[Data for main assets of euro area pension funds](#)

In terms of the main liabilities, total [pension entitlements](#) of pension funds amounted to €2,708 billion in the second quarter of 2020, up from €2,608 billion in the first quarter of 2020. Defined benefit pension schemes amounted to €2,251 billion, accounting for 83.1% of total pension entitlements. Defined contribution pension schemes totalled €458 billion, accounting for 16.9% of total pension entitlements in the second quarter of 2020. Net purchases of defined benefit schemes amounted to €22 billion in the second quarter of 2020, while those of defined contribution schemes came to €7 billion. Price and other changes of total pension entitlements amounted to €71 billion.

The pension fund sector is highly concentrated in the euro area, with funds in Germany and Netherlands accounting for more than 80% of the total assets. The total assets of euro area pension

funds are equivalent to roughly one-quarter of euro area GDP. However, total assets of pension funds resident in the Netherlands represent approximately 200% of national GDP, while in some other countries, such as France, no institution currently meets the criteria to be classified as a pension fund under the European System of Accounts (ESA 2010). This contrast mirrors among others differences in countries' pension systems. In France, private pension schemes are at present channelled predominantly through insurance corporations, while in the Netherlands occupational pension schemes play a prominent role in the pension system.
