The European Central Bank (ECB) has today published the consolidated banking data with reference to end-June 2021, a dataset of the EU banking system compiled on a group consolidated basis.

The quarterly data cover information required for the analysis of the EU banking sector, comprising a subset of the information that is available in the year-end dataset. The end-June 2021 data refer to 327 [banking groups](#) and 2,537 [stand-alone credit institutions](#) operating in the EU (including foreign subsidiaries and branches), covering nearly 100% of the EU banking sector balance sheet. This dataset includes an extensive range of indicators on profitability and efficiency, balance sheets, liquidity and funding, asset quality, asset encumbrance, capital adequacy and solvency. Aggregates and indicators are published for the full sample of the banking industry.

Reporters generally apply International Financial Reporting Standards and the Implementing Technical Standards on supervisory reporting of the European Banking Authority. However some medium-sized and small reporters may apply national accounting standards. Accordingly, aggregates and indicators may also cover data based on national accounting standards, depending on the availability of the underlying items.

A few revisions to past data are disclosed together with the end-June 2021 data.
