...: Amount below the editing threshold or with not sufficient number of observations for the considered phenomenon.

- : Nil.

a. The composition of economic areas is detailed in the notes at the end of the chapter.

b. The difference between the amount assigned to the world total and the sum of the amounts for all the geographical areas is due to data without a geographical assignment and data from international institutions other than European Union.

c. SPEs: Special Purpose Entities. These entities essentially correspond to foreign-equity holding companies (ETVEs in their Spanish initials) and other holding companies whose main purpose is to channel direct investment.

...: Amount below the editing threshold or with not sufficient number of observations for the considered phenomenon.

- : Nil.

a. The composition of economic areas is detailed in the notes at the end of the chapter.

b. The difference between the amount assigned to the world total and the sum of the amounts for all the geographical areas is due to data without a geographical assignment and data from international institutions other than European Union.

c. In the case of portfolio investment, the geographical breakdown of positions of liabilities is based on the available information. This refers to the first non-resident counterpart, which does not necessarily correspond to the final holder of the securities. Furthermore, the presentation of data according to the counterpart country may give rise the presence of negative positions. This situation occurs when an investor sells securities outright that it has received as a loan or as collateral for a cash loan (repo transaction).

d. SPEs: Special Purpose Entities. These entities essentially correspond to foreign-equity holding companies (ETVEs in their Spanish initials) and other holding companies whose main purpose is to channel direct investment.

**17. BALANCE OF PAYMENTS AND INTERNATIONAL INVESTMENT POSITION**  
**B) International investment position**

a. Debt securities are divided into short term (under one year) and long term (one year or more).

b. The 'Loans, trade credit and other liabilities' heading basically includes loans, trade credit and advances granted by non-residents, other accounts receivable and payable, insurance, pension schemes and standardised guarantee systems.

c. The sixth edition of the Balance of Payments and International Investment Position Manual establishes that allocations of SDRs entail, in addition to increases in reserve assets an increase in the long-term liabilities of the recipient country.

**17. BALANCE OF PAYMENTS AND INTERNATIONAL INVESTMENT POSITION**  
**E) Direct investment. Directional principle**

**17.40 Direct investment. End-of-period positions**  
**Breakdown by institutional sector (a)**

| End-of-period positions |    |                                                 |                        |         |                                                 | EUR millions           |         |        |

...: Amount below the editing threshold or with not sufficient number of observations for the considered phenomenon.

-: Nil.

a. On the presentation of direct investment according to the directional principle, see section 4.2.1 of the methodological notes.

b. The composition of economic areas is detailed in the notes at the end of the chapter.

c. The difference between the amount assigned to the world total and the sum of the amounts for all the geographical areas is due to data without a geographical assignation and data from international institutions other than European Union.

d. SPEs: Special Purpose Entities. These entities essentially correspond to foreign-equity holding companies (ETVEs in their Spanish initials) and other holding companies whose main purpose is to channel direct investment.

**17. BALANCE OF PAYMENTS AND INTERNATIONAL INVESTMENT POSITION**  
**E) Direct investment according to directional principle**

**17.45 Direct investment. Transactions.**  
**Breakdown by geographical and economic areas (a)(b)(c)**

...: Amount below the editing threshold or with not sufficient number of observations for the considered phenomenon.

-: Nil.

a. On the presentation of direct investment according to the directional principle, see section 4.2.1 of the methodological notes.

b. The composition of economic areas is detailed in the notes at the end of the chapter.

c. The difference between the amount assigned to the world total and the sum of the amounts for all the geographical areas is due to data without a geographical assignment and data from international institutions other than European Union.

d. SPEs: Special Purpose Entities. These entities essentially correspond to foreign-equity holding companies (ETVEs in their Spanish initials) and other holding companies whose main purpose is to channel direct investment.

## NOTES TO THE TABLES OF CHAPTER 17. BALANCE OF PAYMENTS AND INTERNATIONAL INVESTMENT POSITION

### General notes

#### Composition of economic areas:

EU28: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Poland, Portugal, Romania, Slovakia, Slovenia, Sweden, United Kingdom.

Euro area: Austria, Belgium, Cyprus, Estonia, Finland, France, Germany, Greece, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Portugal, Slovakia and Slovenia. Also includes the ESM and the ECB.

OECD: Australia, Austria, Belgium, Canada, Chile, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Israel, Italy, Japan, Luxembourg, Mexico, Netherlands, New Zealand, Norway, Poland, Portugal, Republic of Korea, Slovakia, Slovenia, Sweden, Switzerland, Turkey, United Kingdom, United States.

OPEC: Algeria, Angola, Ecuador, Equatorial Guinea, Gabon, Iran, Iraq, Kuwait, Libya, Nigeria, Qatar, Saudi Arabia, United Arab Emirates and Venezuela.

NICs: Hong Kong, Singapore, Korea, Taiwan.

ASEAN: Brunei Darussalam, Cambodia, Indonesia, Lao PDR, Malaysia, Myanmar, Philippines, Singapore, Thailand, Viet Nam.

#### Definition of the main items

Direct investment includes all financial flows between companies belonging to the same group.

Financial derivatives: any financial instruments enabling specific financial risks to be traded that are linked to another specific financial instrument, indicator, or commodity.

Investment income: return on shares and other equity (dividends, withdrawals from income of quasicorporations, reinvested earnings) and the yield on debt (interest).

Net position vis-à-vis the Eurosystem: Banco de España's net assets and liabilities vis-à-vis the European Central Bank together with the central banks of the other euro area countries.

Other investment: mainly includes loans, deposits, sell/buy back transactions and repurchase agreements, trade credit and other accounts receivable/payable.

Other primary income: taxes on production and imports, and subsidies.

Other financial assets and liabilities: include other equity which does not take the form of securities and is not included in portfolio investment (this is the case of some stakes in international organisations), trade credit and advances, other accounts receivable/payable, insurance, pension schemes, standardised guarantee systems and allocations of special drawing rights.

Other items of the BE: derivatives, portfolio investment and other investment of the Banco de España excluding the net position vis-à-vis the Eurosystem.

Portfolio investment: transactions in marketable securities, other than those included in direct investment or reserve assets.

Primary income; includes labour income, investment income, taxes on production and imports, and subsidies.

Reserves: foreign assets denominated in currencies other than euro and issued by residents outside of EMU which are immediately available to and under the control of the Banco de España for meeting balance-of-payments financing needs.

Secondary income: includes personal transfers, current taxes, social contributions and benefits, transfers relating to insurance transactions, current international cooperation and other miscellaneous current transfers.

## CHAPTER 18 CUSTOMS STATISTICS

## 18. CUSTOMS STATISTICS

## 18.1 Imports/arrivals and exports/dispatches

(a) Official mortgage market reference rates (Order EHA/2899/2011 and BE Circular 5/2012) are official as of their publication in the Spanish Official State Gazette. Until then, they are treated as provisional data, and as such they are reported in this table for information purposes only.

(b) This rate matches that prepared and published by the European Central Bank with a lag of one month for the purposes of its use as a mortgage market reference rate.

(c) These rates are no longer considered official mortgage market reference rates for transactions entered into after the entry into force Order EHA/2899/2011 of 28 October 2011. Law 14/2013 of 27 october 2013 stipulates that, from 1 November, these rates shall cease to be published. References to these rates shall be replaced as is provided for in the fifteenth additional provision of this legislation.

**19. INTEREST RATES**  
**A) Legal interest rates**

**19.1 (Cont.) Legal interest rates, EURIBOR, MIBOR and other reference rates**

Percentages

(c) The rate for February 2013 will be applicable until 23 February, and for the rest of the month the rate for March 2013 will apply, by virtue of the recent amendment to Law 3/04.

(d) These reference rates (Order EHA/2899/2011 and BE Circular 5/2012) are disseminated exclusively for information purposes until its publication in the Spanish Official State Gazette.

(e) This rate, along with that in column 3, is used for calculating the spread to be applied in the event of early loan repayments.

**19. INTEREST RATES**  
**A) Legal interest rates**

**19.2 Unofficial mortgage market and other interest rates**

Percentages per annum

Note: The terms refer to the initial period of fixation of the rate. For example, a 15-year loan at an annually revisable rate is classified under the term 'Up to one year'.

a. NDER: narrowly defined effective rate, which is the same as the APRC without including commissions.

b. Credit card debt for cardholders that have requested deferred payment and 'revolving'. While finalities are not available, it is estimated that are consumer fundamentally. In fact, consumer credit up to one year was included until June 2010.

### 19. INTEREST RATES

#### B) Interest rates applied by MFI to euro area residents

**19.5 Interest rates (NDER) on new business.**  
**Loans to non-financial corporations.**  
**Credit institutions and credit financial intermediaries (a)**

| 19 Jan | P                                       | 1.63                     | 18.36                         | 2.11         | 2.05                     | 2.82         | 3.05                                             | 1.61         | 1.60                     | 1.58         | 1.77                           | 1.34         | 1.34                     | 1.24         | 1.45 |

Note: The terms refer to the initial period of fixation of the rate. For example, a 15-year loan at an annually revisable rate is classified under the term 'Up to one year'.

a. NEDR: narrowly defined effective rate, which is the same as the APRC without including commissions.

b. Up to the reference month May 2010, this column includes only current account overdrafts (see the 'Changes' note in the July-August 2010 Statistical Bulletin).

c. Credit card debt for cardholders that have requested deferred payment with usually interest rates over 0%.

## 19. INTEREST RATES

### B) Interest rates applied by MFI to euro area residents

## 19.6 Interest rates APRC on new business.

### Loans to households and non-financial corporations. Credit institution and credit financial intermediaries (a)(b)

Percentages

Note: The terms refer to the initial period of fixation of the rate. For example, a 15-year loan at an annually revisable rate is classified under the term 'Up to one year'.

a. APRC: annual percentage rate of charge.

b. Excludes overdrafts, credit lines and extended credit card debt and 'revolving'.

c. Up to the reference month May 2010, this column includes credit granted through credit cards (see the 'Changes' note in the July-August 2010 Statistical Bulletin). The extended credit card interest rate are published in the chapter 19.3 column 4 and 19.4 column 7

## 19. INTEREST RATES

### B) Interest rates applied by MFI to euro area residents

## 19.7 Interest rates (NEDR) on new business.

### Deposits from households and non-financial corporations. Credit institution and credit financial intermediaries (a)

a. NEDR: narrowly defined effective rate, which is the same as the APRC without including commissions.

b. For these deposits new business are equivalent to the outstanding amounts, therefore these interest rates are the same as those showed in Table 19.10.

## 19. INTEREST RATES

### B) Interest rates applied by MFI to euro area residents

## 19.8 Interest rates (NEDR) on outstanding amounts.

### Loans to households and NPISHs Credit institutions and credit financial intermediaries (a)

Percentages

Note: The terms refer to the original loan maturity period. For example, a 15-year loan at an annually revisable rate is classified under the term 'Over 5 years'.

a. NEDR: narrowly defined effective rate, which is the same as the APRC without including commissions.

## 19. INTEREST RATES

### B) Interest rates applied by MFI to euro area residents

## 19.9 Interest rates (NEDR) on outstanding amounts.

### Loans to non-financial corporations Credit institutions and credit financial intermediaries (a)

Percentages

a. Excluded bank overdraft, credit lines and extended credit card debt.

b. Excluded bank overdraft and credit lines.

c. These volumes are detailed in table 19.12 columns from 3 to 17.

b. For this instrument, the CBE 1/2010 considers 'new business' as the outstanding amounts at the end of the month. For this reason in this column the annual amount coincides with last month of the year. Regarding this instrument, while finalities are not available, it is estimated that are consumer fundamentally. In fact, consumer credit up to one year was included until June 2010.

e. These volumes are detailed in table 19.13 columns from 3 to 14.

## 19. INTEREST RATES

### B) Interest rates applied by MFI to euro area residents

## 19.12 Volumes of new business.

### Loans to households and NPISHs.

### Credit institutions and credit financial intermediaries

EUR millions

Note: The terms refer to the initial period of fixation of the rate. For example, a 15-year loan at an annually revisable rate is classified under the term 'Up to one year'.

a. Up to the reference month May 2010, this column includes only current account overdrafts (see the 'Changes' note in the July-August 2010 Statistical Bulletin).

b. For these instruments, the CBE 1/2010 considers 'new business' as the outstanding amounts at the end of the month. For this reason in both columns the annual amount coincides with last month of the year. Regarding extended credit card, while finalities are not available, it is estimated that are consumer fundamentally. In fact, consumer credit up to one year was included until June 2010.

c. Up to the reference month May 2010, this column includes credit granted through credit cards (see the 'Changes' note in the July-August 2010 Statistical Bulletin).

## 19. INTEREST RATES

### B) Interest rates applied by MFI to euro area residents

## 19.13 Volumes of new business.

### Loans to non-financial corporations.

### Credit institutions and credit financial intermediaries

EUR millions

| 19 Jan                                                                              | P 67 383                                          | 127                         | 10 180                        | 9 470           | 551                               | 158             | 3 122                                            | 2 561           | 362                            | 199             | 13 303                         | 10 964          | 1 102                          | 1 237           |

Nota: The terms refer to the initial period of fixation of the rate. For example, a 15-year loan at an annually revisable rate is classified under the term 'Up to one year'.

a. Up to the reference month May 2010, this column includes only current account overdrafts (see the 'Changes' note in the July-August 2010 Statistical Bulletin).

b. For these instruments, the CBE 1/2010 considers 'new business' as the outstanding amounts at the end of the month. For this reason in both columns the annual amount coincides with last month of the year.

# 19. INTEREST RATES

## B) Interest rates applied by MFI to euro area residents

# 19.14 Volumes of new business.

## Deposits from households and non-financial corporations. Credit institution and credit financial intermediaries

EUR millions

## NOTES TO THE TABLES OF CHAPTER 20. EXCHANGE RATES AND COMPETITIVENESS INDICES

**Table 20.1**

a. Daily exchange rates disseminated by the European Central Bank are available on the Internet at [http://www.bde.es/webbde/es/estadis/infoest/tc\\_1\\_1e.pdf](http://www.bde.es/webbde/es/estadis/infoest/tc_1_1e.pdf).

**Table 20.2**

a. Daily exchange rates disseminated by the European Central Bank are available on the Internet at [http://www.bde.es/webbde/es/estadis/infoest/tc\\_1\\_1e.pdf](http://www.bde.es/webbde/es/estadis/infoest/tc_1_1e.pdf).

- b. The euro has replaced the Cyprus pound in January 2008.
- c. The euro has replaced the Slovenian tolar in January 2007.
- d. The euro has replaced the Slovak koruna in January 2009.
- e. The euro has replaced the Estonian kroon in January 2011.
- f. The euro has replaced the Latvian lats in January 2014.

**Table 20.3**

a. Daily exchange rates disseminated by the European Central Bank are available on the Internet at [http://www.bde.es/webbde/es/estadis/infoest/tc\\_1\\_1e.pdf](http://www.bde.es/webbde/es/estadis/infoest/tc_1_1e.pdf).

- b. As of 1 July 2005 the currency of Romania is the new Romanian leu (RON). 1 RON equals 10,000 old Romanian lei (ROL). The average annual data corresponding to 2005 has been calculated applying this relationship to the period January-June 2005.
- c. The euro has replaced the Maltese lira in January 2008.
- d. As of 1 January 2005 the currency of the Republic of Turkey is the new Turkish lira (TRY). 1 TRY equals 1,000,000 Turkish liras (TRL).
- e. The euro has replaced the Lithuanian litas in January 2015.

**Table 20.4**

a. Daily exchange rates disseminated by the European Central Bank are available on the Internet at [http://www.bde.es/webbde/es/estadis/infoest/tc\\_1\\_1e.pdf](http://www.bde.es/webbde/es/estadis/infoest/tc_1_1e.pdf).

**Table 20.5**

a. From January 1999, equivalence in US dollars is obtained using the euro exchange rates.

**Table 20.6**

- a. The countries making up EU-28 are as follows: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Poland, Portugal, Romania, Slovakia, Slovenia, Sweden and United Kingdom.  
The countries making up euro area are as follows: Austria, Belgium, Cyprus, Estonia, Finland, France, Germany, Greece, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Portugal, Slovakia and Slovenia.
- b. Abbreviations: HICP (Harmonised Index of Consumer Prices), PPI (Producer Prices Index), ULCT (Unit Labour Costs Total), ULCM (Unit Labour Costs Manufacturing), EUVI (Export Unit Values Index).
- c. Outcome of multiplying nominal and price components. A decline in the index denotes an improvement in the competitiveness of Spanish products.
- d. Indices calculated as geometrical means of bilateral exchange rates in which the weights are based on manufacturing trade with trading partners from the counterpart aggregate and capture the effects of third markets.
- e. Relationship between the Spanish price index and that of the related grouping calculated as the geometrical mean of the price indices of the countries comprising the counterpart grouping, weighted as indicated in the preceding note.
- f. Quarterly series. Indices for Spain have been calculated using data for Unit Labour Costs (total and manufacturing) compiled from Quarterly Spanish National Accounts. Base 2010. Source INE.

**Table 20.7**

- a. Developed countries: Australia, Austria, Belgium, Canada, Cyprus, Denmark, Finland, France, Germany, Greece, Ireland, Italy, Japan, Latvia, Lithuania, Luxemburg, Malta, Netherlands, New Zealand Norway, Portugal, Slovakia, Slovenia, Estonia, Sweden, Switzerland, United Kingdom and United States.  
Industrialised countries: The developed countries members and South Korea, Hong Kong, Singapore, China, India, Indonesia, Malaysia, Philippines, Taiwan and Thailand.  
Newly industrialised Asian countries: South Korea, Hong Kong, Singapore, China, India, Indonesia, Malaysia, Philippines, Taiwan and Thailand.
- b. Abbreviations: CPI (Consumer Prices Index), PPI (Producer Prices Index), ULCM (Unit Labour Costs Manufacturing), EUVI (Export Unit Values Index).
- c. Outcome of multiplying nominal and price components. A decline in the index denotes an improvement in the competitiveness of Spanish products.

- d. Indices calculated as geometrical means of bilateral exchange rates in which the weights are based on manufacturing trade with trading partners from the counterpart aggregate and capture the effects of third markets.
- e. Relationship between the Spanish price index and that of the related grouping calculated as the geometrical mean of the price indices of the countries comprising the counterpart grouping, weighted as indicated in the preceding note.
- f. Quarterly series. Indices for Spain have been calculated using data for Unit Labour Costs (total and manufacturing) compiled from Quarterly Spanish National Accounts. Base 2010. Source INE.

**Table 20.8**

- a. The group of developed countries is made up of the countries listed in footnote (a) to Table 20.7, including Spain and excluding the country of the currency in question. For the euro, see note (b) to table 1.16.
- b. Indices calculated as geometrical means of bilateral exchange rates in which the weights are based on manufacturing trade with trading partners from the counterpart aggregate and capture the effects of third markets. Real effective exchange rates are the outcome of multiplying nominal and price components. A decline in the index denotes an improvement in the competitiveness of Spanish products.

## CHAPTER 21 PRIMARY MARKET FOR SECURITIES

**21.PRIMARY MARKET FOR SECURITIES**  
**A) Total economy**

**21.1 Securities other than shares, excluding financial derivatives**  
**Shares**

**By sector and subsector of the issuer. Net issues and public offerings**

EUR millions

|        | Securities other than shares, excluding financial derivatives<br>Nominal values |          |          |                   |                    |                       |                                                  |                               |                                         | Quoted and unquoted shares, excluding<br>mutual funds shares |                                |                                         |                          | Mutual<br>funds<br>shares                                |

Nota: Euro-denominated issues include, historically, all issues denominated in euro or national denominations of the euro.

Greek drachma-denominated issues have been included under euro since January 2001.

(a) Including official credit entities until June 1994, when their status was changed to that of banks. Since that date they have been included in banks.

Note: Euro-denominated issues include, historically, all issues denominated in euro or national denominations of the euro.

See note to table 12.9. This note explains the relationship between debt in securities other than shares issued by Central Government compiled, according to the methodology of the excessive-deficit procedure, and the data in this table.

(a) Includes debt qualifying for tax relief issued as from 1977 and redeemed in 1991.

(b) Includes securities issued before 1977 and perpetual debt redeemed or exchanged in 1998.

Note: Euro-denominated issues include, historically, all issues denominated in euro or national denominations of the euro.

Greek drachma-denominated issues have been included under euro since January 2001.

The Spanish contribution to euro area amounts can be consulted in columns 1 to 9 of table 21.1.

Note: Euro-denominated issues include, historically, all issues denominated in euro or national denominations of the euro.

Greek drachma-denominated issues have been included under euro since January 2001.

The Spanish contribution to euro area amounts can be consulted in columns 1 to 9 of table 21.1.

## CHAPTER 22 DOMESTIC SECONDARY MARKETS FOR SECURITIES

**22. DOMESTIC SECONDARY MARKETS FOR SECURITIES**  
**A) Book-entry debt market**

**22.1 Nominal outstanding amounts recorded in the book-entry system**

EUR millions

## **Notes to the tables of Chapter 22. Domestic secondary markets for securities**

### **Chapter 22. Secondary markets for securities**

- a. The various breakdowns of holding sectors are obtained using information on securities portfolios provided by the holders themselves (in the case of much of the financial sector) and depositors (for the remaining holding agents). This information is received following the rules of Regulation (EU) No 1011/2012 of the European Central Bank concerning statistics on holdings of securities.
- b. The breakdown by term and currency of the issues can be consulted in Table 21.18. The difference between column 1 of this table and column 3 in Table 13.7 is due to the fact that, in the second case, Debt according to the excessive debt procedure (EDP) takes into account the foreign exchange swaps made by the various regional governments.

## CHAPTER 23 OUTPUT AND DEMAND

**23. OUTPUT AND DEMAND**  
**A) Industrial production index**

**23.1 Summary table**

Instituto Nacional de Estadística

2015 = 100

a. To December 2002 this includes: "Wind energy, urban solid waste and other solid fuels". From January 2003: "Wind energy, solar energy, biomass and residues (Renewable energies)". In 2010 Q2 there was a methodological change in the series relating to the production and consumption of "Renewable energies". This involves the inclusion for the first time of consumption for the final use of these energies. The change affects these series from January 2005. The monthly series are only available from April 2008. Accordingly, from January 2005 to March 2008, the monthly data were estimated by applying to the available annual totals the percentage accounted for by each month in the annual total in the series not included in consumption for final use.

Note: For all the monthly data, the annual figures do not always coincide with the annual addition of the monthly figures, in which case the difference is distributed evenly over the year.

a. Generation consumption not included

b. From 1 January 2011 GICC (Elcogás) has been included owing to the fact that, according to Royal Decree 134/2010, this power station is obliged to participate, as a selling unit using autochthonous coal as fuel, in the resolution of restrictions to supply guarantees.

General note to the tables: As a result of the change in the population base (2011 Census), all the series in this table have been revised as from 2002. In addition, since 2005 Q1 the new obligatory variables referred to in Regulation (EC) 2257/2003 (on the adaptation of the list of labour force survey characteristics) have been included, a centralised procedure for telephone interviews has been set in place and the questionnaire has been modified. Thus, in 2005 Q1, there is a break in the series of some variables. For further information, see [www.ine.es](http://www.ine.es).

**24. EMPLOYMENT AND WAGES**  
**A) Labour force survey**

**24.2 Population aged 16 years and over**

General note to the tables: As a result of the change in the population base (2011 Census), all the series in this table have been revised as from 2002. In addition, since 2005 Q1 the new obligatory variables referred to in Regulation (EC) 2257/2003 (on the adaptation of the list of labour force survey characteristics) have been included, a centralised procedure for telephone interviews has been set in place and the questionnaire has been modified. Thus, in 2005 Q1, there is a break in the series of some variables. For further information, see [www.ine.es](http://www.ine.es).

General note to the tables: As a result of the change in the population base (2011 Census), all the series in this table have been revised as from 2002. In addition, since 2005 Q1 the new obligatory variables referred to in Regulation (EC) 2257/2003 (on the adaptation of the list of labour force survey characteristics) have been included, a centralised procedure for telephone interviews has been set in place and the questionnaire has been modified. Thus, in 2005 Q1, there is a break in the series of some variables. For further information, see [www.ine.es](http://www.ine.es).

**24. EMPLOYMENT AND WAGES**  
**A) Labour force survey**

**24.4 Employment by branch of activity, according to NACE 2009 sections**

General note to the tables: As a result of the change in the population base (2011 Census), all the series in this table have been revised as from 2002. In addition, since 2005 Q1 the new obligatory variables referred to in Regulation (EC) 2257/2003 (on the adaptation of the list of labour force survey characteristics) have been included, a centralised procedure for telephone interviews has been set in place and the questionnaire has been modified. Thus, in 2005 Q1, there is a break in the series of some variables. For further information, see [www.ine.es](http://www.ine.es).

General note to the tables: As a result of the change in the population base (2011 Census), all the series in this table have been revised as from 2002. In addition, since 2005 Q1 the new obligatory variables referred to in Regulation (EC) 2257/2003 (on the adaptation of the list of labour force survey characteristics) have been included, a centralised procedure for telephone interviews has been set in place and the questionnaire has been modified. Thus, in 2005 Q1, there is a break in the series of some variables. For further information, see [www.ine.es](http://www.ine.es).

**24. EMPLOYMENT AND WAGES**  
**A) Labour force survey**

**24.6 Wage-earners by branch of activity, according to NACE 2009 sections**

General note to the tables: As a result of the change in the population base (2011 Census), all the series in this table have been revised as from 2002. In addition, since 2005 Q1 the new obligatory variables referred to in Regulation (EC) 2257/2003 (on the adaptation of the list of labour force survey characteristics) have been included, a centralised procedure for telephone interviews has been set in place and the questionnaire has been modified. Thus, in 2005 Q1, there is a break in the series of some variables. For further information, see [www.ine.es](http://www.ine.es).

**24. EMPLOYMENT AND WAGES**  
**A) Labour force survey**

**24.7 Wage-earners by full-time and part-time employment, type of contract and sex**

General note to the tables: As a result of the change in the population base (2011 Census), all the series in this table have been revised as from 2002. In addition, since 2005 Q1 the new obligatory variables referred to in Regulation (EC) 2257/2003 (on the adaptation of the list of labour force survey characteristics) have been included, a centralised procedure for telephone interviews has been set in place and the questionnaire has been modified. Thus, in 2005 Q1, there is a break in the series of some variables. For further information, see [www.ine.es](http://www.ine.es).

**24. EMPLOYMENT AND WAGES**  
**A) Labour force survey**

**24.9 Unemployment by level of education and sex, family situation and duration of unemployment**

The new National Classification of Education, CNED-2014, applies from 2014 Q1 onwards, entailing a break in the series.

General note to the tables: As a result of the change in the population base (2011 Census), all the series in this table have been revised as from 2002. In addition, since 2005 Q1 the new obligatory variables referred to in Regulation (EC) 2257/2003 (on the adaptation of the list of labour force survey characteristics) have been included, a centralised procedure for telephone interviews has been set in place and the questionnaire has been modified. Thus, in 2005 Q1, there is a break in the series of some variables. For further information, see [www.ine.es](http://www.ine.es).

**24. EMPLOYMENT AND WAGES**  
**A) Economically Active Population Survey**

**24.10 Unemployed by type of working day in the job sought and sex**

General note to the tables: As a result of the change in the population base (2011 Census), all the series in this table have been revised as from 2002. In addition, since 2005 Q1 the new obligatory variables referred to in Regulation (EC) 2257/2003 (on the adaptation of the list of labour force survey characteristics) have been included, a centralised procedure for telephone interviews has been set in place and the questionnaire has been modified. Thus, in 2005 Q1, there is a break in the series of some variables. For further information, see [www.ine.es](http://www.ine.es).

General note to the tables: As a result of the change in the population base (2011 Census), all the series in this table have been revised as from 2002. In addition, since 2005 Q1 the new obligatory variables referred to in Regulation (EC) 2257/2003 (on the adaptation of the list of labour force survey characteristics) have been included, a centralised procedure for telephone interviews has been set in place and the questionnaire has been modified. Thus, in 2005 Q1, there is a break in the series of some variables. For further information, see [www.ine.es](http://www.ine.es).

a. These figures are provisional for the current year.

b. The net registrations do not match the changes in the balance of registered workers because for the net registrations the unit of measure is labour relationships and for the balance is persons.

c. As from 1 January 2012 the special regimes for Agriculture and Domestic Employees are incorporated into the General Regime and are known as the Special Agricultural System and the Special Domestic Employees System.

d. It includes the registered workers for which there is no information about their sector of activity.

## 24. EMPLOYMENT AND WAGES

### D) Social Security System: registered workers and pensions paid

## 24.20 Current pensions

Ministerio de Empleo y Seguridad Social

Thousands of pensions (first day of the month)

|        |   | Total          | New | Terminated | By type of pension |                                   |                |                 |             | By Social Security regime |                     |                                                      |                               |                                 |                          |                                                                     |                                                                     | Memorandum item:<br>non contributory<br>pensions |                                                   |

a. The information on the number of collective bargaining agreements registered in 2013 with economic effects in 2013 is not homogeneous with respect to that of the same period a year earlier.

b. The annual data include agreements registered after the end of the year. Consequently, the cumulative monthly data to December do not coincide with the annual data.

c. The annual data include agreements registered after the end of the year and inflation-adjustment clauses. Consequently, the cumulative monthly data to December do not coincide with the annual data.

## 24. EMPLOYMENT AND WAGES

### E) Collective agreements, labour disputes and other labour statistics

## 24.23 Agreements as per month registered and year of effectiveness (a)

Ministerio de Empleo y Seguridad Social

Cumulative data

a. The annual data include agreements registered after the end of the year and inflation-adjustment clauses. Consequently, the cumulative monthly data to December do not coincide with the annual data.

b. The information on the number of collective bargaining agreements registered in 2013 with economic effects in 2013 is not homogeneous with respect to that of the same period a year earlier.

## 24. EMPLOYMENT AND WAGES

### E) Collective agreements, labour disputes and other labour statistics

## 24.24 Labour disputes and workforce reductions

Ministerio de Empleo y Seguridad Social

a. Not including data on the strike on 8 June 2010 in the general government sector and among non-permanent teaching staff in the non-university education sector, the strike on 22 May 2012 in the State and private education sector and the general strikes on 29 September 2010 and 29 March 2012.

b. Cumulative data had been adjusted. This process does not apply to the days lost, which are obtained by simply adding the days lost up.

The attendant methodology is available at [http://www.empleo.gob.es/estadisticas/hue/notas\\_metodologicas.pdf](http://www.empleo.gob.es/estadisticas/hue/notas_metodologicas.pdf)

b. To December 2008, NACE 1993; from January 2009, NACE 2009.

**24. EMPLOYMENT AND WAGES**  
**F) Quarterly labour costs survey**

**24.25 Labour costs. Summary**

GROSS DOMESTIC PRODUCT  
Annual percentage changes

GROSS DOMESTIC PRODUCT  
Annual percentage changes

(a) Seasonally adjusted series. In the case of countries, except Switzerland, the series are also adjusted for the calendar effect.

(b) The data for the OECD area is in USD and the data for the EU aggregate is in euros. The data for the euro area countries up to 1998 Q4 have been obtained applying the irrevocable euro conversion rates to the national currency series. As the euro area aggregate for that period has been obtained applying the respective exchange rates in ECU to the national currency series, this aggregate is not equal to the sum of the constituent countries.

LONG-TERM GOVERNMENT BOND YIELDS  
Annual percentage changes

LONG-TERM GOVERNMENT BOND YIELDS  
Annual percentage changes

Notes:

(a) Interest rate on ten-year bonds, which is the rate used in the convergence criterion on interest rates.

(b) See also column 11 in Table 2.10.

APPENDIX 1 BANCO DE ESPAÑA. OFFICIAL BALANCE SHEET

## SUMMARIZED BALANCE SHEET OF THE BANCO DE ESPAÑA

Banco de España balance sheet published pursuant to the Resolution of 28.3.2000 (BOE 6.4.2000)

According to the accounting regime chosen by the Eurosystem on the issue of euro banknotes, a share of 8% of the total value of the euro banknotes in circulation is allocated to the ECB on a monthly basis. The counterpart of this adjustment is recorded as an Intra-Eurosystem liability related to banknote issue. The remaining 92% of the value of the euro banknotes in circulation are allocated to the NCBs on a monthly basis too, whereby each NCB shows in its balance sheet a share of the euro banknotes issued corresponding to its paid-up share in the ECB's capital. The difference between the value of the euro banknotes allocated to the NCB according to the aforementioned accounting regime, and the value of euro banknotes put into circulation, is also recorded as an Intra-Eurosystem claim/liability related to banknote issue.

## APPENDIX 3 METHODOLOGICAL NOTES

## NOTES TO THE TABLES OF CHAPTER 10

### INSURANCE CORPORATIONS AND PENSION FUNDS

#### Introduction

According to the provisions of the ESA 95, insurance corporations and pension funds form a sub-sector within the sector financial institutions. The inclusion of these entities within the sector financial institutions is basically due to the fact that their principal activity, the coverage of risks, involves significant intermediation of financial resources from some sectors to others. In recent years, the activity of this sub-sector has been growing significantly. This can be attributed not only to the increase in the desire of the population to cover the different types of risk that these entities offer but also to the growing use of a certain range of products as vehicles for saving.

The following sections of this note describe the various groups of agents that make up this sub-sector (section 2), the sources of information used and availability of the data (section 3); and the specific information contained in the various tables that make up this chapter (section 4).

#### The agents who make up the sub-sector

This sub-sector comprises four different groups of agents: private insurance corporations, mutualidades de previsión social (non-profit insurance entities), the Consorcio de Compensación de Seguros (insurance compensation consortium) and pension funds, all of which come under the supervision of the Directorate General of Insurance and Pension Funds (DGSFP).

- **Private insurance corporations** include the activity of public limited companies whose capital may be entirely Spanish, entirely foreign or a mixture of the two, private mutual insurance associations, the offices in Spain of foreign insurance corporations and reinsurance corporations resident in Spain (1).
- **Mutualidades de previsión social** are private beneficent entities generally set up by particular groups as a form of corporate support (they provide small benefits in the event of death, birth, etc. and grant small loans). They are independent of the body they originate from (companies, associations, etc.) and their purpose is to supplement social security pensions. Their main resources are the direct contributions of the members or other persons or patron entities. Membership of these entities may be voluntary or compulsory (for persons belonging to certain professional associations, groups or companies). This group includes cajas de pensiones sustitutorias (substitute pension funds), which existed until 1984 in the Spanish insurance system. These funds were created by particular groups in order to act as substitutes for the Social Security System. Additional provision five of the 1984 budget law required the groups covered by these funds (both retired and active employees) to be transferred to the Social Security System, so that the role of these entities then became one of supplementing social security, a status that they still have today.
- **The Consorcio de Compensación de Seguros (CCS)** is a public law entity with its own legal personality. Its object is to cover extraordinary risks to persons and property. It is basically financed by surcharges on the premiums paid by policyholders of all types of insurance, by State grants and loans and by direct premiums. In addition, it acts as the State's agent in dealings with the Spanish export credit company (CESCE), the public-sector private insurance corporation of which manages, on behalf of the State, the cover of political risks and certain commercial risks to Spanish exports. This latter activity of the CCS is not included in the series, since it is attributed directly to the State.
- **Pension funds** are funds created pursuant to Law 8/1987 of 8 June 1987. They are portfolios of assets separate and independent from the entities that promote them, but without separate legal status. They are made up of funds earmarked for the purposes laid down in the corresponding pension scheme. Their management is entrusted to a managing entity and a custodian, under the supervision of a control committee. These funds are usually known as "autonomous" or "external pension funds" in contrast to "non-autonomous" or "internal pension funds", which are those created by certain credit institutions and non-financial corporations by means of transfers of funds to provisions or internal reserves. Internal funds appear on the balance sheet of the sector or sub-sectors that have created them (other financial institutions and non-financial corporations) and represent a liability to the workers (households) with interests in them. Normally, the balance sheet does not show any separate assets to cover the aforementioned pension rights.

#### Sources and availability of information

- **Private insurance corporations** The main source of data is the annual balance sheets and other supplementary information that insurance corporations send to the DGSFP, which is published annually in its reports. Annual aggregate data for this group are available from 1962, and relate to three different accounting plans (1962-1982, 1983-

1997 and 1998 onwards). As a result, the compilation of time series has required the Banco de España to chain the different series. This has been done by adapting the information of the two plans prior to 1998, without any breaks arising that are worthy of mention. First, the differences attributable to the different coverage in different years, indicated in footnote 1, were small at the time the chaining was carried out and, second, the other differences due to the change in the accounting plan were, likewise, minor. Also, for a sample of entities whose insurance technical provisions account for approximately 98% of the total, quarterly information is available from 1986, although with certain limitations. Specifically, this quarterly information does not include data on reinsurance entities and data are not available for the quarters of 1990 and for the first three quarters of 1998, so that in the time series these quarters are shown as unavailable.

- **Mutualidades de previsión social** Information is available from 1970, with differing content, and is obtained from the following sources:

For the period 1970-1984 the data come from the individual balance sheets of the entities themselves and from the incomplete and heterogeneous information of the Labour and Social Security Ministry (to which they reported until 1984) and the Economy Ministry. The Banco de España has estimated the series on the basis of these data.

For the period 1985-1997, inclusive, data are available from the annual statistical reports of the DGSFP, which include information relating to the mutualidades with a national scope, which are supervised by this Directorate General, and the information on entities under the supervision of the regional governments, following the transfer of responsibilities in this area.

For 1998 the series only include the data of the mutualidades de previsión social with a national scope, obtained from the quarterly reports of the DGSFP, and of the Catalan and Basque regions' mutualidades for which information is supplied directly by these two regional governments.

Since 1999 the series are Banco de España estimates based on the reports of the Spanish Confederation of Mutualidades. These estimates will be replaced by official data as and when they become available.

- **Consorcio de Compensación de Seguros** The data available for the period 1970-1982 are incomplete and from various sources, primarily the three bodies which in 1982 were merged to form the current CCS: the CCS itself, the Fondo Nacional de Garantía (National Guarantee Fund) and compulsory travel insurance. The Banco de España has estimated the relevant time series using this information. From 1983 the data are from the annual reports of the CCS itself.
- **External pension funds** Data are available from when these funds began to be created in 1988. The source is the annual statistical reports published by the DGSFP.

### The information contained in the tables of the chapter

The tables include, in the form of time series, the accounting/administrative information obtained from the DGSFP, the regional governments that supply data and the CCS. The purpose of Table 10.1 is to give an overall view of the relative importance of each of the four groups of entities that make up the sub-sector based on the aggregate balance sheet and the most important item therein: the technical provisions and own funds, in the case of pension funds. Thereafter, Tables 10.2 to 10.6 provide certain details of the assets and liabilities of the aggregated balance sheet of the sub-sector (Table 10.2) and of each of the groups of agents of which it is composed (Tables 10.3 to 10.6). The structure of all these tables is identical so that some minor adaptations have had to be made to the format of the balance sheet which each group of agents sends to the DGSFP.

### Footnotes

- Until 1997 (inclusive), the annual series presented include the activity in Spain of corporations resident in Spain (i.e., both those of Spanish nationality and the branches of foreign entities). Since then, information on the insurance business in Spain of branches that have their head office in other EU countries is not included, since the current legal framework makes no provision for these branches to submit information. As for the quarterly series, from 1996 Q1 these include the activity both in Spain and abroad of entities of Spanish nationality. In addition, from 1998, as in the case of the annual series and for the same reason, these series do not include the activity in Spain of the branches of entities that have their head office in other EU countries.

## METHODOLOGICAL NOTE

### GENERAL GOVERNMENT DEBT COMPILED ACCORDING TO THE METHODOLOGY OF THE EXCESSIVE DEFICIT PROCEDURE (EDP)

#### Introduction

The functions attributed to the Banco de España by Spanish legislation and, specifically, by the Law of Autonomy of the Banco de España and successive National Statistics Plans include notably, the compilation of a set of statistics, including government debt according to the EDP. Thus, the Banco de España regularly publishes information about government debt on the Internet, in its *Statistical Bulletin*, on a quarterly basis, and in the Economic Indicators, on a monthly basis.

This note describes the methodology used to compile EDP debt. The next section presents the various concepts of debt and indebtedness habitually used, depending on the context to which they refer. The second section then provides a description of the methodology applied. Lastly, the third section details the information published by the Banco de España.

#### Different concepts of indebtedness

In the framework of any agent's economic activity, expenses (including the net acquisition of financial assets) not financed with current revenue and capital, must be financed through the net contraction of liabilities. This generation of liabilities is usually called debt or indebtedness; however, it is necessary to differentiate between the contraction of liabilities over a period of time (flows) and the outstanding amount of these liabilities at a specific time (stocks). Consequently, flows (operations in the period) are formally called a net change in liabilities, while the stocks are formally called debt, indebtedness or outstanding liabilities. Several concepts are encompassed within this general definition of indebtedness, which are delimited by the instruments included and the methods used for their valuation, and which, consequently, must be considered together with the general definition itself. This section describes the varying coverage of the main concepts of indebtedness that are frequently used and Scheme 1 provides a comparison of them.

##### 1. Total liabilities

This is the broadest possible concept of indebtedness and is reflected in the Financial Accounts of the Spanish Economy (FASE), a quarterly publication of the Banco de España with a high degree of detail (<http://www.bde.es/webbde/en/estadis/ccff/ccff.html>). Chapter 2 of this publication presents the financial transactions (flows) and financial assets and liabilities (stocks) for all the sectors and sub-sectors into which the economy is classified, including general government. Thus, in this specific case, the FASE provide information about the financial activity of government in a full and consistent fashion which is integrated with the other sectors and sub-sectors of the economy and with general government non-financial operations; therefore, they serve as a global framework of reference for analysing general government financial activity as a whole. This publication takes the broadest possible concept of indebtedness because it includes all the liabilities incurred by general government, irrespective of type (issuance of currency, debt securities, equity and investment fund shares or units, short and long-term loans in euro or in other currencies, trade credits and other outstanding payables). The liabilities included in this concept are valued using the methodology established by the 2010 European System of Integrated Economic Accounts (ESA 2010) described in the methodological note of the FASE disseminated on the Banco de España's webpage (<http://www.bde.es/webbde/SES/Secciones/Publicaciones/PublicacionesSeriadas/NotasEstadisticas/07/nest05e.pdf>) and which uses market values in the valuation of stocks and flows of liabilities held in the form of debt securities.

The change in this indebtedness is explained by: a) net borrowing i.e. non-financial expenses less non-financial resources, according to the National Accounts criterion which, in turn, must follow the ESA 2010 rules; b) the net acquisitions in financial assets; and, c) adjustments for valuation (which arise, for example, in the case of debt securities and liabilities in currencies other than the euro).

##### 2. Debt compiled according to the EDP

This concept of indebtedness is not as broad as the previous one. The Banco de España publishes a detailed breakdown of this debt concept for each of the sub-sectors comprising general government and it is disseminated with a shorter time lag than the FASE. Likewise, it provides a very complete breakdown by instrument since it distinguishes:

- Currency and deposits (coin issuance)
- Debt securities, in euro and currencies other than the euro, by original maturity.
  - short-term
  - medium and long-term
- Loans
  - a) Lending by resident credit institutions, in euro and currencies other than the euro, by original maturity.
    - short-term (12 months or less)
    - medium and long-term (more than 12 months)
  - b) Lending by non-residents, in euro and currencies other than the euro (rest of the world)
  - c) Imputed loans by public-private partnerships and other infrastructure financing methods.<sup>1</sup>

<sup>1</sup> According to the decision of Eurostat of February 2004 on the treatment of public-private partnership contracts for the construction of infrastructure, depending on the characteristics of these contracts, some non-financial assets constructed by private contractors are reallocated to the balance sheet of general government, with consequences for the deficit and debt of this sector (<http://ec.europa.eu/eurostat/documents/1015035/2041337/Treatment+of+PPPs.pdf/af9e90e2-bf50-4c77-a1a0-e042a617c04e>).

d) Non-recourse factoring operations.<sup>2</sup>

The concept of “Debt compiled according to the EDP” principally differs from the concept of “Total liabilities” in that it does not include general government liabilities held by other general government units, trade credit and other accounts payable. Furthermore, as regards the valuation methods, debt securities are included at their nominal value in debt compiled according to the EDP (see sub-section 3 of the following section).

**Scheme 1**  
**General government: different concepts of indebtedness**  
**Percentage structure at 31.12.2014**

| Instrument                                                           |                                                | Total liabilities | Debt compiled according to the EDP |
|----------------------------------------------------------------------|------------------------------------------------|-------------------|------------------------------------|
| Currency and deposits                                                |                                                | 0.3%              | 0.3 %                              |
| Debt securities                                                      | Securities held by general government units    | 3.2%              |                                    |
|                                                                      | Other securities (short, medium and long-term) | 63.0%             | 63.0%                              |
| Long-term loans held by general government units                     |                                                | 14.2%             |                                    |
| Other long-term loans                                                |                                                | 12.6%             | 12.5%                              |
| Short-term loans held by general government units                    |                                                | 0.7%              | 0.7%                               |
| Trade credits and other liabilities                                  |                                                | 2.4%              |                                    |
| Trade credits and other liabilities held by general government units |                                                | 3.6%              |                                    |
| <b>Total</b>                                                         |                                                | <b>100%</b>       | <b>76.5%</b>                       |

These two concepts of indebtedness are not the only ones possible. Other definitions also exist in order to value this aspect of public finances such as, for example, net government debt, which would be obtained by deducting from gross debt, as envisaged in the two concepts included in this section, the stock of financial assets (with the idea that a distinction must be made between when an economic agent increases its indebtedness in order to finance a deficit and when it does so to acquire financial assets). Any concept of indebtedness has its own meaning and is valid for economic analysis provided that the area to which it refers is specified in detail. Nevertheless, it is considered worth underlining that the concept of debt compiled according to the EDP has the virtue of being defined according to uniform binding rules for all EU countries and of being scrutinised in depth by the European Commission (Eurostat), so that it is comparable across the various EU Member States. This is not the case for any definition based on the criteria of a single country. Additionally, the concept of debt compiled according to the EDP is useful at a practical level since, on one hand, it is that for which data are published with the shortest time lag and, on the other, changes in it are a good approximation of total liabilities. Total liabilities is the concept of debt used in the financial accounts compiled by all EU Member States.

#### Methodology. Debt according to the EDP

The definition of this indebtedness is regulated by Council Regulation (EC) No 479/2009 of 25 May 2009 on the application of the Protocol on the excessive deficit procedure annexed to the Treaty establishing the European Community, and by Commission Regulation (EU) No 220/2014 of 7 March 2014 amending Council Regulation (EC) No 479/2009 as regards references to the European system of national and regional accounts in the European Union. These regulations, which have in turn amended Council Regulation (EC) No 3605/93 of 22 November 1993, refer to the ESA to delimit the main terms used.

<sup>2</sup> According to the Eurostat decision of July 2012, trade credits payable by government units that are discounted by financial institutions through non-recourse factoring operations must be included in EDP debt (<http://ec.europa.eu/eurostat/documents/1015035/2041337/Statist-record-of-some-operations-rel-to-trade-credits-i.pdf/f2238d11-9257-4a0e-bd9a-39dcf1fb2cfd>).

Among other things, this legislation requires EU Member States to report to the European Commission and, specifically, to Eurostat, twice per year (at the end of March and at the end of September) the data corresponding to this definition of debt by sub-sector and with a detailed breakdown of certain items and transactions. The reporting of these data is called an EDP notification.<sup>3</sup>

For the purposes of this Note, Regulation No 479/2009, amended by Regulation No 220/2014, like its predecessor, Regulation No 3605/93, defines the concepts of general government and government debt as follows:

### *1. Institutional scope of general government*

Regulation No 479/2009 specifies that the general government sector includes the sub-sectors central government, state government [regional (autonomous) government], local government and social security funds, to the exclusion of commercial operations, as defined in ESA 2010. The exclusion of commercial operations means that the general government sector comprises only institutional units producing non-market services as their main activity.

In the case of Spain, the general government sector comprises the following four sub-sectors:

- **Central government** comprises institutional units which have general powers throughout the country and which, in Spain, include the State, the central government agencies and enterprises classified as central government.
- **Regional (autonomous) government** which includes the governing bodies of the regional (autonomous) government and the regional administrative and similar agencies. The latter group includes the universities in each region and, also, the enterprises classified as regional (autonomous) government.
- **Local government** comprises local (municipal, provincial and island) authorities, associations and groupings of municipalities, autonomous cities (Ceuta and Melilla) and the independent administrative and similar bodies reporting to them.
- **Social security funds** which include the institutional units of a legal nature and with diverse territorial scope that undertake functions relating to the provision of social benefits. Since 2000 Q1, in accordance with the sectorisation of base year 2000 and base year 2008 of the Spanish National Accounts compiled by the INE, the units performing social security functions financed through general taxation (essentially healthcare services) are classified together with the units to which they report in the central government, regional (autonomous) government and local government sub-sectors, whereas the units performing social security functions financed through social security contributions are classified in the social security fund sub-sector.

All these sub-sectors have two basic characteristics: a) they comprise institutional units whose main function is to produce non-market goods and services and/or to undertake operations to redistribute national income and wealth and, b) their principal funds come from compulsory payments made by other institutional units and not from the sale of their output.

In other words, in order to decide whether or not an institutional unit should be included in the general government sector the economic criteria established in ESA 2010 must be taken into account. These criteria determine, first, whether a unit is taken into account: the institutional legal criterion (determining whether a unit is a public or private producer and, second, whether a unit is a market or non-market producer, according to the nature of its output. On the basis of the ESA 2010 the sector general government includes those institutional units controlled by general government that are non-market producers. Non-market producers are considered to be, principally, those institutional units that do not cover more than 50% of their production costs with revenue from the sale of their products. This methodology involves, in fact, subordinating the legal criterion to the economic one when including institutional units in, or excluding them from, the general government sector and its sub-sectors, since a unit may be of a commercial nature from a legal viewpoint but fail to comply with the 50% rule, in which case it will be sectorised under general government.

### *2 Concept of government debt*

Under Regulation 479/2009 and Regulation 220/2014 government debt means the total gross debt at nominal value of the sector of "general government", with the exception of those liabilities the corresponding financial assets of which are held by the sector of "general government". Nominal value corresponds to face value. In the case of index-linked liabilities, the regulation specifies that their nominal value shall correspond to their face value adjusted by the index-related change in the value of the principal accrued to the end of the year.

As for the financial instruments which must be included, government debt shall be constituted by the liabilities of general government in the following categories according to the definitions of ESA 2010: currency and deposits, debt securities and loans.

<sup>3</sup> It should be clarified that the version of the ESA in force up to and including the September 1999 EDP notification was the second edition, published in 1979 (ESA 79). As of the March 2000 EDP notification, the version of the ESA in force was the one corresponding to 1995 (ESA 95). Interestingly, this version of the ESA was the first system of national accounts introduced by means of legislation, namely Council Regulation (EC) No 2223/96 of 25 June 1996 (called the ESA 95 Regulation), and EU countries are therefore required to use it by law. The 1979 edition of the ESA was only a "recommendation" to countries for compiling national accounts which were as uniform as possible. The September 2014 EDP notification was the first to be made in accordance with the ESA 2010, established by Regulation (EU) No 549/2013 of the European Parliament and of the Council of 21 May 2013 on the European system of national and regional accounts in the European Union.

Under the regulation, liabilities denominated in foreign currencies shall be converted into the national currency on the basis of the representative market exchange rate prevailing on the last working day of each year.

In the case of Spain, the instruments and statistical sources used to calculate government debt are included in Scheme 2 below:

**Scheme 2**  
**Instruments and sources**

| Instruments (liabilities)                        |                                      | Statistical source                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|--------------------------------------------------|--------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

| Loans granted by resident financial institutions |                                      | Information compiled through the Banco de España's Central Credit Register, obtained from the data reported by lending credit institutions. For the State the source is the General Secretariat of the Treasury and Financial Policy. The information on imputed loans by public-private partnerships and other infrastructure financing methods comes from the Spanish National Audit Office (IGAE). Since December 2012, non-recourse factoring is included, the source for which is the Central Credit Register.                      |
| Loans granted by non-residents                   |                                      | Statistics on credits and loans granted by non-residents based on the data, which for statistical purposes, must be sent by general government units to the Banco de España's Statistics Department on economic transactions and external financial assets and liabilities (Circular 4/2012 of 25 April 2012). For the State, the source is the General Secretariat of the Treasury and Financial Policy.                                                                                                                                |

### 3. Valuation Rules

The valuation rules used are as follows: the short, medium and long-term debt securities are recorded at their nominal value, according to Regulation 479/2009, taking into account that the nominal value is equal to the face value; at the same time, credits only include the part drawn down. In both cases, where the currency in which the debt securities are issued or in which the credit is arranged is not the euro, they are converted into euro applying to the currency in which the debt securities were originally issued or in which the credit was arranged, the exchange rate of that currency at the end of the period to which the outstanding balance relates.

From the foregoing it can be deduced that the Banco de España's statistics show an estimate of the indebtedness represented by debt securities and loans based on sources which are mostly external to the governments and bodies whose debt is being calculated. This reason explains why the amounts obtained from each of these governments may not coincide exactly with the amounts in the latter's internal records, which obviously are the best source of information on the indebtedness of any government. For this reason, monthly tests are performed in the case of the State and quarterly tests are undertaken in the case of the regional (autonomous) governments and main local governments (local authorities with more than 500,000 inhabitants) with information from their own internal records.

## Dissemination of information on government debt.

The Banco de España, in Chapters 11 to 14 of the *Statistical Bulletin* and in Chapters 6 and 8 of the Economic Indicators, disseminates information on its website about the debt of general government, i.e. of the institutional units classified in the general government sector and, separately, information on the debt of public enterprises, i.e. of the units reporting to general government (public producers) which are not classified as general government, whose debt is not included in the scope of the EDP and, consequently, not included in the EDP notifications to the European Commission.

The Banco de España statistics provide general government indebtedness both in absolute figures and in relative terms with respect to GDP. National GDP is used in respect of the total debt of the sector and its sub-sectors, and regional GDP is used to obtain the ratio corresponding to each regional (autonomous) government. In both cases the source of GDP is the INE's publications of Spanish National Accounts and Spanish Regional Accounts. However, since the regional GDP data are updated with a lag in respect of the national GDP data, for the years in which data on regional GDP were not available, the procedure used to calculate each regional (autonomous) government's debt/GDP ratio comprises distributing national GDP according to Spanish National Accounts according to the structure of regional GDP for the last available year.

The tables in the *Statistical Bulletin* which contain quarterly information on government debt are as follows:

### Chapter 11. General government

#### *General government*

- 11.4. Liabilities outstanding and debt according to the excessive deficit procedure (EDP). Amounts
- 11.5. Liabilities outstanding and debt according to the excessive deficit procedure (EDP). As a percentage of GDP mp
- 11.6. Debt according to the excessive deficit procedure (EDP) and financial assets held by general government. Amounts
- 11.7. Debt according to the excessive deficit procedure (EDP) and financial assets held by general government. As a percentage of GDP mp
- 11.12. Debt according to the excessive deficit procedure (EDP) by instrument
- 11.13. Debt according to the excessive deficit procedure (EDP) by counterpart sector, currency and residual maturity

#### *Public enterprises*

- 11.14. Debt of public enterprises not included in the general government sector, by general government owner unit

### Chapter 12. Central government and social security funds

#### *Central government*

- 12.6. Central government. Debt according to the excessive deficit procedure (EDP) by instrument
- 12.7. Central government. Debt according to the excessive deficit procedure (EDP) by unit
- 12.8. State. Debt according to the excessive deficit procedure (EDP) by instrument
- 12.9. Other units classified as central government. Debt according to the excessive deficit procedure (EDP) by instrument

#### *Public enterprises controlled by central government*

- 12.10. Debt of public enterprises not included in the general government sector

#### *Social security funds*

- 12.16. Debt according to the excessive deficit procedure (EDP) by instrument

### Chapter 13. Regional (autonomous) governments

#### *Regional (autonomous) governments*

- 13.6. Debt according to the excessive deficit procedure (EDP). General summary
- 13.7. Debt according to the excessive deficit procedure (EDP) by instrument
- 13.8. Debt according to the excessive deficit procedure (EDP) by institutional grouping
- 13.9. Debt according to the excessive deficit procedure (EDP) by regional (autonomous) government. Amounts
- 13.10. Debt according to the excessive deficit procedure (EDP) by regional (autonomous) government. As a percentage of GDP mp

#### *Public enterprises controlled by regional (autonomous) governments*

- 13.11. Debt of public enterprises not included in the general government sector, by regional (autonomous) government owner. Amounts
- 13.12. Debt of public enterprises not included in the general government sector, by regional (autonomous) government owner. As a percentage of GDP mp

### Chapter 14. Local governments

- 14.6. Debt according to the excessive deficit procedure (EDP). General summary
- 14.7. Debt according to the excessive deficit procedure (EDP) by instrument
- 14.8. Debt according to the excessive deficit procedure (EDP) by type of local government

The tables of the Economic Indicators that offer monthly information on government debt are as follows:

### Chapter 6. General government

- 6.2. General government. Debt according to the excessive deficit procedure (EDP)
- 6.5. State. Debt according to the excessive deficit procedure (EDP). Spain

### Chapter 8. Financial variables

- 8.8. Gross financing of Spain's general government
