Overall Status Description

Very Dieke Ctatus Description

Adaptation is on track. Activities related to the participation of Iberclear in T2S as SME CSD from the beginning are being performed successfully, and also Iberclear could be in a position to initiate bilateral interoperability testing ahead of the communicated starting date (30/03/2015). No significant issues derived from the internal development of the harmonisation activities have to be remarked at the date of the report. The likelihood of materialization of the risks associated to a delayed implementation of the first phase of the adaptation plan keeps low, but it is necessary to mitigate other risks related to the availability of weekends

	Key Hisks Status Description
Y	The adaptation plan to T2S designed by Iberclear consists of the development of a new system, and the project is divided into two phases. The first phase ("Spanish Reform") will be implemented in October 2015. A significant delay in the implementation of the first phase could impact the whole plan, although some buffers have been foreseen to mitigate the risks. In any case, the achievement of the main milestones of the adaptation plan to T2S is not at risk at the moment. Additionally, a risk has arisen in relation to the available weekends for migration testing of wave 4: it is necessary to close the
