

EUROPEAN CENTRAL BANK

EUROSISTEM

PRESS RELEASE

17 February 2017

Euro area monthly balance of payments (December 2016)

- In December 2016 the current account of the euro area recorded a surplus of €31.0 billion.¹
- In the financial account, combined direct and portfolio investment recorded net acquisitions of assets of €22 billion and net reductions of liabilities of €101 billion.

Chart 1: Balance of payments of the euro area: 12-month cumulated transactions
(as a percentage of GDP)

¹ References to the current account are always to data that are seasonally and working day-adjusted, unless otherwise indicated, whereas references to the capital and financial accounts are to data that are neither seasonally nor working day-adjusted.

Current account

The *current account* of the euro area recorded a surplus of €31.0 billion in December 2016 (see Table 1). This reflected surpluses for *goods* (€31.7 billion), *primary income* (€5.3 billion) and *services* (€4.6 billion), which were partly offset by a deficit for *secondary income* (€10.6 billion).

According to the preliminary results for 2016 as a whole, the current account recorded a surplus of €364.7 billion (3.4% of euro area GDP), compared with one of €319.3 billion (3.1% of euro area GDP) in 2015 (see Table 1 and Chart 1). All the components of the current account increased. There were increases in the surpluses for *goods* (from €348.2 billion to €372.2 billion), *services* (from €58.9 billion to €69.1 billion) and *primary income* (from €42.1 billion to €52.4 billion), as well as a slight decrease in the deficit for *secondary income* (from €129.9 billion to €129.0 billion).

Financial account

In December 2016 *combined direct and portfolio investment* recorded net acquisitions of assets of €22 billion and net decreases of liabilities of €101 billion (see Table 2).

Euro area residents recorded net acquisitions of €7 billion of *direct investment* assets as a result of net acquisitions of *equity* (€32 billion) that were partly offset by net disposals of *debt instruments* (€25 billion). *Direct investment* liabilities decreased by €45 billion as a result of net disinvestment in both euro area *equity* (€17 billion) and *debt instruments* (€28 billion) by non-euro area residents.

As regards *portfolio investment* assets, euro area residents made net acquisitions of foreign securities amounting to €14 billion. This resulted from net purchases of *equity* (€2 billion) and *debt securities* (€12 billion), specifically net purchases of *short-term debt securities* (€20 billion) that were partly offset by net sales of *long-term debt securities* (€8 billion). Non-euro area residents recorded net disposals of euro area *portfolio investment* liabilities of €55 billion. This was the result of net sales/amortisations of euro area *short-term* (€27 billion) and *long-term* (€40 billion) *debt securities*, which were partly offset by non-euro area residents' net acquisitions of euro area *equity* (€11 billion).

The euro area net *financial derivatives* account (assets minus liabilities) recorded positive net flows of €6 billion.

Other investment recorded net disposals of €217 billion in assets and €227 billion in liabilities. The net disposal of foreign assets by euro area residents is mainly attributable to net disposals by the *MFI sector (excluding the Eurosystem)* (€192 billion) and *other sectors* (€33 billion), which were partly offset by net acquisitions of the *Eurosystem* (€8 billion). Similarly, the net decrease in liabilities is explained by net disposals of the *MFI sector (excluding the Eurosystem)* (€280 billion) and *other sectors* (€21 billion). The *general government* also decreased its liabilities by €7 billion. These were offset to a limited extent by net incurrences of liabilities of the *Eurosystem* (€80 billion).

In 2016 as a whole, *combined direct and portfolio investment* recorded net increases of €669 billion in assets and net decreases of €52 billion in liabilities, compared with net increases of €1,225 billion and €875 billion respectively in 2015. This resulted from a significant decrease in the *direct investment* activity of both euro area residents abroad and non-residents in the euro area, with the net acquisition of assets decreasing from €820 billion to €292 billion and the net incurrence of liabilities from €577 billion to €14 billion.

The most significant development in *portfolio investment* was a shift on the liability side from net acquisitions of euro area *debt securities* by non-euro area residents of €30 billion to net sales/amortisations of €192 billion.

According to the monetary presentation of the balance of payments, the [net external assets](#) of euro area MFIs decreased by €209 billion in 2016, compared with a decrease of €49 billion in 2015. This reflected an increase in the surplus in the *current and capital account* balance (from €304 billion to €364 billion), which was offset by net financial transactions by non-MFIs. In particular, the cumulated transactions in *portfolio investment* liabilities issued by non-MFI euro area residents showed a shift from net purchases of *debt securities* by non-euro area investors (€92 billion) to net sales/amortisations (€128 billion).

In December 2016 the *Eurosystem's* stock of *reserve assets* increased by €1.1 billion to €707.7 billion (see Table 3). This can be explained by net acquisitions of *reserve assets* (€6.1 billion) and positive exchange rate developments (€0.9 billion), which were partly offset by negative price revaluations (€6.0 billion), particularly of monetary gold.

Data revisions

This press release incorporates revisions for October and November 2016. These revisions have not significantly altered the figures previously published.

Additional information

- Time series data: [ECB's Statistical Data Warehouse \(SDW\)](#)
