This increase was mainly driven by a switch in the *services* balance from a deficit of €41 billion to a surplus of €88 billion and also by larger surpluses for *goods* (up from €322 billion to €350 billion) and *primary income* (up from €38 billion to €53 billion). These developments were partly offset by a larger deficit for *secondary income* (up from €147 billion to €170 billion).

Chart 3

Monetary presentation of the balance of payments

(EUR billions; 12-month cumulated data)

Source: ECB.

Notes: "MFI net external assets (enhanced)" incorporates an adjustment to the MFI net external assets (as reported in the consolidated MFI balance sheet items statistics) based on information on MFI long-term liabilities held by non-residents, available in b.o.p. statistics. B.o.p. transactions refer only to transactions of non-MFI residents of the euro area. Financial transactions are shown as liabilities net of assets. "Other" includes *financial derivatives* and statistical discrepancies.

The monetary presentation of the balance of payments (Chart 3) shows that the *net external assets (enhanced)* of euro area MFIs decreased by €186 billion in the 12-month period to September 2021. This decrease was mainly driven by euro area non-MFIs' net outflows in *portfolio investment debt* and, to a lesser extent, in *portfolio investment equity* and *direct investment*. These developments were partly offset by the *current and capital accounts* surplus and by euro area non-MFIs' net inflows in *other investment* and *other* flows.

In September 2021 the Eurosystem's stock of *reserve assets* decreased to €1,002.4 billion, down from €1,009.4 billion in the previous month (Table 3). This decrease was mainly driven by negative price changes (€15.1 billion), which were only partly offset by positive exchange rate changes (€6.7 billion) and net acquisitions of assets (€1.5 billion).
