

PRESS RELEASE

1 October 2015

Statistics on Euro Area Insurance Corporations and Pension Funds:

Second Quarter 2015

In the second quarter of 2015, the total financial assets of euro area insurance corporations and pension funds decreased to $\leq 9,077$ billion, from $\leq 9,461$ billion in the previous quarter. Over the same period, the amount outstanding of insurance technical reserves, which are the main liabilities of insurance corporations and pension funds, decreased to $\leq 7,464$ billion, from $\leq 7,653$ billion. This decrease was largely due to a decrease in value of corresponding assets.

Selected balance sheet items of insurance corporations and pension funds

(EUR billions; not seasonally adjusted; amounts outstanding at the end of the period; transactions during the period)

	Amounts outstanding					
	2014		2015	Amounts outstanding	Transactions ¹

prepayments of insurance premiums and reserves for outstanding claims	892	889	933	923	4	

¹ Transactions are available only for euro area insurance technical reserves.

² Insurance technical reserves contain the provisions against policyholders or beneficiaries set aside by insurers and pension funds to meet future obligations. This item also includes prepayments of insurance premiums, which are related to non-life insurance and to reinsurance, and reserves for outstanding claims, which are the amounts expected to be paid out in settlement of claims, including disputed claims.

PRESS RELEASE / 1 October 2015

Statistics on Euro Area Insurance Corporations and Pension Funds: Second Quarter 2015

Regarding the breakdown of the assets of the aggregated balance sheet of euro area insurance

corporations and pension funds, holdings of securities other than shares accounted for 40%

of the sector's total financial assets at end-June 2015. The second largest category of holdings

were investment fund shares, which contributed 28% to the total financial assets. Finally,

shares and other equity accounted for 11% of the total financial assets.

Turning to transactions in the main breakdowns of the insurance technical reserves, the net

equity of households in life insurance reserves increased by €19 billion in the second

quarter of 2015. The net equity of households in pension fund reserves decreased by €4

billion in the same quarter, while transactions in prepayments of insurance premiums and

reserves for outstanding claims increased by €4 billion.

Regarding the contributions of the two sub-sectors, insurance corporations' total financial

assets accounted for €6,908 billion at end-June 2015, representing 76% of the aggregated

balance sheet of the insurance corporations and pension funds sector, while the pension

funds' total financial assets amounted to €2,169 billion.

For media queries, please contact Andrea Zizola, tel.: +49 69 1344 6551.

Notes

Further predefined tables, statistical data and methodological notes, as well as the advance release calendar, are available

on the ECB's website at http://www.ecb.europa.eu/stats/money/icpf/html/index.en.html.

Note: Unit-linked insurance contracts do not guarantee a return to the policyholder, but rather offer a return which depends on the performance of the underlying portfolio.

In a defined-contribution pension scheme, the participant's contributions are determined in advance, but the level of pension payments is not. In a defined-benefit scheme, future pension payments are determined in advance, based, for example, on the wage history and years of service of a participant.

A hybrid scheme is a combination of the two previous types of pension scheme described above.
