# Policy Panel on: New Advances of Research on Labor Markets

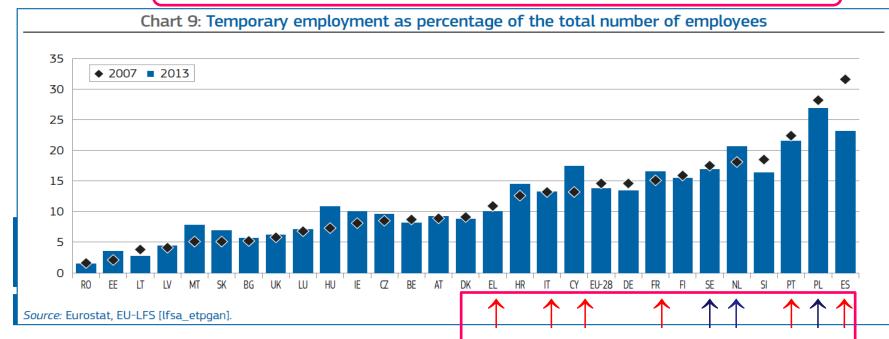

4<sup>th</sup> WB-BE Research Conference: Growth, Productivity and Inequality
June 13-14, 2016

Juan J. Dolado (EUI)

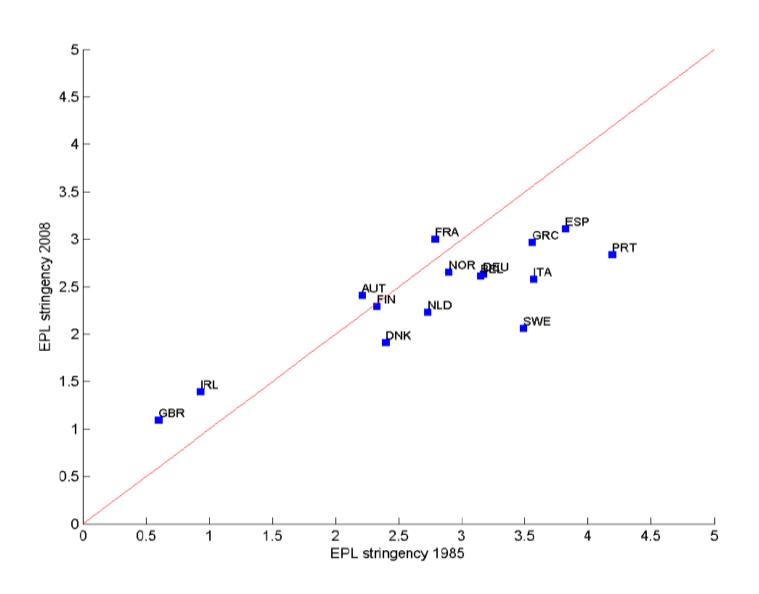

http://dolado.blogspot.com

# Dual LMs have been high in the policy agenda during GR

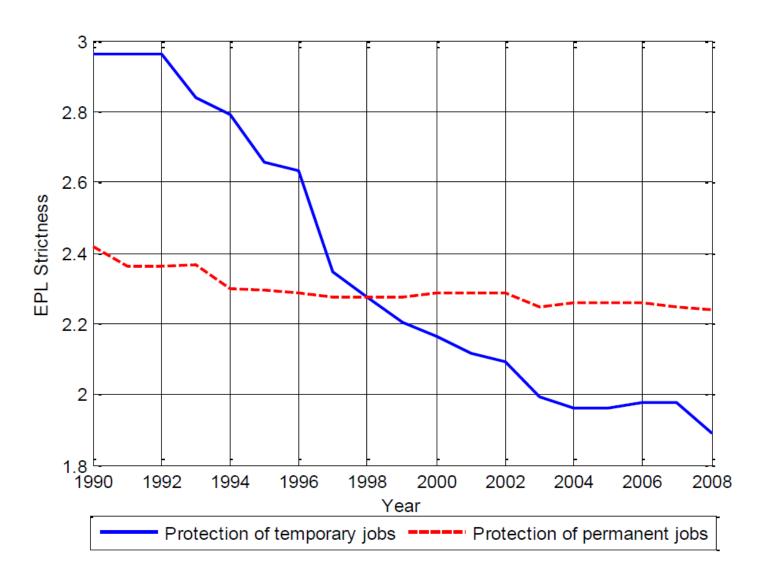

# Pre-crisis: Reduction of stringency in *overall* EPL

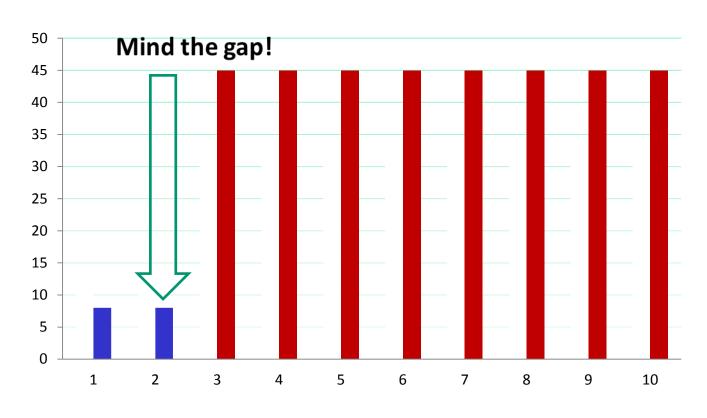

# ... mostly through increasing EPL gap

Source: OECD (2008)

#### Spain as an epitome of a dual LM (pre-crisis)

**EPL Gap between perms & temps** 

Tenure (years)

**EPL** gap= Sev. Pay (PC) + Red Tape Costs - Sev. Pay (TC)

# **Alternative strategies**

- (PC) Hire 1 worker for 5 years under PC and then fire
- (TC) Hire 5 workers 1 year each under PC

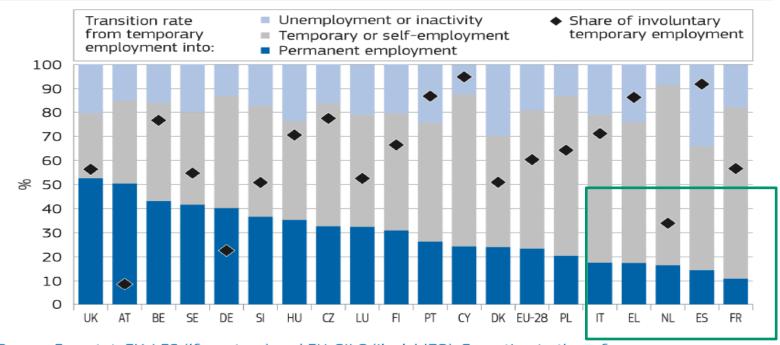

**EPL** gap= 8.1 monthly wages

NB: If wages were deferrable (and workers were risk neutral) they could offset the transfer from employer to employee (steeper wage-tenure)

Otherwise.... ⇒ Revolving door !!

#### Revolving door: wasteful turnover !!

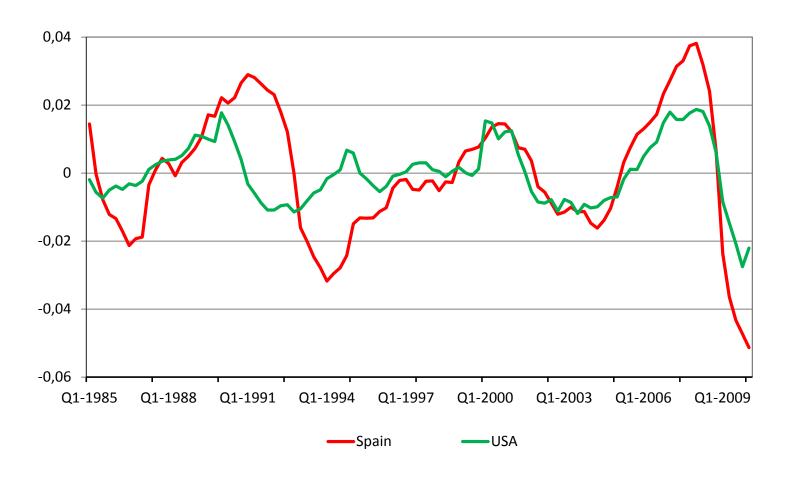

*Source:* Eurostat, EU-LFS (Ifsa\_etgar) and EU-SILC (ilc\_lvhl32). Exception to the reference year: Sweden (2010/2011 instead of 2011/2012).

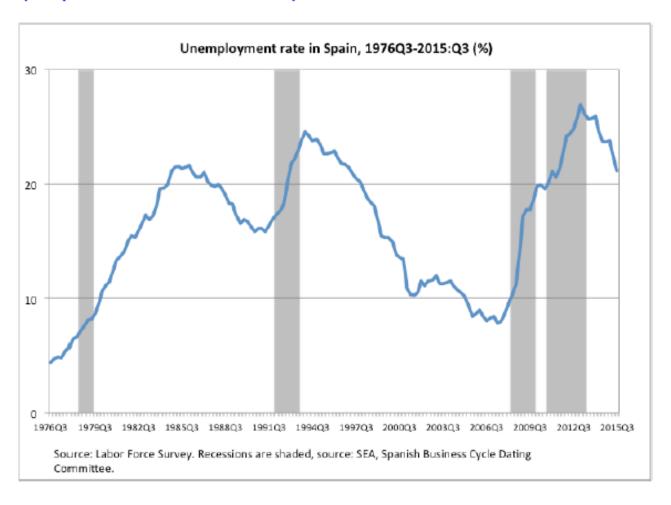

#### Dilemma: LM flexibility or rigidity ? → Both in excess

#### Volatility of HP-Cyclical Employment: Spain vs. US

# Spanish bulimia: Huge JC followed by huge JD

#### Unemployment: A structural problem

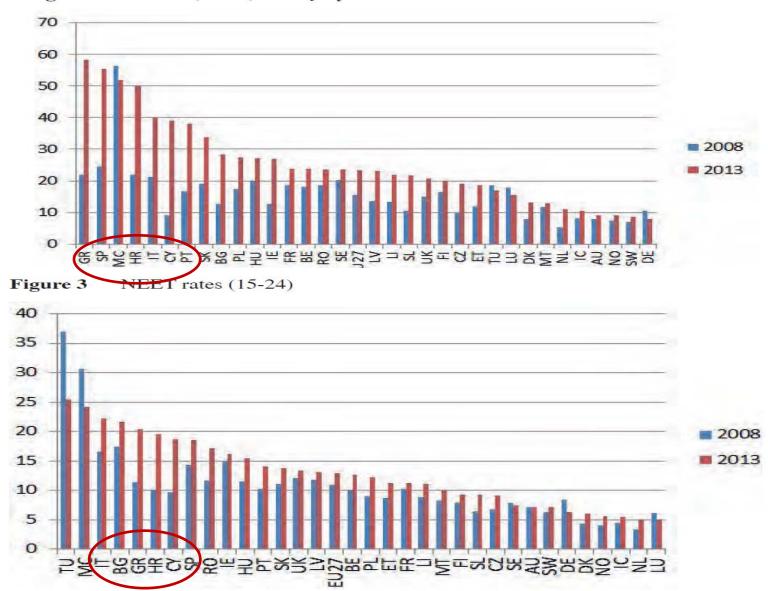

# **Consequences of dualism**

- ➤ Low Training in TC
- > Low future pensions of youth employed in precarious jobs
- > Scarring effects s of youth unemployment
  - Low lifetime wages
  - Low future employment opportunities
  - Low fertility
  - Low mobility

#### **Youth unemployment & NEETs**

**Figure 1** Youth (15-24) unemployment rates

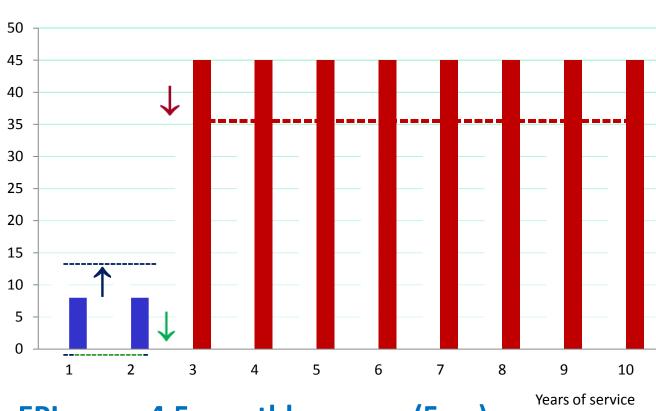

# **Redressing LM Dualism: Recent EPL reforms**

# **EPL gap (Spain post GR)**

EPL Gap between **perms & temps** 

**EPL** gap= 4.5 monthly wages (5yrs)

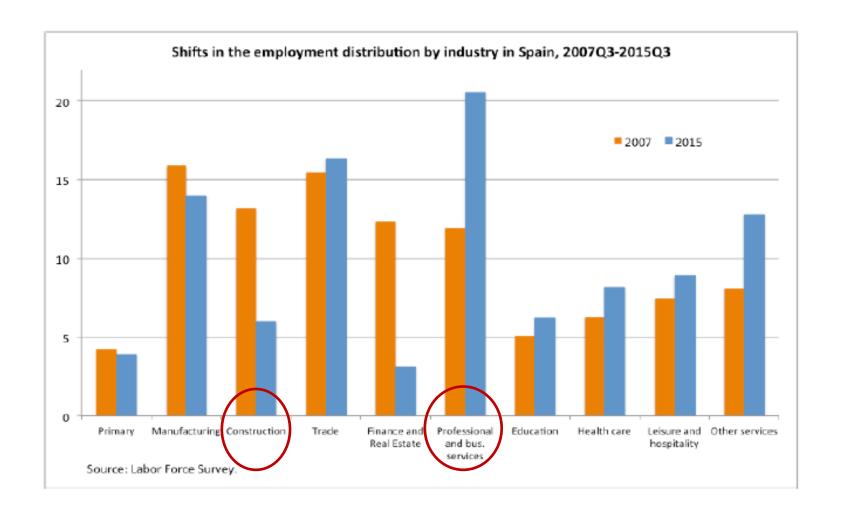

# **Dismantling Dual EPL**

- Strengthening TC regulations w/o changes in EPL (PC)/
   Reducing overly restrictive EPL (PC) w/o changes in EPL (TC)
- Long entry phases (stepping stone)
- Single/ unified open- ended contract (SOEC):

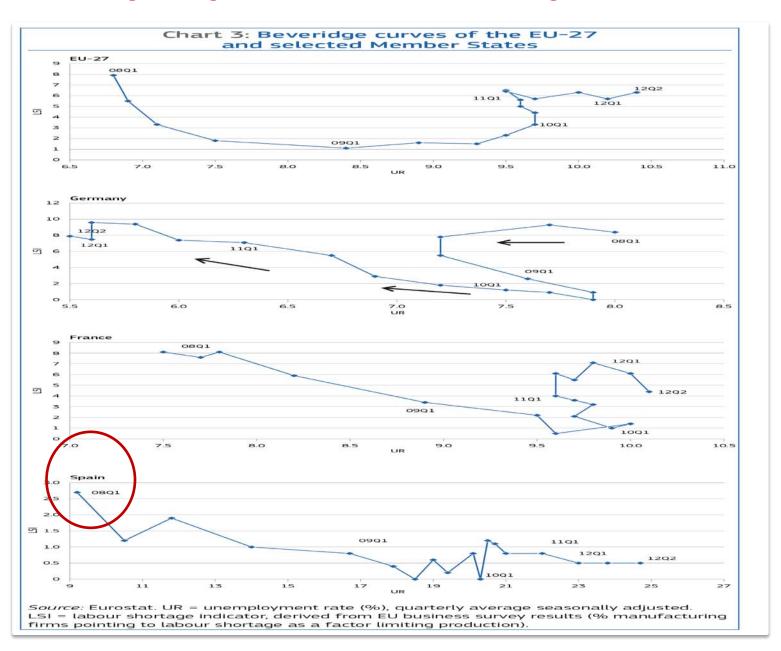

Andres et al. (2009), Cahuc & Kramarz (2005), Boeri & Garibaldi (2008), Bentolila & Jansen (2010), (P) Ichino (2014), Conde-Ruiz et al. (2011), Cahuc (2012), Boeri et al. (2013), Dolado (2015), Jobs Act, etc.]

# **Pending research issues**

# > Technology choices in dual LM and relocation shocks

#### Long-lasting effects on Mismatch: Beveridge curve

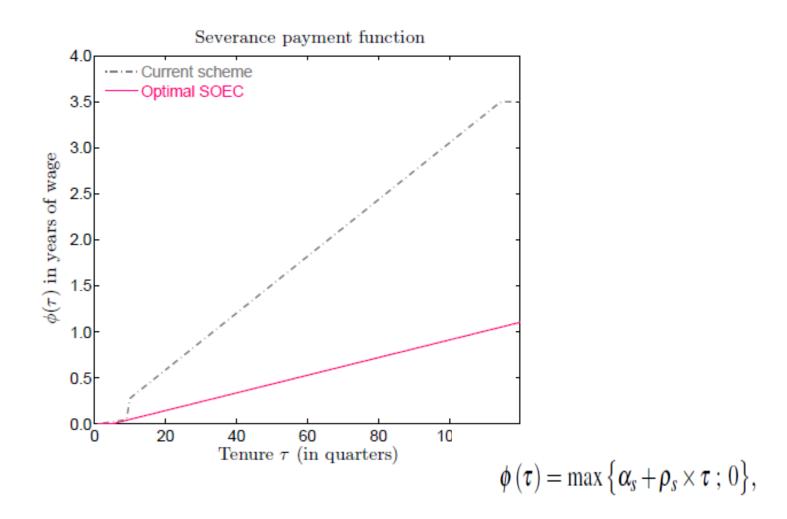

➤ Collective Bargaining decentralization → Higher wage flexibility

(Lazear's offsetting transfer effect?)

Can we observe an increasing in temp-to-perm conversion rate for those workers close to minimum wages?

# > Specificities in the design of Unified Contract

Dolado, Lale & Siassi (2016): Risk aversion+ Young (liquidity constraints) & Older workers (annuities) + UI financed by payroll taxes

# Decomposition of welfare gains

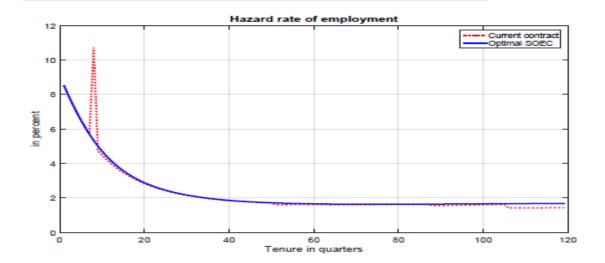

Table 3. Steady-state comparisons of various SOEC
