Chart 3
Monetary presentation of the balance of payments

(EUR billions; 12-month cumulated data)

Source: ECB.

Notes: MFI *net external assets* (enhanced) incorporates an adjustment to the MFI net external assets (as reported in the consolidated MFI balance sheet items statistics) based on information on MFI long-term liabilities held by non-residents, available in b.o.p. statistics. B.o.p. transactions refer only to transactions of non-MFI residents of the euro area. Financial transactions are shown as liabilities net of assets. "Other" includes *financial derivatives*, *other investment* and statistical discrepancies.

The monetary presentation of the balance of payments (see Chart 3) shows that the *net external assets* (enhanced) of euro area MFIs increased by €371 billion in the 12-month period to February 2020. This increase was mainly driven by *current and capital account* surpluses and, to a lesser extent, by euro area non-MFIs' net inflows in *portfolio investment equity*. This increase was partly offset by euro area non-MFIs' net outflows in *portfolio investment debt securities*.

In February 2020 the Eurosystem's stock of *reserve assets* increased to €864.7 billion, up from €846.8 billion in the previous month (see Table 3). This increase was largely driven by positive price changes (€17.5 billion) and, to a lesser extent, by positive exchange rate changes (€1.5 billion). These developments were partly offset by net sales of assets (€1.1 billion).
