

24-28 October

Aim and content

The aim of the course is to help enable participants to address the new challenges in financial stability analysis and monitoring, adopting an essentially analytical approach.

Professional profile of attendees

It is targeted at professionals from central banks and banking regulators that are CEMLA (Center for Latin American Monetary Studies) or ASBA (Association of Supervisors of Banks of the Americas) members, with experience in macroprudential supervision and in the monitoring and analysis of financial stability.

Organisation and format

Given the current situation resulting from the global spread of COVID-19, both our internal guidelines and government recommendations advise that no international face-to-face meetings be held unless it is absolutely essential. In consequence, the course will again be held online this year.

The course is organised jointly by CEMLA and the Banco de España, and is intended to feature among the permanent annual array of training courses offered by both institutions.

The course will be held in morning or afternoon sessions, owing to the time difference. It will bring together experts and managers from the Banco de España's Directorate General Financial Stability, Regulation and Resolution, with a distinguished group of experts from CEMLA and from other international agencies.

Participation is by invitation only.
