[Data for the current account of the euro area](#)

In 2020 the *current account* recorded a surplus of €248 billion (2.2% of euro area GDP), compared with a surplus of €281 billion (2.3% of euro area GDP) in 2019. This decline was driven by reductions in the surpluses for *services* (down from €59 billion to €36 billion) and *primary income* (down from €45 billion to €28 billion), but also by a larger deficit for *secondary income* (up from €152 billion to €159 billion). These developments were partly offset by a larger surplus for *goods* (up from €328 billion to €343 billion).

Chart 2
Selected items of the euro area financial account

(EUR billions; 12-month cumulated data)

Source: ECB.

Notes: For assets, a positive (negative) number indicates net purchases (sales) of non-euro area instruments by euro area investors. For liabilities, a positive (negative) number indicates net sales (purchases) of euro area instruments by non-euro area investors.

In *direct investment*, euro area residents made net investments of €46 billion in non-euro area assets in 2020, following net investments of €25 billion in 2019 (see Chart 2 and Table 2). Non-residents made net investments in euro area assets of €166 billion in 2020, after net investments of €97 billion in 2019.

In *portfolio investment*, net purchases of foreign *debt securities* by euro area residents increased to €436 billion in 2020, from €367 billion in 2019. Similarly, net purchases of foreign *equity* increased to €207 billion, from €69 billion in 2019. Over the same period, non-residents' net purchases of euro area *debt securities* decreased to €47 billion from €227 billion in 2019. Likewise, non-residents' net purchases of euro area *equity* decreased to €117 billion from €256 billion in 2019.

In *other investment*, euro area residents' net acquisitions of foreign assets increased to €381 billion in 2020 from €239 billion in 2019, while their net incurrence of liabilities was €466 billion (following net disposals of €93 billion in 2019).

Chart 3
Monetary presentation of the balance of payments

(EUR billions; 12-month cumulated data)

Source: ECB.

Notes: MFI net external assets (enhanced) incorporates an adjustment to MFI net external assets (as reported in the consolidated MFI balance sheet items statistics) based on information on MFI long-term liabilities held by non-residents, available in balance of payments (b.o.p.) statistics. B.o.p. transactions refer only to transactions of non-MFI residents of the euro area. Financial transactions are shown as liabilities net of assets. "Other" includes *financial derivatives* and statistical discrepancies.

The monetary presentation of the balance of payments (see Chart 3) shows that *the net external assets (enhanced)* of euro area MFIs increased by €16 billion in 2020. This increase was driven by the *current and capital accounts* surplus, euro area non-MFIs' net inflows in *direct investment* and, to a lesser extent, euro area non-MFIs' net inflows in *other flows*. These developments were partly offset by euro area non-MFIs' net outflows in *portfolio investment (equity and debt securities)* and in *other investment*.

In December 2020 the Eurosystem's stock of *reserve assets* increased to €878.7 billion, from €859.4 billion in the previous month (see Table 3). This increase was mostly driven by positive gold price changes (€23.0 billion) and, to a lesser extent, by net acquisitions of assets (€1.7 billion). The increase was only partly offset by negative exchange rate changes (€5.2 billion).
