## NOTES TO THE TABLES OF CHAPTER 17

In 2014 the European Union member states will implement the methodology of the 6th edition of the Balance of Payments and International Investment Position Manual (BPM6) in a coordinated manner with the entry into force of the manual of the European System of National and Regional Accounts (ESA 2010). Spain, as other European countries, will start disseminating Balance of Payments data according to the BPM6 in September or October 2014.

At that same time, the changes arising from the new data collection system that the Bank of Spain is developing at present as a consequence of the interruption of the traditional system in place, which was largely based in the reporting of cross-border transactions by commercial banks classified according to statistical codes and that disappears due to the development of the Single European Payments Area (SEPA), will also be implemented. In the new system, this source will be replaced by different subsystems, among which the following can be highlighted: the International Trade in Services and Other Transactions Survey, responsibility of INE, the direct reporting of foreign transactions and positions to Banco de España and the financial statements of credit entities. Therefore, until that moment, the figures and estimates of the Spanish Balance of Payments must be considered as provisional.

All methodological changes to be introduced in the Balance of Payments data published in September-October 2014 will be described in detail in the annual publication The Spanish Balance of Payments and International Investment Position, which will be published in June 2014.

### Table 17.A

Source: Banco de España. Data compiled in accordance with the IMF Balance of Payments Manual (5th edition, 1993).

- a. Changes in assets and liabilities are both net of repayments.
- b. Mainly loans, deposits, sell/buy back transactions and repurchase agreements.
- c. A negative (positive) sign indicates an increase (decrease) in the Banco de España's claims on the rest of the world.

### Table 17.6

- a. Patents, copyrights, trademarks, leases and other transferable contracts.

### Table 17.16

- a. Includes transport support and ancillary services.
- b. Includes merchanting.
- c. Includes leases of means of transport without crew.

### Table 17.17

Note: The Spanish Balance of Payments services data continue to be calculated largely on the basis of the general system of information on external receipts and payments (see the annual publication "The Spanish Balance of Payments and the International Investment Position 2006", Chapter 5.2). Accordingly, the geographical breakdown may be distorted insofar as it reflects the countries involved in receipts and payments, which do not always coincide with the countries of residence of the parties providing or enjoying the service.

**European Union:** International institutions of the European Union, European Central Bank, France, Belgium, Netherlands, Germany, Italy, United Kingdom, Ireland, Denmark, Greece, Portugal, Luxembourg, Austria, Finland, Sweden, Cyprus, Czech Republic, Estonia, Hungary, Lithuania, Latvia, Malta, Poland, Slovenia, Slovakia, Bulgaria Romania and Croatia and the corresponding dependencies of their economic territory.

**New EU Member States:** Czech Republic, Hungary, Lithuania, Latvia, Poland, Bulgaria Romania and Croatia.

**Euro area:** France, Belgium, Luxembourg, Netherlands, Germany, Italy, Ireland, Portugal, Austria, Finland, Greece, Slovenia, Malta, Cyprus, Slovakia, Estonia and European Central Bank.

**Rest of Europe:** Countries not included in the European Union.

**Maghreb:** Algeria, Morocco and Tunisia.

**Near and Middle East:** Saudi Arabia, Armenia, Azerbaijan, Bahrain, United Arab Emirates, Georgia, Iran, Iraq, Israel, Jordan, Kuwait, Oman, Qatar, Lebanon, Palestinian Territory Occupied, Syrian Arab Republic and Yemen.

**Gulf countries:** Saudi Arabia, Bahrain, United Arab Emirates, Iraq, Kuwait, Oman, Qatar and Yemen.

**OECD:** International Institutions of the European Union, European Central Bank, France, Belgium, Netherlands, Germany, Italy, United Kingdom, Ireland, Denmark, Greece, Portugal, Luxembourg, Iceland, Norway, Sweden, Finland, Switzerland, Austria, Turkey, United States, Canada, Japan, Australia, New Zealand, Mexico, Czech Republic, Hungary, Poland, Republic of Korea and Slovakia, Israel, Slovenia, Chile, and Estonia and the corresponding dependencies of their economic territory.

**NAFTA:** Canada, United States and Mexico.

**EFTA:** Iceland, Liechtenstein, Norway and Switzerland.

**OPEC:** Saudi Arabia, Algeria, United Arab Emirates, Iraq, Iran, Kuwait, Libya, Nigeria, Qatar, Angola, Ecuador and Venezuela.

**Newly industrialised countries (NICs):** Singapore, Republic of Korea, Taiwan and Hong Kong.

**ASEAN:** Brunei Darussalam, Cambodia, Indonesia, Philippines, Laos, Myanmar (Burma), Malaysia, Singapore, Thailand and Vietnam.

**Commonwealth of Independent States:** Russia, Ukraine, Belarus, Moldova, Armenia, Azerbaijan, Kazakhstan, Turkmenistan, Uzbekistan, Tajikistan and Kyrgyzstan.

**Offshore financial centres:** Andorra, Antigua and Barbuda, Anguilla, Netherlands Antilles, Barbados, Bahrain, Bermuda, Bahamas, Belize, Cook Islands, Dominica, Grenada, Guernsey, Gibraltar, Hong Kong, Isle of Man, Jersey, Jamaica, St. Kitts and Nevis, Cayman Islands, Lebanon, St. Lucia, Liechtenstein, Liberia, Marshall Islands, Montserrat, Maldives, Nauru, Niue, Panama, Philippines, Singapore, Turk and Caicos Islands, St. Vincent and the Grenadines, British Virgin Islands, American Virgin Islands, Vanuatu and Samoa.

**MERCOSUR:** Argentina, Brazil, Paraguay and Uruguay.

**Latin America:** Argentina, Bolivia, Brazil, Chile, Colombia, Costa Rica, Cuba, Ecuador, Guatemala, Honduras, Mexico, Nicaragua, Panama, Peru, Paraguay, El Salvador, Uruguay and Venezuela.

#### **Table 17.21**

a. From December 2002, portfolio investment data have been calculated using a new information system (see Banco de España Circular 2/2001 and note on changes introduced in the economic indicators). The incorporation of the new data under the heading 'shares and mutual funds' of other resident sectors entails a very significant break in the time series, both in the financial assets and the liabilities, so that the series have been revised back to 1992. This methodological change introduced by the new system also affects the rest of the headings, to some extent, but does not justify a complete revision of the series.

b. The counterpart entry of allocations of SDRs by the IMF is not included. These allocations (whose amounts, for Spain's case, may be deduced from table 17.26) have been recorded following the methodology laid down in the Fifth Edition of the IMF's Balance of Payments Manual, which is currently used for the compilation of the Balance of Payments (BP) and IIP statistics. The allocations of SDRs have therefore been recorded in the IIP as an increase in reserve assets, with no counterpart in any other caption, and they have not been recorded as transactions in the BP.

The Sixth Edition of the above-mentioned Manual, which was recently completed and which countries will progressively adopt according to their national plans, establishes, on the contrary, that the allocations of SDRs will entail, in addition to increases in reserve assets, an increase in the long-term liabilities of the recipient country. Therefore, according to this Manual, the allocations of SDRs shall be recorded under reserve assets and, moreover, under other investment liabilities, whereby the country's net IIP will not be affected. Furthermore, both the change in reserve assets and in other investment liabilities shall be recorded as transactions in the BP. The IMF has decided to apply, in its publications, the new methodological standard for SDR allocations following the August and September 2009 allocation. Conversely, in order to adopt the new methodological criteria for accounting laid down in the Sixth Edition of the Manual, European Union countries must await the amendment of the Community and ECB regulations governing the co-ordinated compilation and dissemination of statistics. This amendment is expected to be made as from 2014, meaning that until that date the IMF data published on Spain will differ from those disseminated in national data.

#### **Table 17.22**

Note: See footnote a to Table 17.21

#### **Table 17.23**

Note: See footnote a to Table 17.21.

#### **Table 17.25**

a. A minus (plus) sign denotes a decrease (increase) in liquidity.

b. The amounts in this column coincide with those in column 1 of Table 17.26.

#### **Table 17.26**

Note: From January 1999 reserve assets do not include claims denominated in euro or claims on residents in euro area countries denominated in foreign currencies (these headings appear in Tables 7A, 7.5 and 7.11). The data in pesetas to December 1998 were translated into euro using the irrevocable exchange rate. Since January 1999, all reserve assets have been valued at market prices.

Since January 2000 the reserve assets data have been compiled in accordance with the IMF's "International Reserves and Foreign Currency Liquidity Guidelines for a Data Template", of October 2001. Under this new definition, the total amount of reserve assets as at 31 December 1999 would have been EUR 37,835 million, and not EUR 37,288 million included in the series.

The main items of reserve assets are updated the first week of each month with reference to the end of the previous month and are disseminated in the economic indicator 7.8.

#### **Table 17.27**

a. See footnote a to Table 17.21.

b. See footnote b to Table 17.21.

#### **Table 17.28**

Note: See footnote a to Table 17.21.

**Table 17.29**

a. See footnote b to Table 17.21.

**Table 17.30**

a. This adjustment to column 7 is required because loans from foreign parent companies and indirectly related foreign companies are included as direct investment in column 4 of Table 17.27 and loans from foreign subsidiaries reduce the figures for direct investment in column 4 of Table 17.22 and it has not been possible to deduct these items from the series by type of firm (columns 8 to 10).

**Table 17.31**

a. These amounts are deducted from column 1 but not from the other columns (see note to Table 17.30).

(a) Official mortgage market reference rates (Order EHA/2899/2011 and BE Circular 5/2012) are official as of their publication in the Spanish Official State Gazette. Until then, they are treated as provisional data, and as such they are reported in this table for information purposes only.

(b) This rate matches that prepared and published by the European Central Bank with a lag of one month for the purposes of its use as a mortgage market reference rate.

(c) These rates are no longer considered official mortgage market reference rates for transactions entered into after the entry into force Order EHA/2899/2011 of 28 October 2011.

Law 14/2013 of 27 September 2013 stipulates that, from 1 November, these rates shall cease to be published. References to these rates shall be replaced as is provided for in the fifteenth additional provision of this legislation.

**19. INTEREST RATES**  
**A) Legal interest rates**

**19.1 (Cont.) Legal interest rates, euribor, mibor and other reference rates**

Percentages

(c) The rate for February 2013 will be applicable until 23 February, and for the rest of the month the rate for March 2013 will apply, by virtue of the recent amendment to Law 3/04.

(d) These reference rates (Order EHA/2899/2011 and BE Circular 5/2012) are disseminated exclusively for information purposes until its publication in the Spanish Official State Gazette.

(e) This rate, along with that in column 3, is used for calculating the spread to be applied in the event of early loan repayments.

**19. INTEREST RATES**  
**A) Legal interest rates**

**19.2 Unofficial mortgage market and other interest rates**

Percentages per annum

Note: The terms refer to the initial period of fixation of the rate. For example, a 15-year loan at an annually revisable rate is classified under the term 'Up to one year'.

a. APRC: annual percentage rate of charge. NDER: narrowly defined effective rate, which is the same as the APRC without including commissions.

b. Up to the reference month May 2010, this column includes only current account overdrafts (see the 'Changes' note in the July-August 2010 Boletín Estadístico).

c. Up to the reference month May 2010, this column includes credit granted through credit cards (see the 'Changes' note in the July-August 2010 Boletín Estadístico).

# 19. INTEREST RATES

## B) Interest rates applied by MFI to euro area residents

# 19.4 Interest rates (APRC and NDER) on new business. Loans to households and NPISH. Deposit-taking institutions (a)

Percentages

| Feb    | P                      | 4.93                                     | 3.06               | 2.92                              | 3.27                               | 6.07                | 5.03                                            | 8.71                      | 5.51                              | 9.92            | 9.84                                     | 5.57               | 5.23                              | 5.93            | 7.71                   | 3.27                         | 9.74                  | 5.93 |

Note: The terms refer to the initial period of fixation of the rate. For example, a 15-year loan at an annually revisable rate is classified under the term 'Up to one year'.

a. APRC: annual percentage rate of charge. NDER: narrowly defined effective rate, which is the same as the APRC without including commissions.

b. Up to the reference month May 2010, this column includes only current account overdrafts (see the 'Changes' note in the July-August 2010 Boletín Estadístico).

c. Up to the reference month May 2010, this column includes credit granted through credit cards (see the 'Changes' note in the July-August 2010 Boletín Estadístico).

# 19. INTEREST RATES

## B) Interest rates applied by MFI to euro area residents

# 19.6 Interest rates (APRC and NDER) on new business.

## Loans to non-financial corporations.

## Credit institutions and credit financial intermediaries (a)

Percentages

a. APRC: annual percentage rate of charge. NEDR: narrowly defined effective rate, which is the same as the APRC without including commissions.

b. For these deposits new business is the same as the outstanding amounts, and therefore these interest rates are the same as those in Table 19.15.

c. Includes non financial corporations

**19. INTEREST RATES**  
**B) Interest rates applied by**  
**MFI to euro area residents**

**19.10 Interest rates (NDER) on new business.**  
**Deposits from households and non-financial corporations.**  
**Deposit-taking institutions (a)**

Percentages

a. APRC: annual percentage rate of charge. NEDR: narrowly defined effective rate, which is the same as the APRC without including commissions.

b. For these deposits new business is the same as the outstanding amounts, and therefore these interest rates are the same as those in Table 19.15.

c. Includes non financial corporations

**19. INTEREST RATES**  
**B) Interest rates applied by**  
**MFI to euro area residents**

**19.12 Interest rates (NEDR) on outstanding amounts.**  
**Loans to households and non-financial corporations.**  
**Credit institutions and credit financial intermediaries (a)**

Percentages

Note: The terms refer to the original loan maturity period. For example, a 15-year loan at an annually revisable rate is classified under the term 'Over 5 years'.

a. NEDR: narrowly defined effective rate, which is the same as the APRC without including commissions.

# 19. INTEREST RATES

## B) Interest rates applied by MFI to euro area residents

# 19.13 Interest rates (NEDR) on outstanding amounts.

## Loans to households and non-financial corporations. Deposit-taking institutions (a)

Percentages

Note: The terms refer to the original loan maturity period. For example, a 15-year loan at an annually revisable rate is classified under the term 'Over 5 years'.

a. NEDR: narrowly defined effective rate, which is the same as the APRC without including commissions.

# 19. INTEREST RATES

## B) Interest rates applied by MFI to euro area residents

# 19.15 Interest rates (NEDR) on outstanding amounts.

## Deposits from households and non-financial corporations. Credit institutions and credit financial intermediaries (a)

Percentages

a. NEDR: narrowly defined effective rate, which is the same as the APRC without including commissions.

b. For these deposits new business is the same as the outstanding amounts, and therefore these interest rates are the same as those in Table 19.9

# 19. INTEREST RATES

## B) Interest rates applied by MFI to euro area residents

# 19.16 Interest rates (NEDR) on outstanding amounts.

## Deposits from households and non-financial corporations. Deposit-taking institutions (a)

Percentages

a. NEDR: narrowly defined effective rate, which is the same as the APRC without including commissions.

b. For these deposits new business is the same as the outstanding amounts, and therefore these interest rates are the same as those in Table 19.9

# 19. INTEREST RATES

## B) Interest rates applied by MFI to euro area residents

# 19.18 Volumes of new business.

## Loans to households and NPISH. Credit institutions and credit financial intermediaries(a)

EUR millions

Note: The terms refer to the initial period of fixation of the rate. For example, a 15-year loan at an annually revisable rate is classified under the term 'Up to one year'.

a. Up to the reference month May 2010, this column includes only current account overdrafts (see the 'Changes' note in the July-August 2010 Boletín Estadístico).

b. Up to the reference month May 2010, this column includes credit granted through credit cards (see the 'Changes' note in the July-August 2010 Boletín Estadístico).

Note: The terms refer to the initial period of fixation of the rate. For example, a 15-year loan at an annually revisable rate is classified under the term 'Up to one year'.

a. Up to the reference month May 2010, this column includes only current account overdrafts (see the 'Changes' note in the July-August 2010 Boletín Estadístico).

b. Up to the reference month May 2010, this column includes credit granted through credit cards (see the 'Changes' note in the July-August 2010 Boletín Estadístico).

## NOTES TO THE TABLES OF CHAPTER 20

### Table 20.1

- a. Daily exchange rates disseminated by the European Central Bank are available on the Internet at [http://www.bde.es/webbde/es/estadis/infoest/tc\\_1\\_1e.pdf](http://www.bde.es/webbde/es/estadis/infoest/tc_1_1e.pdf).

### Table 20.2

- a. Daily exchange rates disseminated by the European Central Bank are available on the Internet at [http://www.bde.es/webbde/es/estadis/infoest/tc\\_1\\_1e.pdf](http://www.bde.es/webbde/es/estadis/infoest/tc_1_1e.pdf).  
b. The euro has replaced the Cyprus pound in January 2008.  
c. The euro has replaced the Slovenian tolar in January 2007.  
d. The euro has replaced the Slovak koruna in January 2009.  
e. The euro has replaced the Estonian kroon in January 2011.

### Table 20.3

- a. Daily exchange rates disseminated by the European Central Bank are available on the Internet at [http://www.bde.es/webbde/es/estadis/infoest/tc\\_1\\_1e.pdf](http://www.bde.es/webbde/es/estadis/infoest/tc_1_1e.pdf).  
b. As of 1 July 2005 the currency of Romania is the new Romanian leu (RON). 1 RON equals 10,000 old Romanian lei (ROL). The average annual data corresponding to 2005 has been calculated applying this relationship to the period January-June 2005.  
c. The euro has replaced the Maltese lira in January 2008.  
d. As of 1 January 2005 the currency of the Republic of Turkey is the new Turkish lira (TRY). 1 TRY equals 1,000,000 Turkish liras (TRL).

### Table 20.4

- a. Daily exchange rates disseminated by the European Central Bank are available on the Internet at [http://www.bde.es/webbde/es/estadis/infoest/tc\\_1\\_1e.pdf](http://www.bde.es/webbde/es/estadis/infoest/tc_1_1e.pdf).

### Table 20.5

- a. From January 1999, equivalence in US dollars is obtained using the euro exchange rates.

### Table 20.6

- a. The countries making up EU-28 are as follows: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Poland, Portugal, Romania, Slovakia, Slovenia, Sweden and United Kingdom.  
The countries making up euro area are as follows: Australia, Belgium, Cyprus, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, Malta, Netherlands, Portugal, Slovakia, Slovenia and Estonia.  
b. Abbreviations: HICP (Harmonised Index of Consumer Prices), PPI (Producer Prices Index), ULCT (Unit Labour Costs Total), ULCM (Unit Labour Costs Manufacturing), EUVI (Export Unit Values Index).  
c. Outcome of multiplying nominal and price components. A decline in the index denotes an improvement in the competitiveness of Spanish products.  
d. Indices calculated as geometrical means of bilateral exchange rates in which the weights are based on manufacturing trade with trading partners from the counterpart aggregate and capture the effects of third markets.  
e. Relationship between the Spanish price index and that of the related grouping calculated as the geometrical mean of the price indices of the countries comprising the counterpart grouping, weighted as indicated in the preceding note.  
f. Quarterly series. Indices for Spain have been calculated using data for Unit Labour Costs (total and manufacturing) compiled from Quarterly Spanish National Accounts. Base 2008. Source INE.  
g. Due to the unavailability of the serie of export unit values for Croatia, the index is temporarily calculated with respect to the other 26 EU countries.

### Table 20.7

- a. Developed countries: Australia, Austria, Belgium, Canada, Cyprus, Denmark, Finland, France, Germany, Greece, Ireland, Italy, Japan, Luxemburg, Malta, Netherlands, New Zealand Norway, Portugal, Slovakia, Slovenia, Estonia, Sweden, Switzerland, United Kingdom and United States.  
Industrialised countries: The developed countries members and South Korea, Hong Kong, Singapore, China, India, Indonesia, Malaysia, Philippines, Taiwan and Thailand.  
Newly industrialised Asian countries: South Korea, Hong Kong, Singapore, China, India, Indonesia, Malaysia, Philippines, Taiwan and Thailand.  
b. Abbreviations: CPI (Consumer Prices Index), PPI (Producer Prices Index), ULCM (Unit Labour Costs Manufacturing), EUVI (Export Unit Values Index).

- c. Outcome of multiplying nominal and price components. A decline in the index denotes an improvement in the competitiveness of Spanish products.
- d. Indices calculated as geometrical means of bilateral exchange rates in which the weights are based on manufacturing trade with trading partners from the counterpart aggregate and capture the effects of third markets.
- e. Relationship between the Spanish price index and that of the related grouping calculated as the geometrical mean of the price indices of the countries comprising the counterpart grouping, weighted as indicated in the preceding note.
- f. Quarterly series. Indices for Spain have been calculated using data for Unit Labour Costs (total and manufacturing) compiled from Quarterly Spanish National Accounts. Base 2008. Source INE.

**Table 20.8**

- a. The group of developed countries is made up of the countries listed in footnote (a) to Table 20.7, including Spain and excluding the country of the currency in question. For the euro, see note (b) to table 1.16.
- b. Indices calculated as geometrical means of bilateral exchange rates in which the weights are based on manufacturing trade with trading partners from the counterpart aggregate and capture the effects of third markets. Real effective exchange rates are the outcome of multiplying nominal and price components. A decline in the index denotes an improvement in the competitiveness of Spanish products.

## CHAPTER 21 PRIMARY MARKET FOR SECURITIES

**21.PRIMARY MARKET FOR SECURITIES**  
**A) Total economy**

**21.1 Securities other than shares, excluding financial derivatives**  
**Shares**

**By sector and subsector of the issuer. Net issues and public offerings**

EUR millions

Nota: Euro-denominated issues include, historically, all issues denominated in euro or national denominations of the euro.

Greek drachma-denominated issues have been included under euro since January 2001.

(a) Including official credit entities until June 1994, when their status was changed to that of banks. Since that date they have been included in banks.

Note: Euro-denominated issues include, historically, all issues denominated in euro or national denominations of the euro.

See note to table 12.9. This note explains the relationship between debt in securities other than shares issued by Central Government compiled, according to the methodology of the excessive-deficit procedure, and the data in this table.

(a) Includes debt qualifying for tax relief issued as from 1977 and redeemed in 1991.

(b) Includes securities issued before 1977 and perpetual debt redeemed or exchanged in 1998.

**21.PRIMARY MARKET FOR SECURITIES**  
**C) General government**

**21.13 Securities other than shares, excluding financial derivatives**  
**Central government**  
**Outstanding amounts by term to maturity**

Nominal values

EUR millions

Note: Euro-denominated issues include, historically, all issues denominated in euro or national denominations of the euro.

Greek drachma-denominated issues have been included under euro since January 2001.

The Spanish contribution to euro area amounts can be consulted in columns 1 to 9 of table 21.1.

Note: Euro-denominated issues include, historically, all issues denominated in euro or national denominations of the euro.

Greek drachma-denominated issues have been included under euro since January 2001.

The Spanish contribution to euro area amounts can be consulted in columns 1 to 9 of table 21.1.

## CHAPTER 22 DOMESTIC SECONDARY MARKETS FOR SECURITIES

**22. DOMESTIC SECONDARY MARKETS FOR SECURITIES**  
**A) Book-entry debt market**

**22.1 Nominal outstanding amounts recorded in the book-entry system**

EUR millions

a. To December 2002 this includes: "Wind energy, urban solid waste and other solid fuels". From January 2003: "Wind energy, solar energy, biomass and residues (Renewable energies)". In 2010 Q2 there was a methodological change in the series relating to the production and consumption of "Renewable energies". This involves the inclusion for the first time of consumption for the final use of these energies. The change affects these series from January 2005. The monthly series are only available from April 2008. Accordingly, from January 2005 to March 2008, the monthly data were estimated by applying to the available annual totals the percentage accounted for by each month in the annual total in the series not included in consumption for final use.

Note: For all the monthly data, the annual figures do not always coincide with the annual addition of the monthly figures, in which case the difference is distributed evenly over the year.

**23. OUTPUT AND DEMAND**  
**B) Energy indicators**

**23.6 Electricity: production and consumption**

Spanish electricity system unique transmission agent and operator (REE)

Millions of KWH

c. 1 = (2 + 3 - 5)/3

d. From January 2003, the information for Galicia is based on total figures for hotel stays and overnight stays for the month. The directory of hotels has been reviewed thoroughly. Since January 2006, the directories have been updated and the information-collection period extended to every day of the month. In June 2009 and July 2010 the directory of hotel establishments in Canarias has been updated; the directory of those in Navarra in January 2011 and the directory of those in Extremadura in March 2011 and February 2012.

a. The new definition of unemployment applies from 2001 Q1 onwards, entailing a break in the series. (See [www.ine.es](http://www.ine.es)).

General note to the tables: As a result of the change in the population base (2001 Census), all the series in this table have been revised as from 1996. In addition, since 2005 Q1 the new obligatory variables referred to in Regulation (EC) 2257/2003 (on the adaptation of the list of labour force survey characteristics) have been included, a centralised procedure for telephone interviews has been set in place and the questionnaire has been modified. Thus, in 2005 Q1, there is a break in the series of some variables. For further information, see [www.ine.es](http://www.ine.es).

**24. EMPLOYMENT AND WAGES**  
**A) Labour force survey**

**24.2 Population aged 16 years and over  
Breakdown by age and sex**

General note to the tables: As a result of the change in the population base (2001 Census), all the series in this table have been revised as from 1996. In addition, since 2005 Q1 the new obligatory variables referred to in Regulation (EC) 2257/2003 (on the adaptation of the list of labour force survey characteristics) have been included, a centralised procedure for telephone interviews has been set in place and the questionnaire has been modified. Thus, in 2005 Q1, there is a break in the series of some variables. For further information, see [www.ine.es](http://www.ine.es).

**24. EMPLOYMENT AND WAGES**

a. The new definition of unemployment applies from 2001 Q1 onwards, entailing a break in the series. (See [www.ine.es](http://www.ine.es)).

General note to the tables: As a result of the change in the population base (2001 Census), all the series in this table have been revised as from 1996. In addition, since 2005 Q1 the new obligatory variables referred to in Regulation (EC) 2257/2003 (on the adaptation of the list of labour force survey characteristics) have been included, a centralised procedure for telephone interviews has been set in place and the questionnaire has been modified. Thus, in 2005 Q1, there is a break in the series of some variables. For further information, see [www.ine.es](http://www.ine.es).

**24. EMPLOYMENT AND WAGES**  
**A) Labour force survey**

**24.4 Employment by branch of activity, according to NACE 2009 sections (a)**

a. Series re-calculated drawing on the transition matrix to NACE 2009 published by INE.

General note to the tables: As a result of the change in the population base (2001 Census), all the series in this table have been revised as from 1996. In addition, since 2005 Q1 the new obligatory variables referred to in Regulation (EC) 2257/2003 (on the adaptation of the list of labour force survey characteristics) have been included, a centralised procedure for telephone interviews has been set in place and the questionnaire has been modified. Thus, in 2005 Q1, there is a break in the series of some variables. For further information, see [www.ine.es](http://www.ine.es).

**24. EMPLOYMENT AND WAGES**  
**A) Labour force survey**

**24.5 Employment by professional category**

General note to the tables: As a result of the change in the population base (2001 Census), all the series in this table have been revised as from 1996. In addition, since 2005 Q1 the new obligatory variables referred to in Regulation (EC) 2257/2003 (on the adaptation of the list of labour force survey characteristics) have been included, a centralised procedure for telephone interviews has been set in place and the questionnaire has been modified. Thus, in 2005 Q1, there is a break in the series of some variables. For further information, see [www.ine.es](http://www.ine.es).

**24. EMPLOYMENT AND WAGES**  
**A) Labour force survey**

**24.6 Wage-earners by branch of activity, according to NACE 2009 sections (a)**

a. Series re-calculated drawing on the transition matrix to NACE 2009 published by INE.

General note to the tables: As a result of the change in the population base (2001 Census), all the series in this table have been revised as from 1996. In addition, since 2005 Q1 the new obligatory variables referred to in Regulation (EC) 2257/2003 (on the adaptation of the list of labour force survey characteristics) have been included, a centralised procedure for telephone interviews has been set in place and the questionnaire has been modified. Thus, in 2005 Q1, there is a break in the series of some variables. For further information, see [www.ine.es](http://www.ine.es).

**24. EMPLOYMENT AND WAGES**  
**A) Labour force survey**

**24.7 Wage-earners by full-time and part-time employment, type of contract and sex**

a. The new definition of unemployment applies from 2001 Q1 onwards, entailing a break in the series. (See [www.ine.es](http://www.ine.es)).

b. Series re-calculated drawing on the transition matrix to NACE 2009 published by INE. The series are homogeneous regarding the time since which persons left their last job.

General note to the tables: As a result of the change in the population base (2001 Census), all the series in this table have been revised as from 1996. In addition, since 2005 Q1 the new obligatory variables referred to in Regulation (EC) 2257/2003 (on the adaptation of the list of labour force survey characteristics) have been included, a centralised procedure for telephone interviews has been set in place and the questionnaire has been modified. Thus, in 2005 Q1, there is a break in the series of some variables. For further information, see [www.ine.es](http://www.ine.es).

**24. EMPLOYMENT AND WAGES**  
**A) Labour force survey**

**24.9 Unemployment by level of education and sex, family situation and duration of unemployment (a)**

a. The new definition of unemployment applies from 2001 Q1 onwards, entailing a break in the series. (See [www.ine.es](http://www.ine.es)).

General note to the tables: As a result of the change in the population base (2001 Census), all the series in this table have been revised as from 1996. In addition, since 2005 Q1 the new obligatory variables referred to in Regulation (EC) 2257/2003 (on the adaptation of the list of labour force survey characteristics) have been included, a centralised procedure for telephone interviews has been set in place and the questionnaire has been modified. Thus, in 2005 Q1, there is a break in the series of some variables. For further information, see [www.ine.es](http://www.ine.es).

**24. EMPLOYMENT AND WAGES**  
**A) Economically Active Population Survey**

a. The new definition of unemployment applies from 2001 Q1 onwards, entailing a break in the series. (See [www.ine.es](http://www.ine.es)).

General note to the tables: As a result of the change in the population base (2001 Census), all the series in this table have been revised as from 1996. In addition, since 2005 Q1 the new obligatory variables referred to in Regulation (EC) 2257/2003 (on the adaptation of the list of labour force survey characteristics) have been included, a centralised procedure for telephone interviews has been set in place and the questionnaire has been modified. Thus, in 2005 Q1, there is a break in the series of some variables. For further information, see [www.ine.es](http://www.ine.es).

a. The new definition of unemployment applies from 2001 Q1 onwards, entailing a break in the series. (See [www.ine.es](http://www.ine.es)).

General note to the tables: As a result of the change in the population base (2001 Census), all the series in this table have been revised as from 1996. In addition, since 2005 Q1 the new obligatory variables referred to in Regulation (EC) 2257/2003 (on the adaptation of the list of labour force survey characteristics) have been included, a centralised procedure for telephone interviews has been set in place and the questionnaire has been modified. Thus, in 2005 Q1, there is a break in the series of some variables. For further information, see [www.ine.es](http://www.ine.es).

a. On 3 May 2005, the new SISPE management model came into operation. This has involved a change in the way registered unemployment is obtained (basically, those groups that should be excluded from outstanding demand are calculated in another way owing to an improvement in the data cross-checking processes). The inclusion of the new registered unemployment data entails a break in the series in January 1996.

b. Homogeneous time series published by the INEM begin in January 1996.

c. Homogeneous time series published by the INEM begin in February 2001.

d. To December 2008, NACE 1993; from January 2009, NACE 2009.

a. On 3 May 2005, the new SISPE management model came into operation. This has involved changes and breaks in the series in this table.

b. There was a break in new vacancies and in de-registered vacancies in 1994 (Royal Decree Law 18/1993). Since May 2005, these items relate to jobs offered by employers. The outstanding vacancies cannot be determined. The number of jobs de-registered may exceed the number initially offered.

c. There is a break in May 2005. Only the movements actually registered are compiled. Simultaneous registration and de-registration does not take place for each new contract.

d. The entry into operation of the new SISPE management model entailed a change in the classification of placements. The new classification is not homogeneous with the previous one, and this brought about a break in the series from May 2005. Previously placements were classified as "Without intermediation on INEM" (up to 1993) and "With intermediation of INEM" (since 1994).

a. Before January 2002 the total does not coincide with the sum of the components shown here as it also includes part-time contracts, which from January 2002 are no longer a type of contract.

b. From January 2002, stand-in and partial retirement contracts are included in addition to contracts to replace workers retiring at 64.

c. Until December 1998 corresponds to the part-time contract type. From January 1999 corresponds to part-time working hours.

a. As from 1 January 2012, in accordance with the provisions of Law 28/2011 and Royal Decree 1620/2011, the special regimes for Agriculture and Domestic Employees are incorporated into the General Regime and are known as the Special Agricultural System and the Special Domestic Employee System, respectively. Regarding the latter issue, a six-month transitional period applies, running from 1 January to 30 June 2012.

b. From January 2009 the data are based on NACE Rev.2. Previous years' data have been back-calculated using the two-digit economic activity code in the Social Security Contribution Accounts File dated 31 January 2009.

c. From January 2008, self-employed farmers have been included under the Special Self-Employed Regime.

## 24. EMPLOYMENT AND WAGES

## D) Social Security System: registered workers and pensions paid

## 24.20 Current pensions

Instituto Nacional de la Seguridad Social (INSS) and Instituto de Mayores y Servicios Sociales (IMSERSO)

Thousands of pensions (first day of the month)

a. The information on the number of collective bargaining agreements registered in 2013 with economic effects in 2013 is not homogeneous with respect to that of the same period a year earlier.

b. Until 2010, includes revisions arising from indexation clauses.

c. The annual data include agreements registered after the end of the year and inflation-adjustment clauses. Consequently, the cumulative monthly data to December do not coincide with the annual data.

## 24. EMPLOYMENT AND WAGES

### E) Collective agreements, labour disputes and other labour statistics

## 24.23 Agreements as per month registered and year of effectiveness (a)

Ministerio de Empleo y Seguridad Social

Cumulative data

a. The annual data include agreements registered after the end of the year and inflation-adjustment clauses. Consequently, the cumulative monthly data to December do not coincide with the annual data.

b. The information on the number of collective bargaining agreements registered in 2013 with economic effects in 2013 is not homogeneous with respect to that of the same period a year earlier.

c. Annual data: to 2004, NACE 1993; from 2005, NACE 2009. Monthly data: to December 2008, NACE 1993; from January 2009, NACE 2009.

## 24. EMPLOYMENT AND WAGES

### E) Collective agreements, labour disputes and other labour statistics

## 24.24 Labour disputes and workforce reductions

Ministerio de Empleo y Seguridad Social

(a) Seasonally adjusted series. In the case of countries, except Switzerland, the series are also adjusted for the calendar effect.

(b) The data for the euro area countries up to 1998 Q4 have been obtained applying the irrevocable euro conversion rates to the national currency series. As the euro area aggregate for that period has been obtained applying the respective exchange rates in ECU to the national currency series, this aggregate is not equal to the sum of the constituent countries.

(c) This series has been converted into US dollars using gross domestic product purchasing power standards in 2000, as per the methodology published by the OECD.

(d) The EU and euro area data are from Eurostat. For further methodological details, see Eurostat News Release no. 151/2005 and the methodological note referred to therein, 'Changes to National Accounts in 2005'. Both are dated 30 November 2005.

**26. INTERNATIONAL ECONOMY**  
**A) Macroeconomic aggregates**

**26.2 Gross domestic product at constant prices (a)**

(a) Seasonally adjusted series. In the case of countries, except Switzerland, the series are also adjusted for the calendar effect.

(b) The data for the euro area countries up to 1998 Q4 have been obtained applying the irrevocable euro conversion rates to the national currency series. As the euro area aggregate for that period has been obtained applying the respective exchange rates in ECU to the national currency series, this aggregate is not equal to the sum of the constituent countries.

(c) This series has been converted into US dollars using gross domestic product purchasing power standards in 2000, as per the methodology published by the OECD.

(d) The EU and euro area data are from Eurostat. For further methodological details, see Eurostat News Release no. 151/2005 and the methodological note referred to therein, 'Changes to National Accounts in 2005'. Both are dated 30 November 2005.

APPENDIX 1 BANCO DE ESPAÑA. OFFICIAL BALANCE SHEET

## SUMMARIZED BALANCE SHEET OF THE BANCO DE ESPAÑA

Banco de España balance sheet published pursuant to the Resolution of 28.3.2000 (BOE 6.4.2000)

According to the accounting regime chosen by the Eurosystem on the issue of euro banknotes, a share of 8% of the total value of the euro banknotes in circulation is allocated to the ECB on a monthly basis. The counterpart of this adjustment is recorded as an Intra-Eurosystem liability related to banknote issue. The remaining 92% of the value of the euro banknotes in circulation are allocated to the NCBs on a monthly basis too, whereby each NCB shows in its balance sheet a share of the euro banknotes issued corresponding to its paid-up share in the ECB's capital. The difference between the value of the euro banknotes allocated to the NCB according to the aforementioned accounting regime, and the value of euro banknotes put into circulation, is also recorded as an Intra-Eurosystem claim/liability related to banknote issue.

## APPENDIX 3 METHODOLOGICAL NOTES

## NOTES TO THE TABLES OF CHAPTER 10

### INSURANCE CORPORATIONS AND PENSION FUNDS

#### Introduction

According to the provisions of the ESA 95, insurance corporations and pension funds form a sub-sector within the sector financial institutions. The inclusion of these entities within the sector financial institutions is basically due to the fact that their principal activity, the coverage of risks, involves significant intermediation of financial resources from some sectors to others. In recent years, the activity of this sub-sector has been growing significantly. This can be attributed not only to the increase in the desire of the population to cover the different types of risk that these entities offer but also to the growing use of a certain range of products as vehicles for saving.

The following sections of this note describe the various groups of agents that make up this sub-sector (section 2), the sources of information used and availability of the data (section 3); and the specific information contained in the various tables that make up this chapter (section 4).

#### The agents who make up the sub-sector

This sub-sector comprises four different groups of agents: private insurance corporations, mutualidades de previsión social (non-profit insurance entities), the Consorcio de Compensación de Seguros (insurance compensation consortium) and pension funds, all of which come under the supervision of the Directorate General of Insurance and Pension Funds (DGSFP).

- **Private insurance corporations** include the activity of public limited companies whose capital may be entirely Spanish, entirely foreign or a mixture of the two, private mutual insurance associations, the offices in Spain of foreign insurance corporations and reinsurance corporations resident in Spain (1).
- **Mutualidades de previsión social** are private beneficent entities generally set up by particular groups as a form of corporate support (they provide small benefits in the event of death, birth, etc. and grant small loans). They are independent of the body they originate from (companies, associations, etc.) and their purpose is to supplement social security pensions. Their main resources are the direct contributions of the members or other persons or patron entities. Membership of these entities may be voluntary or compulsory (for persons belonging to certain professional associations, groups or companies). This group includes cajas de pensiones sustitutorias (substitute pension funds), which existed until 1984 in the Spanish insurance system. These funds were created by particular groups in order to act as substitutes for the Social Security System. Additional provision five of the 1984 budget law required the groups covered by these funds (both retired and active employees) to be transferred to the Social Security System, so that the role of these entities then became one of supplementing social security, a status that they still have today.
- **The Consorcio de Compensación de Seguros (CCS)** is a public law entity with its own legal personality. Its object is to cover extraordinary risks to persons and property. It is basically financed by surcharges on the premiums paid by policyholders of all types of insurance, by State grants and loans and by direct premiums. In addition, it acts as the State's agent in dealings with the Spanish export credit company (CESCE), the public-sector private insurance corporation of which manages, on behalf of the State, the cover of political risks and certain commercial risks to Spanish exports. This latter activity of the CCS is not included in the series, since it is attributed directly to the State.
- **Pension funds** are funds created pursuant to Law 8/1987 of 8 June 1987. They are portfolios of assets separate and independent from the entities that promote them, but without separate legal status. They are made up of funds earmarked for the purposes laid down in the corresponding pension scheme. Their management is entrusted to a managing entity and a custodian, under the supervision of a control committee. These funds are usually known as "autonomous" or "external pension funds" in contrast to "non-autonomous" or "internal pension funds", which are those created by certain credit institutions and non-financial corporations by means of transfers of funds to provisions or internal reserves. Internal funds appear on the balance sheet of the sector or sub-sectors that have created them (other financial institutions and non-financial corporations) and represent a liability to the workers (households) with interests in them. Normally, the balance sheet does not show any separate assets to cover the aforementioned pension rights.

#### Sources and availability of information

- **Private insurance corporations** The main source of data is the annual balance sheets and other supplementary information that insurance corporations send to the DGSFP, which is published annually in its reports. Annual aggregate data for this group are available from 1962, and relate to three different accounting plans (1962-1982, 1983-

1997 and 1998 onwards). As a result, the compilation of time series has required the Banco de España to chain the different series. This has been done by adapting the information of the two plans prior to 1998, without any breaks arising that are worthy of mention. First, the differences attributable to the different coverage in different years, indicated in footnote 1, were small at the time the chaining was carried out and, second, the other differences due to the change in the accounting plan were, likewise, minor. Also, for a sample of entities whose insurance technical provisions account for approximately 98% of the total, quarterly information is available from 1986, although with certain limitations. Specifically, this quarterly information does not include data on reinsurance entities and data are not available for the quarters of 1990 and for the first three quarters of 1998, so that in the time series these quarters are shown as unavailable.

- **Mutualidades de previsión social** Information is available from 1970, with differing content, and is obtained from the following sources:

For the period 1970-1984 the data come from the individual balance sheets of the entities themselves and from the incomplete and heterogeneous information of the Labour and Social Security Ministry (to which they reported until 1984) and the Economy Ministry. The Banco de España has estimated the series on the basis of these data.

For the period 1985-1997, inclusive, data are available from the annual statistical reports of the DGSFP, which include information relating to the mutualidades with a national scope, which are supervised by this Directorate General, and the information on entities under the supervision of the regional governments, following the transfer of responsibilities in this area.

For 1998 the series only include the data of the mutualidades de previsión social with a national scope, obtained from the quarterly reports of the DGSFP, and of the Catalan and Basque regions' mutualidades for which information is supplied directly by these two regional governments.

Since 1999 the series are Banco de España estimates based on the reports of the Spanish Confederation of Mutualidades. These estimates will be replaced by official data as and when they become available.

- **Consorcio de Compensación de Seguros** The data available for the period 1970-1982 are incomplete and from various sources, primarily the three bodies which in 1982 were merged to form the current CCS: the CCS itself, the Fondo Nacional de Garantía (National Guarantee Fund) and compulsory travel insurance. The Banco de España has estimated the relevant time series using this information. From 1983 the data are from the annual reports of the CCS itself.
- **External pension funds** Data are available from when these funds began to be created in 1988. The source is the annual statistical reports published by the DGSFP.

### The information contained in the tables of the chapter

The chapter begins with a table (10.A) which reconciles the different headings of the annual balance sheet which the various agents that make up the sub-sector send to the DGSFP for supervision purposes and the instruments that, following ESA 95 methodology, are included in the Financial Accounts of the Spanish Economy (FASE). The reconciliation is between the latest balance sheet published by DGSFP and the FASE for the same year.

When analysing this table two important issues should be taken into account:

- For some headings, the balance sheet figure is not taken as the figure for the FASE, but rather data are taken from alternative sources available for the same headings, following the order of hierarchisation of statistical sources that governs the preparation of the FASE (the insurance corporations and pension funds figure is subordinated to that obtained from other sources). The difference between these two data is explicitly shown as a "difference due to hierarchisation" in column 9 of the table. This difference arises in the case of deposits and loans vis-à-vis credit institutions, which are taken from the latter, and in that of deposits (for reasons other than reinsurance) vis-à-vis the rest of the world, which are taken from the balance of payments. This item also includes the differences arising from the different scope of the headings other accounts receivable/payable in the FASE and other assets/liabilities in the balance sheet of insurance corporations and pension funds.
- The securities headings of the FASE show market-price data, as laid down by the ESA 95. As this principle is not applied in the balance sheets of the various agents a "valuation difference" arises which is explicitly shown in column 10 of the table.

The other tables include, in the form of time series, the accounting/administrative information obtained from the DGSFP, the regional governments that supply data and the CCS, which corresponds to the first row of Table 10.A (2).

The purpose of Table 10.1 is to give an overall view of the relative importance of each of the four groups of entities that make up the sub-sector based on the aggregate balance sheet and the most important item therein: the technical provisions and own funds, in the case of pension funds. Thereafter, Tables 10.2 to 10.6 provide certain details of the assets and liabilities of the aggregated balance sheet of the sub-sector (Table 10.2) and of each of the groups of agents of which it is composed (Tables 10.3 to 10.6). The structure of all these tables is identical so that some minor adaptations have had to be made to the format of the balance sheet which each group of agents sends to the DGSFP.

#### Footnotes

- Until 1997 (inclusive), the annual series presented include the activity in Spain of corporations resident in Spain (i.e., both those of Spanish nationality and the branches of foreign entities). Since then, information on the insurance business in Spain of branches that have their head office in other EU countries is not included, since the current legal framework makes no provision for these branches to submit information. As for the quarterly series, from 1996 Q1 these include the activity both in Spain and abroad of entities of Spanish nationality. In addition, from 1998, as in the case of the annual series and for the same reason, these series do not include the activity in Spain of the branches of entities that have their head office in other EU countries.
- Time series based on the approach of the Financial Accounts of the Spanish Economy (last column of Table 10.A) are available in the publication Financial Accounts of the Spanish Economy.

## METHODOLOGICAL NOTE

### GENERAL GOVERNMENT DEBT COMPILED ACCORDING TO THE METHODOLOGY OF THE EXCESSIVE DEFICIT PROCEDURE (EDP)

#### Introduction

The functions attributed to the Banco de España by Spanish legislation and, specifically, by the Banco de España Law of Autonomy and successive National Statistics Plans include notably, the compilation of a set of statistics, comprising government debt according to the EDP. Thus, the Banco de España regularly publishes on the Internet quarterly information about government debt in its *Boletín Estadístico*.

This note describes the methodology used to compile EDP debt. The next section presents the various concepts of debt or indebtedness which are habitually used, depending on the context to which they refer. Then section three provides a description of the methodology applied. Lastly, section four details the information published by the Banco de España.

#### Different concepts of indebtedness

In the framework of any agent's economic activity, expenses (including the net acquisition of financial assets) not financed with current revenue and capital, must be financed through the net contraction of liabilities. This generation of liabilities is usually called debt or indebtedness; however, it is necessary to differentiate between the contraction of liabilities over a period of time (flows) and the outstanding balance of these liabilities at a specific time (stocks). Consequently, flows (operations in the period) are formally called a net change in liabilities and stocks are formally called debt, indebtedness or outstanding liabilities. Several concepts are encompassed within this general definition of indebtedness, which are delimited by the instruments included and the methods used for their valuation, and which, consequently, must be considered together with the general definition itself. This section describes the varying coverage of the frequently used main concepts of indebtedness and Scheme 1 provides a comparison of them.

##### 1. Total liabilities

This is the broadest possible concept of indebtedness and is reflected in the Financial Accounts of the Spanish Economy (FASE), a quarterly publication of the Banco de España with a high degree of detail (<http://www.bde.es/webbde/en/estadis/ccff/ccff.html>). Chapter 2 of this publication presents the financial transactions (flows) and financial assets and liabilities (stocks) for all the sectors and subsectors into which the economy is classified, including general government. Thus, in this specific case, the FASE provide information about the financial activity of government in a full and consistent fashion which is integrated with the other sectors and subsectors of the economy and with general government non-financial operations; therefore, they serve as a global framework of reference for analysing general government financial activity as a whole. This publication takes the broadest possible concept of indebtedness because it includes all the liabilities incurred by general government, irrespective of type (issuance of currency, securities other than shares, equity, short and long-term non-commercial loans in euro or in other currencies, trade credits and other outstanding payables). The liabilities included in this concept are valued using the methodology established by the 1995 European System of Integrated Economic Accounts (ESA 95) described in the methodological note of the FASE disseminated on the Banco de España webpage (<http://www.bde.es/webbde/SES/Secciones/Publicaciones/PublicacionesSeriadas/NotasEstadisticas/07/nest05e.pdf>) and which uses market values in the valuation of stocks and flows of liabilities held in the form of securities other than shares.

The change in this indebtedness is explained by: a) net borrowing i.e. non-financial expenses less non-financial resources, according to the National Accounts criterion which, in turn, must follow the ESA 95 rules; b) the net acquisitions in financial assets; and, c) adjustments for valuation (which arise, for example, in the case of securities other than shares and liabilities in currencies other than the euro).

##### 2. Debt compiled according to the EDP

This concept of indebtedness is not as broad as the previous one. The Banco de España publishes a detailed breakdown of this debt concept for each of the subsectors comprising general government and it is disseminated with a shorter time lag than the FASE. Likewise, it provides a very complete breakdown by instrument since it distinguishes:

- Currency and deposits (coin issuance)
- Securities other than shares, in euro and currencies other than the euro, by original maturity.
  - Short-term
  - Medium and long-term
- Loans and credits
  - a) Granted by resident credit institutions, in euro and currencies other than the euro, by original maturity.
    - Short-term (12 months or less)
    - Medium and long-term (more than 12 months)
  - b) Granted by non-residents, in euro and currencies other than the euro (rest of the world)

The concept of "Debt compiled according to the EDP" is different to the concept of "Total liabilities" in that it does not include general government liabilities held by other general government units, trade credit and other accounts payable. Furthermore, the valuation methods of the liabilities which are used in debt compiled according to the EDP are those described in Section 3.

**Scheme 1**  
**General government: different concepts of indebtedness**  
**Percentage structure at 31.12.2012**

| Instrument                                                      |                                                | Total liabilities | Debt compiled according to the EDP |
|-----------------------------------------------------------------|------------------------------------------------|-------------------|------------------------------------|
| Currency and deposits                                           |                                                | 0.3%              | 0.3 %                              |
| Securities other than shares                                    | Securities held by general government units    | 5.9%              |                                    |
|                                                                 | Other securities (short, medium and long-term) | 57.3%             | 56.9%                              |

| <b>Percentage of total liabilities</b>                          |                                                | <b>100%</b>       | <b>75.1%</b>                       |

These two concepts of indebtedness are not the only ones possible. Other definitions have been defended in order to value this aspect of public finances such as, for example, that it would be necessary to deduct from gross debt, as envisaged in the two concepts included in this section, the stock of financial assets, since a distinction must be made between when an economic agent increases its indebtedness in order to finance a deficit and when it does so to acquire financial assets. Any concept of indebtedness has its own meaning and is valid for economic analysis provided that the area to which it refers is specified in detail. Nevertheless, it is considered of interest to underline that the concept of debt compiled according to the EDP has the virtue of being defined according to uniform binding rules for all EU countries and it is scrutinised in depth by the European Commission (Eurostat), therefore, it is comparable between the various EU Member States. This is not the case for any definition set with the criteria of only one country. Additionally, the concept of debt compiled according to the EDP is useful at a practical level since, on one hand, it is that for which data are published with the shortest time lag and, on the other, changes in it are a good proxy of total liabilities. Total liabilities is the concept of debt used in the financial accounts compiled by all EU Member States.

#### **Debt according to the EDP**

The definition of this indebtedness is regulated by Council Regulation EC No 479/2009 of 25 May 2009, which refers, in turn, to the ESA to delimit the main terms used. This regulation amended Regulation 3605/93 of 22 November 1993. Among other things, this regulation requires EU Member States to report to the European Commission and, specifically, to Eurostat, twice per year (at end-March and end-September) the data corresponding to this definition of debt by subsectors and with an ample breakdown of certain items and transactions. The reporting of these data are called EDP debt Notifications.<sup>1</sup>

For the purposes of this Note, Regulation No 479/2009, like its predecessor, Regulation 3605/93, defines the concepts of general government and government debt as follows:

#### **1. Institutional scope of general government**

Regulation 479/2009 specifies that the general government sector includes the subsectors: central government, regional (autonomous) government, local government, and social security funds, excluding commercial operations as defined in ESA 95. The exclusion of commercial operations means that the general government sector comprises only institutional units producing non-market services as their main activity.

<sup>1</sup> It should be clarified that the second edition of the ESA published in 1979 (ESA 79) was in force until the EDP Notification of September 1999 inclusive. As of the EDP Notification of March 2000, the ESA corresponding to 1995 (ESA 95) has been in force. Interestingly, this new version of the ESA is the first system of national accounts which has been introduced via a legal text, namely Council Regulation (EC) No 2223/96 of 25 June 1996 (called the ESA 95 Regulation) and it therefore constitutes a legal obligation for EU countries. The previous edition of the ESA was only a "recommendation" to countries for compiling national accounts which were as uniform as possible.

In the case of Spain, the general government sector comprises the following four subsectors:

- **Central government** comprises institutional units which have general powers throughout the country and which, in Spain, include the State, the central government agencies and corporations classified as central government.
- **Regional (autonomous) government** which includes the governing bodies of the regional (autonomous) government and the regional administrative and similar agencies. The latter group includes the universities in each region and, also, the corporations classified as regional (autonomous) government.
- **Local government** comprises local (municipal, provincial and island) authorities, associations and groupings of municipalities, autonomous cities (Ceuta and Melilla) and the independent administrative and similar bodies reporting to them.
- **Social security funds** which include the institutional units of a legal nature and with diverse territorial scope that undertake functions relating to the provision of social benefits. Since 2000 Q1, in accordance with the sectorisation of base year 2000 and base year 2008 of the Spanish National Accounts compiled by the INE, the units performing social security functions financed through general taxation (essentially healthcare services) are classified together with the units to which they report in the central government, regional (autonomous) government and local government subsectors, whereas the units performing social security functions financed through social security contributions are classified in the social security fund subsector.

All these subsectors have two basic characteristics: a) they comprise institutional units whose main function is to produce non-market goods and services and/or to undertake operations to redistribute national income and wealth and, b) their principal funds come from compulsory payments made by other institutional units and not from the sale of their production.

In other words, in order to decide whether or not an institutional unit must be included in the general government sector two criteria must be taken into account: the institutional legal criterion (determining whether a unit is a public or private producer) and the economic criterion, according to the nature of the production (determining whether a unit is a market or non-market producer). On the basis of the first criterion, those institutional units controlled by general government are included in public producers. On the basis of the second criterion, those institutional units which cover more than 50% of their production costs with revenue from the sale of their products are considered market producers. The second criterion involves, in fact, subordinating the legal criterion to the economic one when including institutional units in, or excluding them from, the general government sector and its subsectors, since a unit may be of a commercial nature from a legal viewpoint but it does not comply with the 50% rule, in which case it will be sectorised under general government.

## *2 Concept of government debt*

Under Regulation 479/2009 government debt means the total gross debt at nominal value outstanding at the end of the year of the sector of general government with the exception of those liabilities the corresponding financial assets of which are held by the sector of general government. Nominal value corresponds to face value. In the case of index-linked liabilities, the regulation specifies that their nominal value shall correspond to their face value adjusted by the index-related change in the value of the principal accrued to the end of the year.

As for the financial instruments which must be included, government debt shall be constituted by the liabilities of general government in the following categories according to the definitions of ESA 95: currency and deposits, securities other than shares, excluding financial derivatives, and loans.

Under the regulation, liabilities denominated in foreign currencies shall be converted into the national currency on the basis of the representative market exchange rate prevailing on the last working day of each year.

In the case of Spain, the instruments and statistical sources used are included in Scheme 2 below:

**Scheme 2**  
**Instruments and sources**

| Instruments (liabilities)                                |                                                     | Statistical source                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

|                                                          | Securities issued in currencies other than the euro |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Loans granted by resident financial institutions         |                                                     | Information compiled through the Banco de España's Central Credit Register, obtained from lending credit institutions reporting credit exposures of more than €6,000. For the State and General Secretariat of the Treasury and Financial Policy.                                                                                                                                                                                                                                                                   |
| Loans granted by the rest of the world                   |                                                     | Statistics on credits and loans granted by non-residents based on communications, which for statistical purposes, must be sent to the Banco de España's Statistics Department by the borrowers or resident credit institutions on behalf of the borrowers, when the collections and payments are made through these institutions over the life of the loan. For the State and General Secretariat of the Treasury and Financial Policy.                                                                             |

The valuation rules used are as follows: the short, medium and long-term securities other than shares are recorded at their nominal value; credits only include the part drawn down. In both cases, where the currency in which the securities other than shares are issued or in which the credit is arranged is not the euro, they are converted into euro applying to the currency in which the securities other than shares were originally issued or in which the credit was arranged, the exchange rate of that currency at the end of the period to which the outstanding balance refers.

From the foregoing it can be deduced that the Banco de España's statistics show an estimate of the indebtedness represented by securities other than shares and non-commercial loans based on sources which are mostly external to the governments and bodies whose debt is being calculated. This reason explains why the amounts obtained from each of these governments may not coincide exactly with the amounts in the latter's internal records, which obviously are the best source of the indebtedness of any government. However, in order to compensate for this limitation, monthly tests are performed in the case of the State and quarterly tests are undertaken in the case of the regional (autonomous) communities and main local governments (local authorities with more than 500,000 inhabitants) with information from their own internal records.

**Dissemination of information on government debt in the Banco de España's *Boletín Estadístico*.**

In Chapters 11 to 14 of the *Boletín Estadístico* published on its website, the Banco de España disseminates information about the debt of general government, i.e. of the institutional units classified in the general government sector and, separately, information on the debt of the units reporting to general government (public producers) which are not classified as general government. This set of units is called generically public corporations and their debt is not subject to (i.e. it is not included in the scope of) EDP and, consequently, it is not included in the Notifications to the European Commission which refer to the EDP.

The Banco de España statistics provide general government indebtedness both in absolute figures and in relative terms with respect to GDP. National GDP is used in respect of the total debt of the sector and its subsectors, and regional GDP is used to obtain the ratio corresponding to each regional (autonomous) government. In both cases the source of GDP is the INE's publications of Spanish National Accounts and Spanish Regional Accounts. However, since the regional GDP data are updated with a lag in respect of the national GDP data, for the years in which data on regional GDP were not available, the

according to Spanish National Accounts according to the structure of regional GDP for the last available year. Although, this procedure may generate distortions in regional aggregates since not all regional (autonomous) governments grow at the same rate, it is not considered that this limitation will significantly alter the ratios in respect of the GDP of each regional (autonomous) government.

The tables in the *Boletín Estadístico* which contain information on government debt are as follows:

#### Chapter 11. General government

- 11.5. Liabilities outstanding and debt according to the excessive deficit procedure (EDP). Amounts
- 11.6. Liabilities outstanding and debt according to the excessive deficit procedure (EDP). As a percentage of GDP mp
- 11.7. Debt according to the excessive deficit procedure (EDP) and financial assets held by general government. Amounts
- 11.8. Debt according to the excessive deficit procedure (EDP) and financial assets held by general government. As a percentage of GDP mp
- 11.12. Debt according to the excessive deficit procedure (EDP) by instrument
- 11.13. Debt according to the excessive deficit procedure (EDP) by counterpart sector and currency
- 11.14. Debt of public enterprises not included in the general government sector, by general government owner unit

#### Chapter 12. Central government and social security funds

##### *Central government*

- 12.6. *Central government. Debt according to the excessive deficit procedure (EDP) by instrument*
- 12.7. *Central government. Debt according to the excessive deficit procedure (EDP) by unit*
- 12.8. *State. Debt according to the excessive deficit procedure (EDP) by instrument*
- 12.9. *Other units classified as central government. Debt according to the excessive deficit procedure (EDP) by instrument*
- 12.10. *Debt by public enterprises not included in the general government sector*
- 12.16. *Debt according to the excessive deficit procedure (EDP) by instrument*

#### Chapter 13. Regional autonomous governments

- 13.6. Debt according to the excessive deficit procedure (EDP). General summary
- 13.7. Debt according to the excessive deficit procedure (EDP) by instrument
- 13.8. Debt according to the excessive deficit procedure (EDP) by institutional grouping
- 13.9. Debt according to the excessive deficit procedure (EDP) by regional (autonomous) government. Amounts
- 13.10. Debt according to the Excessive Deficit Procedure (EDP) by regional (autonomous) government. As a percentage of GDP mp
- 13.11. Debt of public enterprises not included in the general government sector, by regional (autonomous) government owner. Amounts
- 13.12. Debt of public enterprises not included in the general government sector, by regional (autonomous) government owner. As a percentage of GDP mp

#### Chapter 14. Local governments

- 14.6. Debt according to the excessive deficit procedure (EDP). General summary
- 14.7. Debt according to the excessive deficit procedure (EDP) by instrument
- 14.8. Debt according to the excessive deficit procedure (EDP) by type of local government
