Increase of the cash collateral limit in securities lending

On 15 November 2021 the Governing Council decided to increase the limit for asset purchase programme (APP) and pandemic emergency programme (PEPP) securities lending against cash collateral to €150 billion, doubling the €75 billion limit that had been in place since March 2018. This modification reflects, among other things, the increase in the stock of assets that have been acquired under the APP/PEPP over time. Related information is updated accordingly on [the securities lending pages of the ECB's website](#).

This makes these agencies eligible for the [public sector purchase programme](#). Both [lists](#) are available on the ECB's website.

Revision of Eurosystem and SSM Ethics Guidelines

On 2 November 2021 the Governing Council adopted Guideline [ECB/2021/49](#) laying down the principles of the Eurosystem Ethics Framework (recast) and, upon a proposal from the Supervisory Board, Guideline [ECB/2021/50](#) laying down the principles of the Ethics Framework for the Single Supervisory Mechanism (recast). The [Eurosystem](#) & [SSM](#) Ethics Guidelines were originally adopted by the Governing Council in 2015 with a view to establishing common minimum ethics standards to be implemented by euro area central banks and national competent authorities in their internal rules. The revision of the Eurosystem and SSM Ethics Guidelines was necessary because of the dynamic nature of integrity and good governance standards, and increasing levels of public scrutiny; its purpose was to adjust the ethics frameworks to reflect best practices so that the frameworks continue to reflect state-of-the-art standards. The Ethics and Compliance Officers Task Force has undertaken the revision exercise over the past year as part of a regular review involving all euro area central banks and national competent authorities. The amendments mainly concern the provisions on private financial transactions, which have been made more concrete and relevant while, at the same time, their implementation and adherence has been simplified. In addition, pre-employment and post-employment provisions have been strengthened with a view to addressing conflicts of interest more effectively.

Creation of an Ethics and Compliance Conference

focus on supporting and advising all member institutions on the coherent implementation and regular review of the Eurosystem/SSM Ethics Guidelines. The Governing Council felt the change would better reflect the permanence of the group, its span over the entire Eurosystem/SSM and the increasing relevance of ethics and compliance matters more generally. The ECC, in its standard composition, comprises the Chief Ethics and Compliance Officers of the Eurosystem central banks and national competent authorities (NCAs) of EU Member States participating in the SSM. Non-euro area EU central banks and NCAs of EU Member States not participating in the SSM could be invited to participate in the ECC's work, as appropriate, with a view to contributing to the system's integration and fostering high standards of professional ethics and integrity beyond the Eurosystem/SSM.

Developments related to the Integrated Reporting Framework

On 7 December 2021 the Governing Council approved the publication of the first results from the Integrated Reporting Framework (IReF) cost-benefit assessment and related documents, and decided to launch the design phase of the project. This harmonised statistical reporting system is intended to make it easier for banks to report statistical data to the European System of Central Banks (ESCB) and to reduce their reporting burden by leveraging digitalisation and state-of-the-art production practices. The system will also facilitate policymakers' analysis and comparison of the relevant data. The IReF will ensure there is a common understanding of statistical terms and it will standardise the information that banks are required to provide to their respective central banks. It represents the ESCB's contribution to European institutional efforts to integrate statistical, prudential and resolution reporting. Non-euro area EU Member States may decide to adopt IReF reporting through national legislation, in full or in part. Subject to the Governing Council's adopting the IReF Regulation in 2024, the framework is expected to go live in 2027. This time frame will give reporting agents and the Eurosystem enough lead time to prepare the necessary legal and technical framework. A related [press release](#) is available on the ECB's website.
