

27 October 2014

PRESS RELEASE

EURO AREA ECONOMIC AND FINANCIAL DEVELOPMENTS BY INSTITUTIONAL SECTOR (Q2 2014)

First release according to the new statistical standard (ESA 2010)

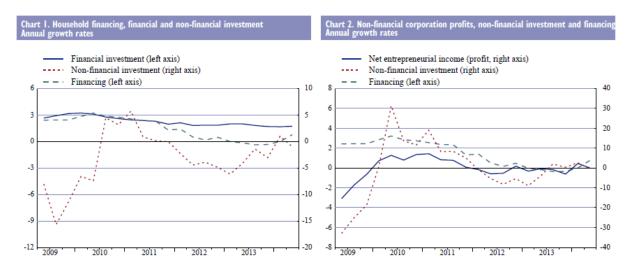

This press release is based on financial and non-financial accounts data which are for the first time compiled according to the new European System of Accounts (ESA 2010). In addition to methodological changes and revisions due to the introduction of new data sources, the change-over results in more detailed sub-sector breakdowns in the financial accounts of the financial corporations sector and more detailed breakdowns in financial assets and liabilities.

Euro area country data are fully in line with ESA 2010 from the fourth quarter of 2012. Most countries also compile longer ESA 2010 series. Euro area data from the first quarter 1999 to the third quarter of 2012 have been adapted to ESA 2010 using estimation methods where country data are not available.

An update of the data published in this press release is scheduled for 12 November 2014 and will be disseminated via the ECB's Statistical Data Warehouse.

For further detail see: http://www.ecb.europa.eu/stats/acc/ESA2010/html/index.en.html.

- Household financing increased at an annual rate (0.8%) in the second quarter of 2014 after remaining stable in the previous quarter. Household financial investment increased at an unchanged annual rate (1.7%). Household net worth increased at a higher annual rate (2.5% after 1.5%).
- Non-financial corporations' net entrepreneurial income (broadly equivalent to current profits) increased at a lower annual rate (0.5% after 6.0%), while their financing increased at an unchanged rate (0.5%).
- Net lending by the euro area households slightly increased as a percentage of euro area net disposable income (3.7% after 3.5%), while net lending by the financial and non-financial corporations sector and net borrowing by the government sector decreased. As a result, euro area net lending to the rest of the world increased slightly to 2.6% of net disposable income.

Households

Household gross disposable income increased at a lower annual rate (second quarter 2014: 0.8%, first quarter: 1.0%)¹. Increases in compensation of employees were partly offset by the negative effect of increasing taxes.

Household consumption expenditure increased at a higher annual rate (1.6% after 1.4%). The household gross saving rate was 13.0% in the second quarter of 2014, compared to 12.8% in the second quarter of 2013. Household gross non-financial investment decreased after increasing previously (-0.9% after 1.0%).

Financing of households grew at an annual rate of 0.8% after having remained stable in the previous quarter. Loan financing remained unchanged (0.0%, after -0.2%)².

Household financial investment grew at an unchanged rate (1.7%). Among the components, additions to currency and deposits grew at a broadly unchanged rate (2.4% after 2.3%), while investments in shares and other equity decelerated (to 2.0% after 2.4% respectively) and additions to life insurance and pension schemes continued growing at a broadly unchanged rate (2.9%).

Household net worth increased at a higher annual rate (2.5% after 1.5%), as changes in financial and non-financial investments as well as net valuation gains exceeded the incurrence of debt. Moreover, the value of housing wealth was broadly stable after having declined in the previous quarter (-0.1 after -1.0%). The household debt ratio decreased to 96.0% in the second quarter of 2014, from 97.8% in the second quarter of 2013.

¹ The annual growth rate of non-financial transactions and of outstanding assets and liabilities (stocks) is calculated as the percentage change between the value of the transaction or outstanding amount for a given quarter and that value recorded four quarters earlier.

² The annual growth rates used to analyse financial transactions refer to the total value of transactions during the year in relation to the outstanding stock a year before.

Household saving, change in net worth ar	ıd debt											
percentages of adjusted gross disposable income, based on four-quarter cumulated flows												
	2012Q4	2013Q1	2013Q2	2013Q3	2013Q4	2014Q1	2014Q2

Debt (loans, outstanding amount)	98.2	97.8	97.8	97.4	96.5	96.0	96.0					

Non-financial corporations

Net entrepreneurial income³ of non-financial corporations and net value added increased at lower annual rates (0.5% after 6.0%, and 1.0% after 2.0%, respectively). Non-financial investment decreased after increasing previously (-0.5% after 2.7%). This decline was due to declining inventories (subtracting 0.7 percentage points) and a lower rate of increase of gross fixed capital formation (0.2% after 3.6%).

Non-financial corporations												
percentages of net value added, based on four-quarter cumulated flows												
	2012Q4	2013Q1	2013Q2	2013Q3	2013Q4	2014Q1	2014Q2					
Net entrepreneurial income (current profits)	31.0	31.1	30.9	30.6	29.9	30.2	30.2					
Net saving (retained earnings)	1.5	1.8	1.9	1.7	1.5	1.9	1.7					
Non-financial investment (net)	3.3	2.5	2.2	2.2	2.1	2.2	2.0					
Debt (outstanding amount to GDP)	128.9	128.8	128.1	127.6	125.9	124.2	125.1					

Financing of non-financial corporations grew at an unchanged annual rate (0.5%). Loan financing was reduced at a lower rate (-1.3% after -2.0%), as the decline in loans granted by both MFIs and non-MFIs slowed⁴. The issuance of debt securities grew at a broadly unchanged rate (7.1% after 7.2%). Trade credit financing decreased after increasing previously (-0.4% after 0.3%). The debt ratio, which for the first time includes trade credit (for the entire time series)⁵, decreased to 125.1% in the second quarter of 2014, from 128.1% in the second quarter of 2013. Equity financing grew at a lower rate (1.8% after 2.1%).

Financial investment continued to grow at a broadly unchanged rate (1.2% after 1.0%). Among the components, loans granted were reduced at a slower rate (-0.7% after -1.4%),

³ Net entrepreneurial income is broadly equivalent to current profits in business accounting (after the receipt and payment of interest and including the profits of foreign subsidiaries, but before the payment of income taxes and dividends).

⁴ Loan financing comprises loans granted by all sectors (including loans granted by non-MFI financial institutions) and by creditors that are not residents in the euro area.

⁵ The non-financial corporation debt ratio is defined here as the outstanding amount of loans, debt securities, trade credits and pension scheme liabilities as a percentage of GDP. The sum of household debt and non-financial corporation debt (also referred to as "private debt"), as a percentage of GDP is one of the headline indicators of the macroeconomic imbalance procedure (MIP). For non-financial corporations the definition of debt used by the MIP differs from the definition applied here as the MIP indicator is based on annual, consolidated (excluding debt financing within the NFC sector) data, moreover, pension fund reserve liabilities and trade credits are excluded. For the MIP data see: Annual scoreboard for the surveillance of macroeconomic imbalances.

and investment in shares and other equity grew slightly after decreasing previously (0.1% after -0.7%).

Total euro area economy

Euro area gross saving, which is the sum of the savings of households, corporations and government, decreased after increasing previously (-0.3% after 4.8%). The decrease in euro area savings was partially matched by the decrease in euro area gross fixed capital formation (-0.2% after 2.3%). As a result, euro area net lending to the rest of the world increased slightly to 2.6% of net disposable income. Euro area household net lending increased slightly as a percentage of euro area net disposable income (3.7% after 3.5%), while net lending by the financial and non-financial corporations sector and net borrowing by the government sector decreased.

Additional information

- Time series download: <u>ECB's Statistical Data Warehouse (SDW)</u>.
- Methodological information: <u>Euro area accounts</u>.
- Revisions: This press release incorporates revisions which are larger than usual due to the change-over to the new statistical standard (ESA 2010) and benchmark revisions of sources and methods. Moreover, estimates used by the ECB concern, in particular, data for periods before 2012Q4.
- An update of the data published in this press release is scheduled for 12 November 2014 and will be disseminated via the ECB's Statistical Data Warehouse. The next regular quarterly press release: by end-January 2015 (the date will be announced in the Statistical Release Calendar on the ECB website (calendar).

- 1) Households and non-profit institutions serving households.
- 2) Annual percentage changes are calculated as 100*(x(t)-x(t-4))/x(t-4) where x(t) stands for the transaction or end-of-quarter stock x in quarter t, and x(t-4) for the transaction or stock four quarters earlier.

- 3) Net adjustment for the change in net equity of households in pension schemes (receivable payable).
- 4) Changes in inventories, acquisitions less disposals of valuables and acquisitions less disposals of non-produced non-financial assets (e.g. land).

 5) Annual growth rates for financial transactions are calculated as 100*(f(t)+f(t-1)+f(t-2)+f(t-3))/F(t-4) where f(t) stands for the transactions in quarter t, and F(t-4) for the end-of-quarter stock value four quarters earlier.
- 6) Loans granted, prepayments of insurance premiums and reserves for outstanding claims and other accounts receivable.
- 7) Financial derivative's net liabilities, pension schemes and other accounts payable.
- 8) Household's non-financial assets and housing wealth data are based on ESA 95 data.
- 9) Debt is equal to loans received and presented as a percentage of gross domestic product (GDP).

¹⁾ Annual percentage changes are calculated as 100*(x(t)-x(t-4))/x(t-4) where x(t) stands for the transaction or end-of-quarter stock x in quarter t, and x(t-4) for the transaction

or stock four quarters earlier.

2) Changes in inventories, acquisitions less disposals of valuables and acquisitions less disposals of non-produced non-financial assets.

3) Annual growth rates for financial transactions are calculated as 100*(f(t)+f(t-1)+f(t-2)+f(t-3))/F(t-4) where f(t) stands for the transactions in quarter t, and F(t-4) for the end-of-quarter stock value four quarters earlier.

⁴⁾ In line with existing conventions, the financing of the government excludes the net incurrence of liabilities via financial derivatives, shares and other equity, pension schemes and other accounts payable, and the financial investment of the government excludes financial derivatives, prepayments of insurance premiums and reserves for outstanding claims and other accounts receivable.

⁵⁾ Other accounts receivable, financial derivatives and prepayments of insurance premiums and reserves for outstanding claims.

6) Other accounts payable, pension fund reserves, financial derivatives and unquoted shares and other equity.

⁷⁾ Data on general government debt for the euro area has not yet been published.

¹⁾ Annual percentage changes are calculated as 100*(x(t)-x(t-4))/x(t-4) where x(t) stands for the transaction or end-of-quarter stock x in quarter t, and x(t-4) for the transaction or stock four quarters earlier.

2) As a percentage of net value added in the case of net entrepreneurial income and net saving.

3) Changes in inventories, acquisitions less disposals of valuables and acquisitions less disposals of non-produced non-financial assets (e.g. land).

4) Annual growth rates for financial transactions are calculated as 100*(f(t)+f(t-1)+f(t-2))/F(t-4) where f(t) stands for the transactions in quarter t, and F(t-4) for the

end-of-quarter stock value four quarters earlier.

5) Monetary gold and SDRs, other accounts receivable, and prepayments of insurance premiums and reserves for outstanding claims.

6) Other accounts payable and financial derivative's net liabilities.
