and pension funds (S.125); non-financial corporations (S.11); central government (S.1311); other general government comprises state government (S.1312), local government (S.1313) and social security funds (S.1314).

3) The residual difference between total long-term debt securities and fixed and variable rate long-term debt securities consists of zero coupon bonds and revaluation effects.

4) As a full breakdown of net issues into gross issues and redemptions may not always be available, the difference between aggregated gross issues and redemptions may deviate from the aggregated net issues.

5) Monthly averages of the transactions during this period.

6) Annual growth rates are based on financial transactions that occur when an institutional unit incurs or redeems liabilities. The annual growth rates therefore exclude the impact of reclassifications, revaluations, exchange rate variations and any other changes which do not arise from transactions.

1) From October 2012, euro area statistics also include the European Stability Mechanism, an organisation resident in the euro area for statistical purposes. The first issuance of securities by the ESM took place in December 2012.

2) Corresponding ESA 95 sector codes: MFIs (including Eurosystem) comprises the ECB and the national central banks of the euro area (S.121) and other monetary financial institutions (S.122); financial corporations other than MFIs comprises other financial intermediaries (S.123), financial auxiliaries (S.124) and insurance corporations and pension funds (S.125); non-financial corporations (S.11); central government (S.1311); other general government comprises state government (S.1312), local government (S.1313) and social security funds (S.1314).

3) Three-month annualised growth rates are based on financial transactions that occur when an institutional unit incurs or redeems liabilities. The three-month annualised growth rates therefore exclude the impact of reclassifications, revaluations, exchange rate variations and any other changes which do not arise from transactions. The rates are annualised to allow direct comparisons with annual rates (please note that the non-adjusted rates presented in Table 2 are almost identical to seasonally adjusted annual rates).
