

## PRESS RELEASE

## 28 October 2016

## Euro area economic and financial developments by institutional sector: 2nd Quarter 2016

- Euro area saving (net) increased while non-financial investments (net) was broadly unchanged in the second quarter of 2016. Non-financial investment (net) increased for households and non-financial corporations and decreased for financial corporations. As a result of changes in saving and non-financial investment, euro area net lending to the rest of the world increased further.
- Household debt continued to decrease, both with respect to GDP and disposable income (the respective ratios decreased to 58.9% and to 93.6% in the second quarter of 2016).
- The non-financial corporation debt-to-GDP ratio decreased to 133.4% compared to 135.2% in the second quarter of 2015. Gross non-financial investment increased at a higher rate (5.0% after 4.5% in the first quarter of 2016).

### Total euro area economy

Euro area net saving, that is the sum of the savings of households, corporations and the government sector after deducting the consumption of fixed capital, increased to 6.9% of euro area net disposable income in the second quarter of 2016, compared with 6.1% in the second quarter of 2015. Euro area net non-financial investment was broadly unchanged at 2.9% of net disposable income. As a result, euro area net lending to the rest of the world increased compared with the second quarter of 2015 (4.2% after 3.3% of net disposable income). Net lending by households as percentage of euro area net disposable income decreased (3.2% after 3.4%) while net lending of non-financial corporations increased (2.5% after 2.0%). Net lending by the financial corporations sector and net borrowing by the government sector decreased compared with the second quarter of 2015. (For details, see also Table 1 in the Annex).

#### Households

Household gross disposable income increased at a broadly unchanged annual rate of 2.6% in the second quarter of 2016. Gross operating surplus and mixed income from the self-employed increased at a higher rate (second quarter 2016: 3.4%, first quarter: 2.5%), while the compensation of employees grew at a lower rate (2.7% after 3.0%). Household consumption expenditure increased at a broadly unchanged rate of 2.2%.

The household gross saving rate in the second quarter of 2016 was 12.5%, unchanged from a year ago.

Household gross non-financial investment (which refers mainly to housing) grew at a higher rate (6.1% after 3.1%). Loans to households, the main component of household financing, increased at a higher rate (1.9% after 1.6%) as well.

Household financial investment grew at a higher rate of 2.3% (after 1.9% in the previous quarter). Among the components, currency and deposits grew at a higher rate (3.3% after 3.0%), as did life insurance and pension schemes (3.0% after 2.8%). Shares and other equity grew at a broadly unchanged rate (2.2%). Households continued to buy investment fund shares as well as shares and other equity on a net basis. In particular households bought non-money market fund investment funds, and listed shares issued by non-residents. While the decline of debt securities decelerated (-11.0% after -12.0%), redemptions and sales continued to exceed purchases. This development is in particular due to a reduction of household holdings of debt securities issued by MFIs and the government sector.

Household net worth increased at a higher rate (3.3% after 2.2%), as accelerated financial and non-financial investments and net valuation gains on financial and non-financial assets were only partly offset by the accelerated incurrence of liabilities. The value of housing wealth increased at a higher rate (4.0% after 3.7%). The household debt-to-income ratio decreased to 93.6% in the second quarter of 2016 from 94.3% in the second quarter of 2015, as disposable income grew faster than loans to households.

Table A summarises the main results for households, expressed as a percentage of adjusted disposable income. (For details, see also Tables 2.1 and 2.2 in the Annex).

## **Non-financial corporations**

Non-financial corporations' net entrepreneurial income (broadly equivalent to current profits) increased in the second quarter of 2016 after decreasing in the previous quarter (4.8% after -5.0%) as net operating surplus and net property income increased.

Net value added increased at a higher rate (4.3% after 3.3%). Gross non-financial investment and gross fixed capital formation accelerated as well (5.0% after 4.5%, and 5.3% after 4.7%). Financing of non-financial corporations grew at a broadly unchanged rate (2.2%), similar to loan financing (2.1%). Loans received from MFIs as well as loans received from non-MFIs grew at broadly unchanged rates. The issuance of debt securities grew at a higher rate (6.0% after 3.5%), while trade credit financing decelerated (1.9% after 2.5%). Non-money market fund investment funds, non-residents and insurance corporations were the main net purchasers of non-financial corporation debt securities. Equity financing grew at an unchanged rate (2.2%).

The debt-to-GDP ratio decreased to 133.4% compared to 135.2% in the second quarter of 2015.

Financial investment grew at a higher rate (4.0% after 3.8% in the previous quarter). Among the components, loans granted grew at a lower rate (2.9% after 3.3%). Investment in shares and other equity accelerated (3.8% after 3.4%). Table B summarises the main results for non-financial corporations, expressed as a percentage of net value added. (For details, see also Tables 3.1 and 3.2 in the Annex).

European Central Bank Directorate General Communications

<sup>&</sup>lt;sup>1</sup> Loan financing comprises loans granted by all sectors (including loans granted by non-MFI financial institutions) and by creditors that are not residents in the euro area.

These data come from the second release of quarterly euro area sector accounts from the European Central Bank (ECB) and Eurostat, the statistical office of the European Union.

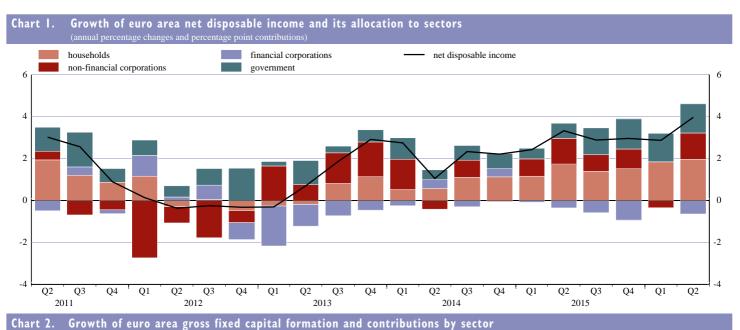

This press release incorporates revisions and completed data for all sectors compared with the first quarterly release on "Euro area households and non-financial corporations" of 11 October. Quarterly financial and non-financial accounts by institutional sector are available for the euro area as well as for EU countries at the ECB's Statistical Data Warehouse (SDW). The annex tables and additional charts, as well as related information for all EU countries, are available under Euro area accounts in the statistics section of the ECB's website, including new tables on 'who-to-whom' relationships. The next release of the new Household Sector Report containing results for the euro area and all euro area countries is scheduled for 15 November 2016. The next quarterly press release, with advanced results for households and non-financial corporations, is scheduled for 13 January 2017 (see also the Statistical Release Calendar on the ECB website: calendar).

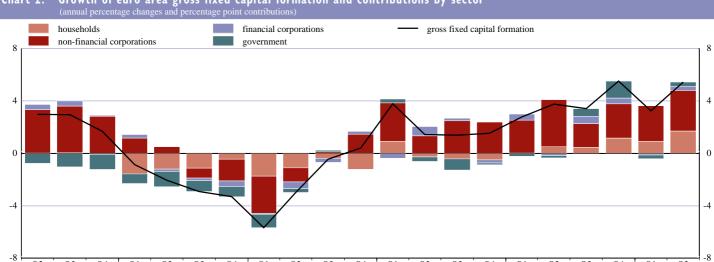

For media queries, please contact Stefan Ruhkamp, tel.: +49 69 1344 5057.

#### Notes:

- The annual growth rate of non-financial transactions and of outstanding assets and liabilities (stocks) is calculated as the percentage change between the value for a given quarter and that value recorded four quarters earlier. The annual growth rates used for financial transactions refer to the total value of transactions during the year in relation to the outstanding stock a year before. Ratios, such as the saving rate, are based on four-quarter cumulated transactions.
- Net entrepreneurial income is broadly equivalent to current profits in business accounting (after the receipt and payment of interest and including the profits of foreign subsidiaries, but before the payment of income taxes and dividends).
- The sum of household debt and non-financial corporation debt (also referred to as "private debt") as a percentage of GDP is one of the headline indicators of the macroeconomic imbalance procedure (MIP). For non-financial corporations, the definition of debt used by the MIP differs from the definition applied here, as the MIP indicator is based on annual, consolidated data; moreover, pension fund reserve liabilities and trade credits are excluded. For the MIP data see: <a href="mailto:Annual scoreboard for the surveillance of macroeconomic imbalances">Annual scoreboard for the surveillance of macroeconomic imbalances</a>.
- Further methodological information is available at: <u>Euro area accounts</u>.

1) Annual percentage changes are calculated as 100\*(x(t)-x(t-4))/x(t-4) where x(t) stands for the transaction x in quarter t, and x(t-4) for the transaction four quarters earlier.

2) Households and non-profit institutions serving households.

3) Transfers of goods and services by government units and non-profit institutions serving households (NPISHs) to individual households.

4) Changes in inventories, acquisitions less disposals of valuables and acquisitions less disposals of non-produced non-financial assets (e.g. land).

- 1) Households and non-profit institutions serving households.
  2) Calculated as 100\*(x(t)-x(t-4))/x(t-4) where x(t) stands for the transaction or end-of-quarter stock x in quarter t, and x(t-4) for the transaction or stock four quarters earlier.

- 3) Net adjustment for the change in net equity of households in pension schemes (receivable payable).
  4) Changes in inventories, acquisitions less disposals of valuables and acquisitions less disposals of non-produced non-financial assets (e.g. land).
  5) Annual growth rates for financial transactions are calculated as 100\*(f(t)+f(t-1)+f(t-2)+f(t-3))/F(t-4) where f(t) stands for the transactions in quarter t, and F(t-4) for the end-of-quarter stock value four quarters earlier.
- 6) Loans granted, prepayments of insurance premiums and reserves for outstanding claims and other accounts receivable.
- 7) Financial derivative's net liabilities, pension schemes and other accounts payable.
- 8) Debt is equal to loans received and presented as a percentage of gross domestic product (GDP).

<sup>1)</sup> Annual growth rates for financial transactions are calculated as 100\*(f(t)+f(t-1)+f(t-2)+f(t-3))/F(t-4) where f(t) stands for the transactions in quarter t, and F(t-4) for the end-of-quarter stock value four quarters earlier.

2) Calculated as 100\*(x(t)-x(t-4))/x(t-4) where x(t) stands for the transaction or end-of-quarter stock x in quarter t, and x(t-4) for the transaction or stock four quarters earlier.

<sup>1)</sup> Annual percentage changes are calculated as 100\*(x(t)-x(t-4))/x(t-4) where x(t) stands for the transaction or end-of-quarter stock x in quarter t, and x(t-4) for the transaction

or stock four quarters earlier.

2) Changes in inventories, acquisitions less disposals of valuables and acquisitions less disposals of non-produced non-financial assets.

3) Annual growth rates for financial transactions are calculated as 100\*(f(t)+f(t-1)+f(t-2)+f(t-3))/F(t-4) where f(t) stands for the transactions in quarter t, and F(t-4) for the end-of-quarter stock value four quarters earlier.

<sup>4)</sup> In line with existing conventions, the financial investment of the government excludes financial derivatives, prepayments of insurance premiums and reserves for outstanding claims and other accounts receivable, and the financing of the government excludes the net incurrence of liabilities via financial derivatives, shares and other equity, pension schemes and other accounts payable.

5) Other accounts receivable, financial derivatives and prepayments of insurance premiums and reserves for outstanding claims.

6) Other accounts payable, pension fund reserves, financial derivatives and unlisted shares and other equity.

<sup>1)</sup> Annual percentage changes are calculated as 100\*(x(t)-x(t-4))/x(t-4) where x(t) stands for the transaction or end-of-quarter stock x in quarter t, and x(t-4) for the transaction or stock four quarters earlier.

2) As a percentage of net value added in the case of net entrepreneurial income and net saving.

3) Changes in inventories, acquisitions less disposals of valuables and acquisitions less disposals of non-produced non-financial assets (e.g. land).

<sup>4)</sup> Annual growth rates for financial transactions are calculated as 100\*(f(t)+f(t-1)+f(t-2)+f(t-3))/F(t-4) where f(t) stands for the transactions in quarter t, and F(t-4) for the end-of-quarter stock value four quarters earlier.

5) Monetary gold and SDRs, other accounts receivable, and prepayments of insurance premiums and reserves for outstanding claims.

6) Monetary gold and SDRs, other accounts payable and financial derivative's net liabilities.
