Notes and definitions

(1) The RWA calculated according to CRD III can be based on models that have not yet been approved by the National Supervisory Authority.

(2) All IRB/AMA banks in the exercise have applied transitional floor which assess the impact 80% of the Basel 1 requirements. However, wide divergences in national approaches to the floors means that two main approaches have been identified as set out in the methodological note. The transitional floor has been applied according to the following approach:
