ADDITIONS

Chapter 21. Primary securities market

Consistent with the recent revision of General Government Debt data under the Excessive Deficit Protocol ([see link to press release](#) (available only in Spanish)), in this update of Chapter 21 the data on debt securities issues have been revised to reflect the effect of the reclassification of Sociedad de Gestión de Activos Procedentes de la Reestructuración Bancaria (Sareb) as part of the general government sector since it was established in late 2012.

This reclassification entails a change in the data on General government sector securities issues, and a simultaneous change in the Other financial intermediaries sector. The following Chapter 21 tables are affected by this change: 21.1 (columns 2, 4, 5 and 6), 21.2 (2, 4, 5 and 6), 21.3 (4, 5, 6, 7, 8 and 9), 21.4 (4, 5, 6, 7, 8 and 9), 21.5 (5, 7, 9 and 11), 21.6 (1, 9, 10 and 11), 21.7 (1, 9, 10 and 11), 21.11 (1, 2, 6, 7, 9 and 10), 21.12 (1, 2, 6, 7, 9 and 10) and 21.15 (1, 2, 3, 4, 5, 6, 10, 11, 12, 13, 14 and 15).

The latest data (since end-2020) are not affected by the reclassification of Sareb, as it was already included in the general government sector with effect from December 2020.

EUROSYSTEM MONETARY POLICY OPERATIONS,
MONEY MARKET AND GOVERNMENT BOND

e. The European Money Markets Institute (EMMI) is to modify the current methodology for EONIA. The latter will be calculated as the €STR plus a fixed spread of 8.5 basis points as from the first publication date of the €STR, on 2 October 2019, until the discontinuation of EONIA on 3 January 2022.
See notes at the end of the chapter.

NOTES TO THE TABLES OF CHAPTER 1. MAIN ECONOMIC INDICATORS OF THE EURO AREA

Table 1.2. Saving, investment and financing

Source: ECB.

a. Non-consolidated data.

b. Including net acquisition of valuables and non produced assets.

Table 1.6. EDP (Excessive Deficit Procedure) deficit of General Government

Sources: Eurostat and ECB.

a. The data correspond to ESA 2010.

Table 1.7. EDP (Excessive Deficit Procedure) debt of General Government

Sources: Eurostat and ECB.

a. The data correspond to ESA 2010.

Table 1.8. Aggregated and consolidated balance sheet and transactions (adjusted flows) of the euro area MFIs, including the Eurosystem

Sources: ECB and in-house calculations.

a. Also includes the counterpart of Central Government monetary transactions.

Table 1.9. Euro area monetary aggregates and counterparts of M3. Summary

Sources: ECB and in-house calculations.

Table 1.10. Euro area monetary aggregates and counterparts of M3. Consolidated balances. Original series

Source: ECB.

a. Data refer to the changing composition of the euro area.

b. Incorporates the adjustments made to certain instruments (shares in money market funds, money market instruments and securities other than shares issued with a maturity of up to two years), issued by MFIs resident in the euro area, in order to deduct that part of such issues which should not be included in M3 as it is held by non-residents. These adjustments, which it was not possible to make until 2001 owing to the limitations of the statistical sources, have been introduced in two stages and have entailed modification of the time series from January 1999, inclusive, onwards. In the first stage (May 2001), that part of the series corresponding to shares in money market funds was revised and in the second stage (October 2001), the part corresponding to all other instruments. For further details see Box 1 in the November 2001 issue of the ECB Monthly Bulletin.

For data as from the reference period June 2010, and henceforth, repo operations conducted through central counterparties (CCPs) are excluded from the M3 component "repurchase agreements", and reverse repo operations conducted through CCPs are excluded from the M3 counterpart position "loans to other euro area residents". These items are instead now included in the residual category "Net remaining". c. Includes loans and securities.

Table 1.11. Euro area monetary aggregates and counterparts of M3. Transactions (adjusted flows). Original series

a. Data refer to the changing composition of the euro area.

b. See note (b) to the table 1.10.

c. Includes loans and securities.

Table 1.12. Euro area monetary aggregates and counterparts of M3. Consolidated balance-sheet and transactions (adjusted flows). Seasonally adjusted series

Source: ECB.

a. Data refer to the changing composition of the euro area.

b. For the details of the method used to calculate the seasonally adjusted series, see the ECB publication "Seasonal adjustment of monetary aggregates and HICP for the euro area", August 2000.

c. See note (b) to the table 1.10.

Table 1.13. Contribution of the MFIs resident in Spain to the euro area monetary aggregates and counterparts of M3

Source: ECB.

a. Data refer to the changing composition of the euro area.

b. This table is a requirement of the IMF in connection with the Special Data Dissemination Standard (SDDS).

c. See note (b) to the table 1.10.

d. Includes loans and securities.

e. These aggregates exclude cash held by the public, which is included under the counterparts. Since January 2002, cash held by the public has been calculated by applying to the euro banknotes in circulation the percentage assigned by the Banco de España in accordance with Eurosystem accounting arrangements (see the footnote to the summary balance sheet at the end of this bulletin), plus coins in euro and banknotes and coins in pesetas not converted into euro, minus MFIs' holdings of cash. Since January 2003, banknotes and coins in pesetas not converted into euro have been excluded.

Table 1.14. Euro area monetary aggregates and the contribution of MFIs resident in Spain to the aggregates

Sources: ECB and BE.

a. Data refer to the changing composition of the euro area.

b. Rates computed using transactions (adjusted flows).

c. The contribution of MFIs resident in Spain refers to the original unadjusted series.

- d. Includes loans and securities.
- e. Rates calculated on the basis of contributions which exclude cash (see note (e) to Table 1.13).

Table 1.15. Interest rates

Source: ECB.

- a. With the exception of the overnight rate to December 1998, monthly and yearly values are period averages.
- b. To December 1998, 3-year euro area yields are end-of-period values and 10-year yields are period averages. Thereafter, all yields are period averages.
- c. Before January 1999 synthetic euro area rates were calculated on the basis of national rates weighted by GDP.
- d. From January 1999, column 5 shows the euro overnight index average (EONIA); other euro area money market rates from January 1999 are euro interbank offered rates (EURIBOR).
- e. The annual percentage rate of charge is the weighted average rate across all maturities and equals the total cost of the loans. These total costs comprise an interest rate component and a component of other charges.
- f. Interest rates on loans up to EUR 1 million.

Table 1.16. Exchange rates

Source: ECB, Economic Bulletin, "Statistics", tables 2.8 and 2.9

- a. To December 1998, rates for the ECU (source BIS); from January 1999, rates for the euro.
- b. The effective exchange rates of the euro are ECB calculated indices based on weighted averages of bilateral euro exchange rates. A positive change denotes an appreciation of the euro. Weights are based on manufactured goods trade with the main trading partners and capture third-market effects. Real rate are calculated using consumer prices (CPI). For more detailed information on the calculation of effective exchange rates, see the section 2.8 general notes in the ECB's Economic Bulletin, which can be downloaded from the ECB's website (www.ecb.europa.eu).

NOTES TO THE TABLES OF CHAPTER 4. CREDIT INSTITUTIONS AND CREDIT FINANCIAL INTERMEDIARIES

General note

Chapter 4 of the *Statistical Bulletin* presents information on credit institutions plus CFIs and deposit-taking institutions (until May 1994). The basic source of this information is the individual confidential returns that credit institutions and CFIs submit to the Banco de España for supervisory purposes in relation to their activity in Spain, in accordance with the criteria and rules laid down in the Accounting Circular CBE 4/2017 and prior provisions.

The information in Chapter 8 (also relates to credit institutions and CFIs. The difference between these two sets of data arises from the fact that they are compiled on the basis of different sources of information. Thus, while the data in this chapter are, as already mentioned, drawn from the financial statements credit institutions and CFIs send to the Banco de España for supervisory purposes, those of Chapter 8 are obtained from the accounting statements used to compile statistics for the euro area and, therefore, incorporate the conceptual framework common to all the countries that make up that area. There are certain differences in sectorisation and instrument valuation (see Table 4 and the notes thereto), but the structure of these two chapters means that they can be used to complement one other. Thus, while there is greater detail in this chapter on credit instruments (commercial, mortgage, etc.), deposits (sight, time, structured, etc.), capital accounts (capital, reserves, provisions, etc.) and other assets and liabilities (accruals, derivatives, etc.), the extra detail in Chapter 8 relates to counterpart sectors and residence, indicating whether the households or NPISHs, non-financial corporations and other financial intermediaries are resident in Spain, in other euro area countries or in the rest of the world (in which case, there is no information on the counterparty). Readers' attention is drawn to these details in order that they may benefit from the complementary information in these chapters.

Table 4.A

- a. From January 2009 to April 2011 there may be small differences between total credit institutions plus CFI and the sum of deposit-taking institutions, SCIs and ICO. This is because in this period electronic money institutions were considered to be credit institutions and CFIs, but upon the entry into force of Directive 2009/110/EC of the European Parliament and of the Council, they ceased to be considered as such. Given the scant quantitative importance of these institutions, it was decided to retain their amount in the credit institution totals but it was not considered necessary to retain the breakdowns. The detail of this column is given in Tables 4.1 and 4.2. As from 2017 (March), the breakdown among Spanish institutions and foreign branches is removed.
- b. See details in Tables 4.51 and 4.52.
- c. See details in Tables 4.81 and 4.82.

Table 4.1

- a. See the breakdown by subsector in Table 8.16. There are some small differences, owing to the fact that the tables use different definitions of credit and have been updated at different times.
- b. See breakdown by instrument in Table 4.3.
- c. See details in Table 4.4.
- d. See details in Table 4.6.
- e. See details in Table 4.99.
- f. Includes non-performing doubtful loans which are those in respect of which some amount of principal, interest or any other contractually agreed expense is more than three months past-due or exceeds 25% of total debt (unless these loans are specifically classified as written-off assets). It corresponds to the amount of column 14, Table 4.99

Table 4.2

- a. See the breakdown by subsector in Table 8.16. There are some small differences, owing to the different definition of deposits and the fact that the tables have been updated at different times.
- b. See breakdown by instrument in Table 4.5.
- c. See details in Table 4.7.
- d. See details in Table 4.8.

Table 4.3

- a. The breakdown by institutional sector can be consulted in Table 8.17. There are some discrepancies between this amount and that in Table 8.26, owing to differences in the institutional scope and in the concept of credit and the fact that the tables have been updated at different times.
From January 1983 to December 1989 there may be small differences between the total and the sum of the parts (trade credit, total other fixed term loans, debts repayable on demand, financial leases and doubtful debtors). This is due to "loans assumed by the State", which has data for the mentioned period, and it is no longer published.

- b. Doubtful loans are loans in relation to which there is reasonable doubt regarding full repayment (of principal and interest) in accordance with the contractual terms. They include non-performing loans, which are those in respect of which some amount of principal, interest or contractually agreed expense is more than three months past-due. See details in Table 4.99. There may be differences between the amounts in these two tables, owing to the fact that they have been updated at different times.

Table 4.4

- a. Short securities positions reflect the amount of the financial liabilities arising from the outright sale of financial assets acquired temporarily or received on loan. However, Table 4.4 shows short positions in the assets (columns 6 and 10) and deducts them from the total figures for "securities other than shares" of residents in Spain and in the rest of the world. Thus, columns 4 and 8 contain net figures and follow the same criterion as the returns the institutions submit for statistical purposes (and, therefore, the same criterion as Chapter 8 of this Bulletin), according to which short securities positions must be deducted from the item "securities other than shares" [see Rule 71. c) iii)].

Table 4.5

- a. The breakdown by institutional sector may be consulted in Table 8.20. There are discrepancies between the amounts of these two Tables, owing to differences in the institutional scope, the fact that the tables have been updated at different times, and differences in the accounting for the acquisition of securities of securitization special purpose entities used to securitize financial assets kept on the institution's balance sheet (see changes introduced in the *Statistical Bulletin* of January 2010).
- b. Overnight deposits. From June 2017 they include saving deposits.
- c. Funds received under financial asset transfers include the funds raised by institutions through financial asset transfer transactions when the transferred financial asset cannot be derecognized as the risk and benefits associated with its ownership have not been substantially transferred.
- d. Hybrid financial liabilities are financial liabilities that include simultaneously a principal contract other than a derivative and a financial derivative known as an "implicit derivative", which is not individually transferable. The flows generated by the hybrid contract normally vary in the same way as those of the derivative considered in isolation. For example, a deposit whose interest rate depends on the changes in the price of a share.
- e. Subordinated deposits include the amount of deposits received which, for the purposes of payment priority, rank behind ordinary debt.
- f. This column includes overnight deposits, savings accounts, deposits with agreed maturity and repurchase agreements. However, mortgage covered bonds with the character of deposits and funds received under financial asset transfers are not included. Mortgage covered bonds are securities whose capital and interest are secured and when they are non-marketable they are included under deposits. Funds received under financial asset transfers are defined in footnote d to Table 4.5. The amount recorded in column 10 of Table 4.5 is broken down by province and region in Tables 4.29 and 4.31.

Table 4.6

- a. See details in Table 4.9.
- b. From January 2018 the rights on assets held under finance lease are included in column 2, furnishings and real estate

Table 4.7

- a. The valuation adjustments to equity include the amounts of the adjustments made to assets and liabilities recorded temporarily in equity, under this heading, until they are extinguished or realized, when they are recorded in the income statement.
- b. Financial assets and liabilities valuation adjustments not include the accrued interest and impairment allowances which are presented under separate headings of the assets and/or liabilities.
- c. Impairment allowances include the amounts set aside to cover impairment losses, in relation to loans and other assets.
- d. Impairment allowances, total loans, include the amounts set aside to cover both specific and general insolvency risk attributable to loans and advances to other debtors.
- e. To December 2013, this column offers information on value adjustments for asset impairment, specifically for loans, i.e. it includes exclusively specific provisions for losses on doubtful loans granted to other resident sectors. Based on the data for 2014, the cumulative amounts of the changes in fair value attributable to changes in credit risk are added to these provisions
- f. The figure of net profit (column 6) (following the same criterion of other tables in Chapter 4) includes the sum of the profit or loss of each deposit-taking institution taken individually. This figure is highly influenced by the segregation process of the savings banks' banking business to newly-created banks. Given that a significant portion of the shares of these new banks are part of the savings banks' investment portfolio, the results recorded by the banks to which the business has been transferred, are transmitted to savings banks' results, amplifying the figure of aggregate net profit (or loss) of the deposit-taking institutions as a whole. In order to facilitate interpretation of the amount of net profit (column 6), this column includes the quantity of said net profit which is due to impairment losses on investments.

Table 4.8

- a. See details in Table 4.9.

Table 4.9

- a. Trading derivatives include the fair value in favor of the institution of derivatives which do not form part of hedge accounting.
- b. Hedging derivatives include the fair value in favor of the institution of derivatives designated as hedging instruments in hedge accounting.
- c. Insurance contracts linked to pensions include the fair value of the insurance policies to cover staff pension commitments that do not meet the requirements established by Rule thirty-five of Banco de España Circular CBE 4/17 for not recording them in the balance sheet.
- d. Tax assets include the amount of all assets of a tax nature such as taxes paid on account, assets arising from unused tax losses or credits for tax deductions.
- e. Trading derivatives include the fair value of the institution's liability in respect of derivatives that do not form part of hedge accounting.
- f. Hedging derivatives include the fair value of the institution's liability in respect of derivatives designated as hedging instruments in hedge accounting.
- g. Tax collection accounts include the amount collected on behalf of general government in respect of taxes, duties, excise and social security contributions until such monies are finally made over to the relevant agency.
- h. Tax liabilities include the amount of all liabilities of a tax nature, primarily the amount payable in respect of the tax on the taxable profit for the period.

Table 4.10

- a. Includes only the amount of the specific allowances for insolvency risk attributable to loans and advances to other resident sectors.
- b. From 2014 no information is available on this breakdown.

Table 4.11

- a. The details of each general government subsector can be found in Table 8.16. There are some small differences owing to the fact that the tables use different definitions of lending and they have been updated at different times. See footnote a to Table 4.A.
- b. The breakdown by province and regional (autonomous) government may be consulted in Tables 4.28 and 4.29.
- c. The breakdown of the total by instrument appears in Table 4.3. In addition, the breakdown by institutional sector can be consulted in Table 8.17. The small discrepancies between the amounts of this table and those of Table 8.17 are attributable to differences in institutional scope and in the definition of lending and the fact that the tables have been updated at different times.

Table 4.99

- a. See notes to Table 4.1, column 12.
- b. Until the entry into force of Circular 4/2004, this amount was included in column 10.
- c. Until the entry into force of Circular 4/2004, these details were not available for credit financial intermediaries.
- d. See notes to Table 4.1 column 13.
- e. Assets considered as doubtful, since there is doubt regarding full repayment although they cannot be considered non-performing or written-off assets.
- f. Assets considered as doubtful because they are vis-à-vis countries in a certain risk group.
- g. From the entry of Circular 4/2017, this information is not available.

- b. See notes to Tables 8.18 and 8.19.
- c. As from the June 2014 edition the central counterparties are reclassified and the related amounts are included in this series. See details in Table 4.18.
- d. Includes mortgage loans until December 2013; thereafter, includes loans secured by real estate collateral, including those in the form of finance leases, whatever the real estate received as collateral
- e. Includes loans and credits to households for purposes other than consumption and house purchase and renovation, such as education.
- f. As from the June 2014 edition the central counterparties are reclassified and the related amounts are excluded from this series.
- g. This heading refers to lending to households, secured by a residential mortgage, but not for house purchase or for financing productive activities. Accordingly, these loans are included among those granted for renovation, consumer durable purchases and other purposes, i.e. they are part of columns 8 to 10.
- h. As from the June 2014 edition the central counterparties are reclassified and the related amounts are included in this series. See details in Table 4.18 (columns 12 to 22).
- i. From 2014 no information is available on this breakdown.
- j. Includes doubtful loans and credits to households for the acquisition of land, securities and current goods and services that are not considered durables (for instance, loans to finance travel) as well as those for miscellaneous purposes not included among the foregoing.
- k. Includes doubtful loans to households, secured by a residential mortgage, but not for house purchase or for financing productive activities. Accordingly, these doubtful loans are included among those granted for renovation, consumer durable purchases and other purposes, i.e. they are part of columns 21 to 23.

Table 4.31

- a. Includes residual transactions for which the institution has not been able to determine the regional (autonomous) community to which they should be assigned.

Table 4.32

- a. See breakdown by subsector in Table 8.20. There are discrepancies between the amounts of these two Tables, owing to differences in the institutional scope, the fact that the tables have been updated at different times, and differences in the accounting for the acquisition of securities of securitization special purpose entities used to securitize financial assets kept on the institution's balance sheet (see changes introduced in the *Statistical Bulletin* of January 2010).
- b. See breakdown by province and region in Tables 4.28 and 4.29.
- c. See breakdown by instrument in Table 4.5. Also, the amount of this column less MMF deposits at credit institutions and credit financial intermediaries is the same, apart from some small differences owing to the fact that the tables have been updated at different times, as that of column 1 of Table 8.20. The breakdown by institutional sector may be consulted in this latter Table.

NOTES TO THE TABLES OF CHAPTER 6. MONETARY FINANCIAL INSTITUTIONS

Certain headings of the balance sheets of monetary financial institutions according to the euro area returns, published in Chapters 6 and 8 of the Boletín Estadístico, were changed in December 2014 as a result of the entry into force of new accounting rules. These changes only affect the way in which part of the information is presented; they have no impact on the lending and deposits headings and they entail no change in equity in the institutions balance sheets.

Specifically, the entry into force of Banco de España Circular 5/2014 of 28 November 2014, which amends Circular 4/2004 of 22 December 2004 on credit institutions public and confidential financial reporting rules and formats and incorporates the statistical reporting requirements laid down by the European Central Bank¹, triggers a change in the way in which certain headings of the balance sheets according to the euro area returns are presented. This change means that, with the exception of data on loans and deposits which will continue to be reported at their principal amount, as from the December 2014 data, which are those now published, all the other headings will be reported at their carrying amount, in a further step towards harmonisation with the information reported for supervisory purposes. Accordingly, from December 2014, headings such as "Shares and other equity" on the asset side are reported net of their impairment allowances, and in turn these allowances are no longer carried over to the "Capital and reserves" heading as was the case previously (see Tables 6.2 and 6.3). This change explains the bulk of the variation seen in December 2014 in the size of the total balance sheet and of some of its components, such as "Shares and other equity" or "Capital and reserves".

(a) Total euro banknotes in circulation allocated to the Banco de España in accordance with its share in the capital of the European Central Bank. The difference between this amount and the net amount effectively placed in circulation by the ECB (Column 2) is recorded as an intra-Eurosystem claim/liability relating to banknote issuance (see Table 7.2 and the note to the summary Banco de España's balance sheet at the end of this Bulletin).

(b) This amount may be negative if the Banco de España puts into circulation fewer banknotes than it withdraws, since there are banknotes in circulation which were actually distributed by another Eurosystem central bank. This effect is significant due to, among other things, the high tourist inflow into Spain. Note that this column does not state the euro banknotes actually in circulation in Spain, but rather the banknotes distributed in net terms by the Banco de España.

(c) Banknotes distributed less banknotes withdrawn in each period. Calculated as the difference between column 1 of Table 7.17 (distributed) and column 1 of Table 7.18 (withdrawn).

- b. See breakdown in table 7.5.
- c. See breakdown in table 7.7.

Table 7.2

- a. See breakdown in tables 7.8 and 7.9.
- b. See breakdown in table 7.10.
- c. See breakdown in table 7.11.
- d. Including, since January 2002, the percentage of all euro banknotes in circulation allocated to the Banco de España under the accounting system established for the Eurosystem (see note to the summary balance sheet at the end of this bulletin).
- e. From January 2003, only the amount of banknotes allocated by the Eurosystem is included here.
- f. From January 2003, only the amount of euro coins is included here.
- g. Comprising the notes and coins actually put into circulation by the Banco de España (see tables 7.16 to 7.17).

Table 7.3

a. See breakdown in table 7.4.

Table 7.5

a. See breakdown in table 7.6.

Table 7.8

a. See breakdown in table 7.9.

Table 7.11

a. Until December 1998 repos are included in column 3 as separate data were not available.

Table 7.12

a. The design of this table follows the IMF's Special Data Dissemination Standard (SDDS) and is, thus, an alternative to that of tables 7.1 and 7.2.

Table 7.16

- a. Total euro banknotes in circulation allocated to the Banco de España in accordance with its share in the capital of the European Central Bank. The difference between this amount and the net amount effectively placed in circulation by the ECB (Column 2) is recorded as an intra-Eurosystem claim/liability relating to banknote issuance (see Table 7.2 and the note to the summary Banco de España's balance sheet at the end of this Bulletin).
- b. This amount may be negative if the Banco de España puts into circulation fewer banknotes than it withdraws, since there are banknotes in circulation which were actually distributed by another Eurosystem central bank. This effect is significant due to, among other things, the high tourist inflow into Spain. Note that this column does not state the euro banknotes actually in circulation in Spain, but rather the banknotes distributed in net terms by the Banco de España.
- c. Banknotes distributed less banknotes withdrawn in each period. Calculated as the difference between column 1 of Table 7.17 (distributed) and column 1 of Table 7.18 (withdrawn).

Table 7.19

a. Since January 2003, this total for euro coins, plus the total for banknotes placed in circulation by the Banco de España (table 7.16, column 1) make up the cash placed in circulation by the Banco de España (table 7.2, column 16). Until December 2002, the cash placed in circulation by the Banco de España is made up of the total for euro banknotes, plus the total for euro coins placed in circulation, plus unreturned peseta banknotes and coins (table 7.16, column 16 and table 7.17, column 17).

CHAPTER 8 OTHER MONETARY FINANCIAL INSTITUTIONS

NOTICE RELATED TO THE CHAPTER 8

Changes made to the series from June 2005

This chapter includes credit institutions (along with money market funds), although with an alternative presentation to that of Chapter 4. Its tables are based on Rule seventy-one and Annex VII of CBE 4/4004 (to apply IFRS to credit institutions), approved on 22 December 2004, which refer to the EMU statistical requirements. Although the returns have not been changed significantly, they have been affected by the new accounting rules. Accordingly, although these tables continue to be updated, there have been some changes as a consequence of the entry into force of the new Circular. The most relevant are: a) savings accounts, classified until May 2005 as deposits redeemable at notice up to three months (column 12 of Table 8.44 and columns 6 and 12 of Table 8.9, among others), are now included within overnight deposits (column 9 of Table 8.44 and columns 3 and 9 of Table 8.9, among others). This change is reflected in the tables of the interest rates of these instruments (Tables 9 and 15 of Chapter 19 relating to the interest rates of credit institutions); and b) the return to the balance sheet of some of the securitised assets that had been removed from the balance sheet in application of the rules in force until the approval and entry into force of CBE 4/2004. This change has led to an exceptional increase in the amount of credit (column 6 of Table 8.41 and column 6 of Table 8.2, among others) and in time deposits (column 6 of Table 8.42 and column 6 of Table 8.3, among others).

General note: Many columns are broken down in subsequent tables, as indicated at the foot of each table.

NOTES TO THE TABLES OF CHAPTER 8. OTHER MONETARY FINANCIAL INSTITUTIONS

Certain headings of the balance sheets of monetary financial institutions according to the euro area returns, published in Chapters 6 and 8 of the Statistical Bulletin, were changed in December 2014 as a result of the entry into force of new accounting rules. These changes only affect the way in which part of the information is presented; they have no impact on the lending and deposits headings and they entail no change in equity in the institutions' balance sheets.

Specifically, the entry into force of Banco de España Circular 5/2014 of 28 November 2014, which amends Circular 4/2004 of 22 December 2004 on credit institutions public and confidential financial reporting rules and formats and incorporates the statistical reporting requirements laid down by the European Central Bank¹, triggers a change in the way in which certain headings of the balance sheets according to the euro area returns are presented. This change means that, with the exception of data on loans and deposits which will continue to be reported at their principal amount, as from the December 2014 data, which are those now published, all the other headings will be reported at their carrying amount, in a further step towards harmonisation with the information reported for supervisory purposes. Accordingly, from December 2014, headings such as "Shares and other equity" on the asset side are reported net of their impairment allowances, and in turn these allowances are no longer carried over to the "Capital and reserves" heading as was the case previously (see Tables 8.2 and 8.3). This change explains the bulk of the variation seen in December 2014 in the size of the total balance sheet and of some of its components, such as "Shares and other equity" or "Capital and reserves".

(a) The amounts relating to total financial assets in each sub-sector (according to the System of National and Regional Accounts ESA 2010: breakdowns 1, 2, 3, 4, 5 and A, Non-Monetary Financial Institutions Sub-sector, sector breakdowns B and Non-banking Financial Institutions) are calculated from the Financial Accounts of the Spanish Economy, where financial instruments are valued at market prices and a ranking of sources is applied. However, the breakdown by entity type within each sub-sector is calculated from statistical information on total balance-sheet assets. Therefore, differences may arise in the total assets of each sub-sector, when calculated either using the Financial Accounts methodology or by aggregation of the constituent entities.

When the statistical information on any type of entity required for the preparation of the quarterly financial accounts is not available, the financial accounts are obtained using subsector estimates, even if a full breakdown to the level of individual agents is not available.

(b) Listed real-estate investment companies (SOCIMIS, known internationally as real estate investment trusts or REITs) are governed by Law 11/2009. Since Law 16/2012, that reviewed SOCIMIs legal status (mainly tax regime), this sector started its development.

(c) These entities are included in the monetary financial institutions sub-sector.

NOTES TO THE TABLES OF CHAPTER 9. APPRAISAL COMPANIES

Overview

These tables, which are only available in the electronic edition of the *Statistical Bulletin*, contain information of the activity and financial statements of appraisal companies. The scope of this information is limited to the data compiled by the Banco de España in accordance with CBE 3/1998 of 27 January 1998 (amended by CBE 2/2009 and CBE 5/2003).

The tables contain information, broken down by appraised assets, on the number of appraisals (Table 9.30), on the amount of appraisals (Table 9.31) and on the appraised usable area of properties (Table 9.32). This information has been used to obtain the series on average value of appraised square metre (Table 9.33), which should not be interpreted as a reference price per unit of area, given the heterogeneity of the appraised properties included in the various aggregates. Nor can it be considered an accurate indicator of price behaviour, since it is not based on a homogeneous sample over time of appraised properties. Tables 9.34 and 9.35 give the number and amount of appraisals by type of customer and purpose of appraisal and Tables 9.36 to 9.41 contain a geographical breakdown. Finally, information is provided on the balance sheets (Table 9.42) and profit and loss accounts of appraisal companies (Table 9.43).

Notes on Tables 9.30 to 9.43

Tables 9.30, 9.31 and 9.32

- a. Buildings are classified according to their main use, based on the area devoted to each use. Since 1998 buildings under construction are included only at the value of the finished building. Intermediate appraisals are included only under the related heading in memorandum items.
- b. Non-buildable land, excluding that relating to an economic activity permitted under current legislation and that included in rural property. See Note (c).
- c. Refers to any building or part thereof relating to an economic activity or business operation: hotels, residences, hospitals, industrial facilities, transport centres, community facilities, etc.
- d. Including urban development works, etc. Until 2003 includes non-buildable land.
- e. Intangible assets, companies, machinery, fixtures, other physical assets, goodwill, options and other assets.
- f. Includes those less than two years old, except when they must appear as new appraisals because of a significant change in the appraised asset. Until 1997, inclusive, this heading included intermediate appraisals.
- g. Intermediate appraisals must include the net increments in value of the certificates issued after the initial appraisal or during the construction or rehabilitation of a building.
- h. Irrespective of whether the various buildings or parts thereof are included under the relevant headings.

Table 9.33

- a. The property items whose average values are of most significance or interest have been selected. The full information available for calculating the average values is given in Tables 9.31 and 9.32.

Table 9.36

- a. The detail by Regional (Autonomous) Government is given in Table 9.38.
- b. The detail by Regional (Autonomous) Government is given in Table 9.39.

Table 9.37

- a. The detail by Regional (Autonomous) Government is given in Table 9.40.
- b. The detail by Regional (Autonomous) Government is given in Table 9.41.

Table 9.38

- a. The total is given in column 2 of Table 9.36.
- b. Includes Ceuta and Melilla.

Table 9.39

- a. The total is given in column 9 of Table 9.36.
- b. Includes Ceuta and Melilla.

Table 9.40

- a. The total is given in column 2 of Table 9.37.
- b. Includes Ceuta and Melilla.

Table 9.41

- a. The total is given in column 9 of Table 9.37.
- b. Includes Ceuta and Melilla.

Table 9.42

a. Number of institutions sending information on their activity and financial statements.

Table 9.43

a. Gains or losses on financial transactions include, in addition to financial revenue and expenses, the following income statement captions: Change in fair value of financial instruments, Exchange differences and Impairment and gains (losses) on disposal of financial instruments.

NOTES TO THE TABLES OF CHAPTER 11: GENERAL GOVERNMENT

Table 11.1

a. Liabilities issued by general government and held by other general government units, other accounts payable and adjustments for differences between the market value and the nominal value of the liabilities net incurrence of shares and other equity (PF.5), as well as other adjustments resulting from the reclassification of institutional units and other changes in the information.

b. The figures for GDP at market prices are calculated using the official series of the Spanish Quarterly National Accounts (CNE) published by the INE, by aggregating the last four quarters as at each reference date.

Note: Any discrepancies between the data in this table and in Table 2.9 are due to revisions made after the submission of the EDP notification to the European Commission.

Table 11.2

Note: The quarterly percentages are calculated: 1) When the GDP for the four quarters of the year in question is available, using the GDP for that year; 2) when the GDP for the four quarters of the year in question is not available, using the annual GDP obtained by aggregating the quarterly GDP figures for the last four quarters. See notes to Table 11.1.

Table 11.3

See notes to Table 11.1 and 11.2.

Table 11.4

See notes to Table 11.1

Table 11.5

See notes to Table 11.2

Table 11.6

a. General government EDP debt does not include financial assets/liabilities incurred by general government and held by other general government units (columns 3, 6, 9 and 12).

b. Financing by the Autonomous Region Liquidity Fund (FLA), payments made to creditors on behalf of the Regional (autonomous) Government and Local Governments by the Fund for the Payment of Creditors (FFPP) and Social Security loan.

c. Debt issued by the State held by the Fondo de Garantía Salarial (FOGASA), the Mutuas de Accidentes de Trabajo y Enfermedades Profesionales and the Fondo de Prevención y Rehabilitación.

Table 11.7

Note: The quarterly percentages are calculated: 1) When the GDP for the four quarters of the year in question is available, using the GDP for that year; 2) when the GDP for the four quarters of the year in question is not available, using the annual GDP obtained by aggregating the quarterly GDP figures for the last four quarters. See notes to Table 11.6.

Table 11.8

a. Annual change in column 11 of Table 11.1.

b. A positive figure means that this item increases debt and a negative figure means that it decreases debt. c. Breakdown of column in Table 11.10.

d. Includes effects such as those produced by the reclassification of institutional units or financial items.

e. Includes adjustments for interest accrued less interest paid, for issue or redemption premiums, for the difference between the nominal and cash amount of discounted issues, for capital losses or gains arising from early payment of liabilities, for discrepancies between the net lending (+) or net borrowing (-) and net financial transactions and net incurrence of shares and other equity (PF.5).

Table 11.9

Note: The quarterly percentages are calculated: 1) When the GDP for the four quarters of the year in question is available, using the GDP for that year; 2) when the GDP for the four quarters of the year in question is not available, using the annual GDP obtained by aggregating the quarterly GDP figures for the last four quarters. See notes to Table 11.8.

Table 11.12

a. Already deducted from columns 3 to 9.

Note: Any discrepancies between the data in this table and in Table 2.9 are due to revisions made after the submission of the EDP notification to the European Commission.

Table 11.13

Note: Any discrepancies between the data in this table and in Table 2.9 are due to revisions made after the submission of the EDP notification to the European Commission.

Table 11.15

- a. The units included here as public enterprises are the main non-administrative agencies, entities and enterprises not classified under regional (autonomous) government.
- b. The figures for GDP at market prices are calculated using the official series of the Spanish Quarterly National Accounts (CNE) published by the INE, by aggregating the last four quarters as at each reference date.

Table 11.16

- a. As a result of the reform of the Common Agricultural Policy (CAP) in 2004 (Council Regulation (EC) No 1782/2003 and subsequent provisions), and pursuant to Council Regulation (EC) 1290/2005, two new European agricultural funds have been created, the European Agricultural Guarantee Fund (EAGF) and the European Agricultural Fund for Rural Development (EAFRD). These funds replace the two sections of the former European Agricultural Guidance and Guarantee Fund (EAGGF): Guarantee and Guidance.
- b. Likewise, pursuant to Council Regulation (EC) No 1198/2006, the Financial Instrument for Fisheries Guidance (FIFG) has been replaced by the European Fisheries Fund (EFF).

NOTES TO THE TABLES OF CHAPTER 12. CENTRAL GOVERNMENT AND SOCIAL SECURITY FUNDS

Table 12.1

a. Liabilities issued by central government and held by other central government units, other accounts payable and adjustments for differences between the market value and the nominal value of the liabilities net incurrence of shares and other equity (PF.5), as well as other adjustments resulting from the reclassification of institutional units and other changes in the information.

b. The figures for GDP at market prices are calculated using the official series of the Spanish Quarterly National Accounts (CNE) published by the INE, by aggregating the last four quarters as at each reference date.

Table 12.2

Note: The quarterly percentages are calculated: 1) When the GDP for the four quarters of the year in question is available, using the GDP for that year; 2) when the GDP for the four quarters of the year in question is not available, using the annual GDP obtained by aggregating the quarterly GDP figures for the last four quarters.

See notes to Table 12.1.

Table 12.3

a. Annual change in column 9 of Table 12.1.

b. A positive figure means that this item increases debt and a negative figure means that it decreases debt.

c. Breakdown of column in Table 12.5.

d. Includes effects such as those produced by the reclassification of institutional units or financial instruments.

e. Includes adjustments for interest accrued less interest paid, for issue or redemption premiums, for the difference between the nominal and cash amount of discounted issues, for capital losses or gains arising from early payment of liabilities and net incurrence of shares and other equity (PF.5).

Table 12.4

See notes to Table 12.3

Table 12.6

a. Breakdowns of debt securities by instrument and of issues denominated in euro and in other currencies are given in Tables 21.12, 21.13 and 21.15. The difference between column 4 of this table 'Total debt securities' and column 1 of Table 21.12 'Total securities other than shares, except financial derivatives' arises from the fact that debt according to the methodology of the excessive deficit protocol excludes the securities held by other general government units and takes currency swaps into account.

b. Not deducted from column 1.

Table 12.10

a. The units included here as public enterprises are the main non-administrative agencies, entities and enterprises not classified under central government. For ease of comparison with the central government debt shown in this chapter, the debt of public enterprises shown in this table has been calculated using the EDP methodology. The debt of public enterprises does not fall within the scope of the EDP and, therefore, unlike the debt of general government (public debt), it is not included in the notifications sent to the European Commission.

b. As a consequence of the reallocation of assets and liabilities prompted by RDL 7/2004 of 27 September 2004, between November and December 2004, an amount of €5,458 million that formed part of the debt of RENFE was assumed by the State.

c. Law 39/2003 on the railway industry of 17 November 2003 reorganised the state railway industry, the management of the railway infrastructure (which was previously entrusted to RENFE and GIF) being entrusted to ADIF. Also RENFE-Operadora was set up, as a company providing railway transport services. This company assumed the resources and assets previously assigned by RENFE to the provision of railway services.

Table 12.11

a. Liabilities issued by social security funds and held by other social security funds, other accounts payable and adjustments for differences between the market value and the nominal value of the liabilities net incurrence of shares and other equity (PF.5), as well as other adjustments resulting from the reclassification of institutional units and other changes in the information.

b. The figures for GDP at market prices are calculated using the official series of the Spanish Quarterly National Accounts (CNE) published by the INE, by aggregating the last four quarters as at each reference date.

Table 12.12

Note: The quarterly percentages are calculated: 1) When the GDP for the four quarters of the year in question is available, using the GDP for that year; 2) when the GDP for the four quarters of the year in question is not available, using the annual GDP obtained by aggregating the quarterly GDP figures for the last four quarters.

See notes to Table 12.11.

Table 12.13

- a. Annual change in column 9 of Table 12.11.
- b. A positive figure means that this item increases debt and a negative figure means that it decreases debt.
- c. Breakdown of column in Table 12.15.
- d. Includes effects such as those produced by the reclassification of institutional units or financial instruments.

NOTES TO THE TABLES OF CHAPTER 13: REGIONAL (AUTONOMOUS) GOVERNMENTS

Table 13.1

a. Liabilities issued by Regional (autonomous) Governments and held by other Regional (autonomous) Governments, other accounts payable and adjustments for differences between the market value and the nominal value of the liabilities net incurrence of shares and other equity (PF.5), as well as other adjustments resulting from the reclassification of institutional units and other changes in the information.

b. The figures for GDP at market prices are calculated using the official series of the Spanish Quarterly National Accounts (CNE) published by the INE, by aggregating the last four quarters as at each reference date.

Table 13.2

Note: The quarterly percentages are calculated: 1) When the GDP for the four quarters of the year in question is available, using the GDP for that year; 2) when the GDP for the four quarters of the year in question is not available, using the annual GDP obtained by aggregating the quarterly GDP figures for the last four quarters.

See notes to Table 13.1.

Table 13.3

a. Annual change in column 9 of Table 13.1.

b. A positive figure means that this item increases debt and a negative figure means that it decreases debt.

c. Breakdown of column in Table 13.5.

d. Includes effects such as those produced by the reclassification of institutional units or financial instruments.

e. Includes adjustments for interest accrued less interest paid, for issue or redemption premiums, for the difference between the nominal and cash amount of discounted issues, for capital losses or gains arising from early payment of liabilities and net incurrence of shares and other equity (PF.5).

Table 13.4

See notes to Table 13.3.

Table 13.7

a. A breakdown of issues into those denominated in euro and those denominated in currencies other than the euro is given in Table 21.18. The difference between column 3 of this table, 'total debt securities issued' and column 1 of table 21.18 'total debt securities issued excluding financial derivatives' arises from the fact that debt according to the methodology of the excessive deficit procedure takes into account the currency swaps carried out by the various regional (autonomous) governments.

Table 13.8

a. Includes the governing bodies of the regional (autonomous) governments.

b. The figures for GDP at market prices are calculated using the official series of the Spanish Quarterly National Accounts (CNE) published by the INE, by aggregating the last four quarters as at each reference date.

Table 13.9

a. Each regional (autonomous) government includes the units concerned with the general administration of the region, the universities located within its territory and those bodies and enterprises reporting to the regional (autonomous) government that are classified under general government. The Autonomous Cities of Ceuta and Melilla are classified in subsector Local Governments of the national accounting system.

b. The provincial councils of the Basque Country are classified in subsector Local Governments of the national accounting system. Table 14.8, column 16, provides information about the debt of the provincial councils of the Basque Country

Table 13.10

c. The figures for GDP at market prices used for the total are calculated using the official series of the Spanish Quarterly National Accounts (CNE) published by the INE, by aggregating the last four quarters as at each reference date. For the individual regional (autonomous) governments, the regional GDP mp published in the Spanish Regional Accounts (CRE) of the INE has been applied to the national GDP mp.

See notes to Table 13.9.

Table 13.11

a. The units included here as public enterprises are the main non-administrative agencies, entities and enterprises of the regional (autonomous) governments, which are classified as Public Administration. For ease of comparison with the general government debt shown in the previous tables (which is public debt, as narrowly defined), the debt of public enterprises shown in this table has been calculated using EDP methodology. The debt of public enterprises does not fall within the scope of the EDP, and therefore, unlike the debt of general government (public debt), it is not included in the notifications sent to the European Commission.

Table 13.12

c. The figures for GDP at market prices used for the total are calculated using the official series of the Spanish Quarterly National Accounts (CNE) published by the INE, by aggregating the last four quarters as at each reference date. For the individual regional (autonomous) governments, the regional GDP mp published in the Spanish Regional Accounts (CRE) of the INE has been applied to the national GDP mp.

See note a to Table 13.11 and note b to table 13.9.

NOTES TO THE TABLES OF CHAPTER 14. LOCAL GOVERNMENTS

Table 14.1

a. Liabilities issued by Local Governments and held by other Local Governments, other accounts payable and adjustments for differences between the market value and the nominal value of the liabilities net incurrence of shares and other equity (PF.5), as well as other adjustments resulting from the reclassification of institutional units and other changes in the information.

b. The figures for GDP at market prices are calculated using the official series of the Spanish Quarterly National Accounts (CNE) published by the INE, by aggregating the last four quarters as at each reference date.

Table 14.2

Note: The quarterly percentages are calculated: 1) When the GDP for the four quarters of the year in question is available, using the GDP for that year; 2) when the GDP for the four quarters of the year in question is not available, using the annual GDP obtained by aggregating the quarterly GDP figures for the last four quarters.

See notes to Table 14.1.

Table 14.3

a. Annual change in column 9 of Table 14.1.

b. A positive figure means that this item increases debt and a negative figure means that it decreases debt.

c. Breakdown of column in Table 14.5.

d. Includes effects such as those produced by the reclassification of institutional units or financial instruments.

e. Includes adjustments for interest accrued less interest paid, for issue or redemption premiums, for the difference between the nominal and cash amount of discounted issues, for capital losses or gains arising from early payment of liabilities and net incurrence of shares and other equity (PF.5).

Table 14.4

See notes to Table 14.3.

Table 14.7

a. A breakdown of issues into those denominated in euro and those denominated in currencies other than the euro is given in Table 21.18.

Table 14.8

a. Classified under local government are the municipal, ordinary-regime and specific-status provincial and island authorities, municipal groupings, and those bodies and enterprises subordinate to local government that are classified under general government.

b. The figures for GDP at market prices are calculated using the official series of the Spanish Quarterly National Accounts (CNE) published by the INE, by aggregating the last four quarters as at each reference date.

NOTES TO THE TABLES OF CHAPTER 15

Definition of the ratios included in tables 15.6 to 15.27

$$\begin{aligned}R1 &= [(27+29)/(10-14-17)]*100 \\R2 &= [27/(13+16)]*100 \\R3 &= (29/11)*100 \\R4 &= R1 - R2 \\R5 &= (24/18)*100 \\E1 &= [(13+16)/(10-14-17)]*100 \\E2 &= (13+16)/(24+25)*100 \\Interest\ burden &= [27/(24+25)]*100\end{aligned}$$

B. PROFIT AND LOSS ACCOUNT

(See rates of change in Tables 15.1 to 15.6)

18. Value of output (including subsidies)
19. Net turnover
20. Other operating income
21. Inputs (including taxes)
22. Gross value added at factor cost (18-21)
23. Personnel costs
24. Gross operating profit (22-23)
25. Financial revenue.
26. Financial costs
27. Interest on borrowed funds
28. Depreciation and operating provisions
29. Ordinary net profit (24+25-26-28)
30. Corporate income tax
31. Other income and expenses
32. Profit/loss for the year (29-30-31)

Tables 15.3 and 15.6

- a. The quarterly series of year n for quarter t includes the rates of the cumulative data for year n up to quarter t, compared with the same period a year earlier.

Tables 15.8, 15.14 and 15.17

- a. The ordinary net profit (ONP) used to calculate this ratio includes, for each quarter, the proportional part of the dividends received up to that quarter from the beginning of the year, determined on a straight-line basis; the ratio of Table 15.9 provides cumulative information for each period (Q1, Q1-Q2, Q1-Q3, Q1-Q4) in which the total dividend received is included.

Tables 15.9, 15.12, 15.15, 15.18 and 15.21

- a. The quarterly series of year n for quarter t includes the ratios of the cumulative data for year n up to quarter t.

Tables 15.23, 15.25 and 15.27

- a. Columns t and t-1 in the annual frequency block refer to the fourth quarter of year t and the fourth quarter of year t-1. In the quarterly frequency block, columns t and t-1 contain the information of the quarter in question (t) and of that immediately preceding it (t-1), respectively.

Tables 15.28 and 15.29

Note: Ratios FSI.1 and FSI.2nd have been prepared in accordance with the methodology defined by the IMF in its document *Financial Soundness Indicator. Compilation Guide*.

a. Figures for 2010 and 2011, both for total and for different aggregates by sector and size, are obtained by applying the rate of change of the previous base to the current base.

b. Data from the last period is an estimate made from the latest quarterly information received in the quarterly survey of the Central balance sheet data office (CBQ).

...: Amount not disclosed due to statistical confidentiality reasons.

- : Nil.

a. The composition of economic areas is detailed in the notes at the end of the chapter.

b. The difference between the amount assigned to the world total and the sum of the amounts for all the geographical areas is due to data without a geographical assignment and data from international institutions other than European Union. The presence of information without geographical assignment may also promote that the total amount for continents are not necessarily equal to the sum of their components.

c. In the case of portfolio investment, the geographical breakdown of the investment income from liabilities (payments) is based on the available information. This refers to the first non-resident counterpart, which does not necessarily correspond to the final holder of the securities.

a. The difference between the amount assigned to the world total and the sum of the amounts for all the geographical areas is due to data without a geographical assignation and data from international institutions other than European Union. The presence of information without geographical assignation may also promote that the total amount for continents are not necessarily equal to the sum of their components.

b. Inaccurate data according to the primary-source sampling error. In these cases the primary source, namely ECIS - Encuesta de Comercio Internacional de Servicios (survey on international trade in services), conducted by the INE - has a very high weight in total services and the coefficients of variation exceed on average the limits considered acceptable in terms of data accuracy.

a. The difference between the amount assigned to the world total and the sum of the amounts for all the geographical areas is due to data without a geographical assignation and data from international institutions other than European Union. The presence of information without geographical assignation may also promote that the total amount for continents are not necessarily equal to the sum of their components.

b. Inaccurate data according to the primary-source sampling error. In these cases the primary source, namely ECIS - Encuesta de Comercio Internacional de Servicios (survey on international trade in services), conducted by the INE - has a very high weight in total services and the coefficients of variation exceed on average the limits considered acceptable in terms of data accuracy.

17. BALANCE OF PAYMENTS AND INTERNATIONAL INVESTMENT POSITION
A) Balance of payments

a. La composición de las zonas económicas se detalla en las notas al final del capítulo. / The composition of economic areas is detailed in the notes at the end of the chapter.
b. La diferencia entre los importes asignados al total mundial y la suma de las zonas geográficas corresponde a información que ha quedado indeterminada geográficamente y a las cantidades de organismos internacionales distintos de los de la Unión Europea. La existencia de información indeterminada geográficamente también puede provocar que los totales por continente no coincidan con la suma de sus partes cuando estos se desglosan. / The difference between the amount assigned to the world total and the sum of the amounts for all the geographical areas is due to data without a geographical assignment and data from international institutions other than European Union. The presence of information without geographical assignment may also promote that the total amount for continents are not necessarily equal to the sum of their components.

a. Other financial assets and liabilities include other equity which does not take the form of securities and is not included in portfolio investment (this is the case of some stakes in international organisations), trade credit and advances, other accounts receivable/payable, insurance, pension schemes, standardised guarantee systems and allocations of special drawing rights.

a. The composition of economic areas is detailed in the notes at the end of the chapter.

b. The difference between the amount assigned to the world total and the sum of the amounts for all the geographical areas is due to data without a geographical assignment and data from international institutions other than European Union.

c. The geographical breakdown of portfolio investment liabilities (payments) is not published due to its little analytical meaning, since it is compiled on the basis of the first non-resident counterpart, which does not necessarily correspond to the final holder of the securities and, in some cases, the geographical breakdown is not available in data sources.

d. SPEs: Special Purpose Entities (EPE in their Spanish initials). SPEs definition can be found in the IMF methodological guideline:

<https://www.imf.org/external/pubs/ft/bop/2020/pdf/20-26.pdf>. In the Spanish case, SPEs essentially correspond to companies whose main purpose is to channel direct investment.

a. The composition of economic areas is detailed in the notes at the end of the chapter.

b. The difference between the amount assigned to the world total and the sum of the amounts for all the geographical areas is due to data without a geographical assignment and data from international institutions other than European Union.

c. SPEs: Special Purpose Entities (EPE in their Spanish initials). SPEs definition can be found in the IMF methodological guideline:

<https://www.imf.org/external/pubs/ft/bop/2020/pdf/20-26.pdf>. In the Spanish case, SPEs essentially correspond to companies whose main purpose is to channel direct investment.

a. The composition of economic areas is detailed in the notes at the end of the chapter.

b. The difference between the amount assigned to the world total and the sum of the amounts for all the geographical areas is due to data without a geographical assignment and data from international institutions other than European Union.

c. SPEs: Special Purpose Entities (EPE in their Spanish initials). SPEs definition can be found in the IMF methodological guideline:

<https://www.imf.org/external/pubs/ft/bop/2020/pdf/20-26.pdf>. In the Spanish case, SPEs essentially correspond to companies whose main purpose is to channel direct investment.

a. Debt securities are divided into short term (under one year) and long term (one year or more).

b. The 'Loans, trade credit and other liabilities' heading basically includes loans, trade credit and advances granted by non-residents, other accounts receivable and payable, insurance, pension schemes and standardised guarantee systems.

c. The sixth edition of the Balance of Payments and International Investment Position Manual establishes that allocations of SDRs entail, in addition to increases in reserve assets an increase in the long-term liabilities of the recipient country.

a. See section 4.2.1 of the Methodological Note for a detailed explanation on the concept of direct investment under the directional principle. To distinguish between the concept of immediate investing economy and ultimate investing economy see the following Statistical Note:

<https://www.bde.es/ft/webbde/SES/Secciones/Publicaciones/PublicacionesSerias/NotasEstadisticas/21/Files/nest15e.pdf>

b. The composition of economic areas is detailed in the notes at the end of the chapter.

c. The difference between the amount assigned to the world total and the sum of the amounts for all the geographical areas is due to data without a geographical assignment and data from international institutions other than European Union.

d. SPEs: Special Purpose Entities (EPE in their Spanish initials). SPEs definition can be found in the IMF methodological guideline:

<https://www.imf.org/external/pubs/ft/bop/2020/pdf/20-26.pdf>. In the Spanish case, SPEs essentially correspond to companies whose main purpose is to channel direct investment.

e. The Development Assistance Committee (DAC) List of ODA Recipients shows all countries and territories eligible to receive official development assistance (ODA). These consist of all low and middle income countries based on gross national income (GNI) per capita as published by the World Bank, with the exception of G8 members, EU members, and countries with a firm date for entry into the EU. The list also includes all of the Least Developed Countries (LDCs) as defined by the United Nations.

a. See section 4.2.1 of the Methodological Note for a detailed explanation on the concept of direct investment under the directional principle. To distinguish between the concept of immediate investing economy and ultimate investing economy see the following Statistical Note:

<https://www.bde.es/ft/webbde/SES/Secciones/Publicaciones/PublicacionesSeriadas/NotasEstadisticas/21/Files/nest15e.pdf>

b. The composition of economic areas is detailed in the notes at the end of the chapter. Amounts corresponding to the total world, Europe, EU-27, Euro area and OECD include Spain data, as it can be the ultimate investing economy if the immediate direct investor belongs to a multinational group whose last parent company is a Spanish resident.

c. The difference between the amount assigned to the world total and the sum of the amounts for all the geographical areas is due to data without a geographical assignment and data from international institutions other than European Union.

d. SPEs: Special Purpose Entities (EPE in their Spanish initials). SPEs definition can be found in the IMF methodological guideline:

<https://www.imf.org/external/pubs/ft/bop/2020/pdf/20-26.pdf>. In the Spanish case, SPEs essentially correspond to companies whose main purpose is to channel direct investment.

e. The Development Assistance Committee (DAC) List of ODA Recipients shows all countries and territories eligible to receive official development assistance (ODA). These consist of all low and middle income countries based on gross national income (GNI) per capita as published by the World Bank, with the exception of G8 members, EU members, and countries with a firm date for entry into the EU. The list also includes all of the Least Developed Countries (LDCs) as defined by the United Nations. <http://www.oecd.org/dac/financing-sustainable-development/development-finance-standards/dac-list.htm>

Definition of the main items

Direct investment includes all financial flows between companies belonging to the same group.

Financial derivatives: any financial instruments enabling specific financial risks to be traded that are linked to another specific financial instrument, indicator, or commodity.

Investment income: return on shares and other equity (dividends, withdrawals from income of quasicorporations, reinvested earnings) and the yield on debt (interest).

Net position vis-à-vis the Eurosystem: Banco de España's net assets and liabilities vis-à-vis the European Central Bank together with the central banks of the other euro area countries.

Other investment: mainly includes loans, deposits, sell/buy back transactions and repurchase agreements, trade credit and other accounts receivable/payable.

Other primary income: taxes on production and imports, and subsidies.

Other financial assets and liabilities: include other equity which does not take the form of securities and is not included in portfolio investment (this is the case of some stakes in international organisations), trade credit and advances, other accounts receivable/payable, insurance, pension schemes, standardised guarantee systems and allocations of special drawing rights.

Other items of the BE: derivatives, portfolio investment and other investment of the Banco de España excluding the net position vis-à-vis the Eurosystem.

Portfolio investment: transactions in marketable securities, other than those included in direct investment or reserve assets.

Primary income; includes labour income, investment income, taxes on production and imports, and subsidies.

Reserves: foreign assets denominated in currencies other than euro and issued by residents outside of EMU which are immediately available to and under the control of the Banco de España for meeting balance-of-payments financing needs.

Secondary income: includes personal transfers, current taxes, social contributions and benefits, transfers relating to insurance transactions, current international cooperation and other miscellaneous current transfers.

(a) Official mortgage market reference rates (Order EHA/2899/2011 and BE Circular 5/2012) are official as of their publication in the Spanish Official State Gazette (BOE from its initials in spanish). Until then, they are treated as provisional data, and as such they are reported in this table for information purposes only.

(b) In order to coincide with the data published in the BOE, the columns of this table that contain series for the new Euribor maturities (one week, one month, three months, six months), included by Order ETD/699/2020, show observations from January 2021. The complete statistical series, with prior data, are available in Table 9.1 of the publication Economic Indicators and in Table 1.15 of the Statistical Bulletin.

(c) This rate matches that compiled and published by the ECB with a lag of one month for the purposes of its use as a mortgage market reference rate. As laid down in Annex 8 of Banco de España Circular 5/2012, this index will not be corrected should the European Central Bank subsequently change the rate published.

(d) This official reference rate is defined as the weighted average by nominal trading volumes of the internal rate of return (IRR) on Government bonds with residual maturity between two and six years, traded in simple spot transactions within the preceding six months. This average is taken from the RODE index 2-6 Y (S) which is calculated by Sociedad de Bolsas, S.A. and published on the "BME Renta Variable" website since May 2021.

(e) To consult other reference rates that are no longer considered official mortgage market reference rates, see publications before January 2021.

(f) This interest rate ceased to be considered an official mortgage market reference rate for mortgage loans arranged as from 1 January 2000.

(g) These reference rates (Order EHA/2899/2011 and BE Circular 5/2012) are disseminated exclusively for information purposes until its publication in the Spanish Official State Gazette.

(h) The rate for February 2013 will be applicable until 23 February, and for the rest of the month the rate for March 2013 will apply, by virtue of the recent amendment to Law 3/04.

(i) This rate, along with that in column 11, is used for calculating the spread to be applied in the event of early loan repayments.

a. Excluded bank overdraft, credit lines and extended credit card debt.

b. Excluded bank overdraft and credit lines.

c. These volumes are detailed in table 19.12 columns from 3 to 17.

d. For this instrument, the CBE 1/2010 considers 'new business' as the outstanding amounts at the end of the month. For this reason in this column the annual amount coincides with last month of the year. Regarding this instrument, while finalities are not available, it is estimated that are consumer fundamentally. In fact, consumer credit up to one year was included until June 2010.

e. These volumes are detailed in table 19.13 columns from 3 to 14.

Note: The terms refer to the initial period of fixation of the rate. For example, a 15-year loan at an annually revisable rate is classified under the term 'Up to one year'.

a. Up to the reference month May 2010, this column includes only current account overdrafts (see the 'Changes' note in the July-August 2010 Statistical Bulletin).

b. For these instruments, the CBE 1/2010 considers 'new business' as the outstanding amounts at the end of the month. For this reason in both columns the annual amount coincides with last month of the year. Regarding extended credit card, while finalities are not available, it is estimated that are consumer fundamentally. In fact, consumer credit up to one year was included until June 2010.

c. Up to the reference month May 2010, this column includes credit granted through credit cards (see the 'Changes' note in the July-August 2010 Statistical Bulletin).

- b. As of 1 July 2005 the currency of Romania is the new Romanian leu (RON). 1 RON equals 10,000 old Romanian lei (ROL).
- c. Due to the interruption of the data published by ECB on the daily exchange rates euro/rouble from the reference date 1 March 2022, the last data published for the monthly exchange rate euro/rouble corresponds to the reference date February 2022. Additional information is available at the site https://www.ecb.europa.eu/stats/policy_and_exchange_rates/euro_reference_exchange_rates/html/index.en.html
- d. As of 1 January 2005 the currency of the Republic of Turkey is the new Turkish lira (TRY). 1 TRY equals 1,000,000 Turkish liras (TRL).

Table 20.3

- a. Daily exchange rates disseminated by the European Central Bank are available on the Internet at http://www.bde.es/webbde/es/estadis/infoest/tc_1_1e.pdf.

Table 20.4

- a. Daily exchange rates disseminated by the European Central Bank are available on the Internet at http://www.bde.es/webbde/es/estadis/infoest/tc_1_1e.pdf.

Table 20.5

- a. From January 1999, equivalence in US dollars is obtained using the euro exchange rates.

Table 20.6

- a. The countries making up EU-27 are as follows: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Poland, Portugal, Romania, Slovakia, Slovenia and Sweden.
The countries making up euro area are as follows: Austria, Belgium, Cyprus, Estonia, Finland, France, Germany, Greece, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Portugal, Slovakia and Slovenia.
- b. Abbreviations: HICP (Harmonised Index of Consumer Prices), PPI (Producer Prices Index), ULCT (Unit Labour Costs Total), ULCM (Unit Labour Costs Manufacturing), EUVI (Export Unit Values Index).
- c. A decline in the index denotes an improvement in the competitiveness of Spanish products.
- d. Indices calculated as geometrical mean of bilateral exchange rates of the countries comprising the counterpart grouping using a double weighting system based on manufacturing and services foreign trade figures.
- e. Indices calculated as geometrical mean of bilateral exchange rates of the countries comprising the counterpart grouping using a double weighting system based on manufacturing foreign trade figures.
- f. Relationship between the Spanish price index and that of the related grouping calculated as the geometrical mean of the price indices of the countries comprising the counterpart grouping, weighted as indicated in the preceding notes d. and e. for each type of index.
- g. Quarterly series. Indices for Spain have been calculated using data for Unit Labour Costs (total and manufacturing) compiled from Quarterly Spanish National Accounts (INE), with series adjusted of seasonal and calendar effects, and employment series defined in terms of number of persons.

Table 20.7

- a. Developed countries: Australia, Austria, Belgium, Canada, Cyprus, Denmark, Finland, France, Germany, Greece, Ireland, Italy, Japan, Latvia, Lithuania, Luxemburg, Malta, Netherlands, New Zealand Norway, Portugal, Slovakia, Slovenia, Estonia, Sweden, Switzerland, United Kingdom and United States. In the case of Export Unit Values Index, United Kingdom is not included in developed countries aggregation since Export Unit Values Index is not available for that country at Eurostat's database.
Industrialised countries: The developed countries members and South Korea, Hong Kong, Singapore, China, India, Indonesia, Malaysia, Philippines, Taiwan and Thailand.
Newly industrialised Asian countries: South Korea, Hong Kong, Singapore, China, India, Indonesia, Malaysia, Philippines, Taiwan and Thailand.
- b. Abbreviations: CPI (Consumer Prices Index), PPI (Producer Prices Index), ULCM (Unit Labour Costs Manufacturing), EUVI (Export Unit Values Index).
- c. A decline in the index denotes an improvement in the competitiveness of Spanish products.

- d. Indices calculated as geometrical mean of bilateral exchange rates of the countries comprising the counterpart grouping using a double weighting system based on manufacturing and services foreign trade figures.
- e. Indices calculated as geometrical mean of bilateral exchange rates of the countries comprising the counterpart grouping using a double weighting system based on manufacturing foreign trade figures
- f. Relationship between the Spanish price index and that of the related grouping calculated as the geometrical mean of the price indices of the countries comprising the counterpart grouping, weighted as indicated in the preceding notes d. and e. for each type of index.
- g. Quarterly series. Indices for Spain have been calculated using data for Unit Labour Costs (total and manufacturing) compiled from Quarterly Spanish National Accounts (INE), with series adjusted of seasonal and calendar effects, and employment series defined in terms of number of persons.

Table 20.8

- a. The group of developed countries is made up of the countries listed in footnote (a) to Table 20.7, including Spain and excluding the country of the currency in question. For the euro, see note (b) to table 1.16.
- b. Indices calculated as geometrical means of bilateral exchange rates in which the weights are based on manufacturing and services trade with trading partners from the counterpart aggregate and capture the effects of third markets. Real effective exchange rates are the outcome of multiplying nominal and price components. A decline in the index denotes an improvement in the competitiveness of Spanish products.

(a) Shares of companies resident in Spain that are included in the IBEX 35 at each point in time.

Chapter 22. Secondary securities markets

A new table (22.32) has been included with details of the holding sectors of IBEX 35® shares, to add to the information in this chapter on the holding sectors of government debt portfolios (Treasury bills (Table 22.3), unstripped bonds and principal strips (Table 22.4) and regional government debt securities (Table 22.31)).

The time series for these new statistics run from December 2019 (although in subsequent updates the series are expected to be extended farther back). As regards the scope and definition of the companies selected, the data relate to the shares of all companies resident in Spain that make up the IBEX 35 at each point in time. The holdings are valued at market price.

As in the case of the statistics on government debt portfolios, the data sources to be used draw on the information on securities portfolios provided by the holders themselves (in the case of much of the financial sector) or by depositories (for the remaining holding agents). This information is currently received in accordance with the rules established in Regulation (EU) No 1011/2012 of the European Central Bank concerning statistics on holdings of securities.

Comentado [JLS1]: Si en el inglés se quiere añadir “domésticos”, sería “Spanish secondary securities markets”, según lo propuesto en el documento anterior

a. To December 2002 this includes: "Wind energy, urban solid waste and other solid fuels". From January 2003: "Wind energy, solar energy, biomass and residues (Renewable energies)". In 2010 Q2 there was a methodological change in the series relating to the production and consumption of "Renewable energies". This involves the inclusion for the first time of consumption for the final use of these energies. The change affects these series from January 2005. The monthly series are only available from April 2008. Accordingly, from January 2005 to March 2008, the monthly data were estimated by applying to the available annual totals the percentage accounted for by each month in the annual total in the series not included in consumption for final use.

Note: For all the monthly data, the annual figures do not always coincide with the annual addition of the monthly figures, in which case the difference is distributed evenly over the year.

General note to the tables: As a result of the change in the population base (2011 Census), all the series in this table have been revised as from 2002. In addition, since 2005Q1 the new obligatory variables referred to in Regulation (EC) 2257/2003 (on the adaptation of the list of labour force survey characteristics) have been included, a centralised procedure for telephone interviews has been set in place and the questionnaire has been modified. Thus, in 2005Q1, there is a break in the series of some variables. For further information, see www.ine.es.

General note to the tables: As a result of the change in the population base (2011 Census), all the series in this table have been revised as from 2002. In addition, since 2005Q1

the new obligatory variables referred to in Regulation (EC) 2257/2003 (on the adaptation of the list of labour force survey characteristics) have been included, a centralised procedure for telephone interviews has been set in place and the questionnaire has been modified. Thus, in 2005Q1, there is a break in the series of some variables. For further information, see www.ine.es.

General note to the tables: As a result of the change in the population base (2011 Census), all the series in this table have been revised as from 2002. In addition, since 2005Q1

the new obligatory variables referred to in Regulation (EC) 2257/2003 (on the adaptation of the list of labour force survey characteristics) have been included, a centralised procedure for telephone interviews has been set in place and the questionnaire has been modified. Thus, in 2005Q1, there is a break in the series of some variables. For further information, see www.ine.es.

General note to the tables: As a result of the change in the population base (2011 Census), all the series in this table have been revised as from 2002. In addition, since 2005Q1 the new obligatory variables referred to in Regulation (EC) 2257/2003 (on the adaptation of the list of labour force survey characteristics) have been included, a centralised procedure for telephone interviews has been set in place and the questionnaire has been modified. Thus, in 2005Q1, there is a break in the series of some variables. For further information, see www.ine.es.

(a) Seasonally adjusted series. In the case of countries, except Switzerland, the series are also adjusted for the calendar effect.

(b) The data for the OECD area is in USD and the data for the EU aggregate is in euros. The data for the euro area countries up to 1998 Q4 have been obtained applying the irrevocable euro conversion rates to the national currency series. As the euro area aggregate for that period has been obtained applying the respective exchange rates in ECU to the national currency series, this aggregate is not equal to the sum of the constituent countries.

(c) From May 2022 OECD data is used.

(a) Seasonally adjusted series. In the case of countries, the series are also adjusted for the calendar effect.

(b) The data for the OECD area is in USD and the data for the EU aggregate is in euros. The data for the euro area countries up to 1998 Q4 have been obtained applying the irrevocable euro conversion rates to the national currency series. As the euro area aggregate for that period has been obtained applying the respective exchange rates in ECU to the national currency series, this aggregate is not equal to the sum of the constituent countries.

(c) From May 2022 OECD data is used.

APPENDIX 1 BANCO DE ESPAÑA. OFFICIAL BALANCE SHEET

SUMMARIZED BALANCE SHEET OF THE BANCO DE ESPAÑA

Banco de España balance sheet published pursuant to the Resolution of 28.3.2000 (BOE 6.4.2000)

According to the accounting regime chosen by the Eurosystem on the issue of euro banknotes, a share of 8% of the total value of the euro banknotes in circulation is allocated to the ECB on a monthly basis. The counterpart of this adjustment is recorded as an Intra-Eurosystem liability related to banknote issue. The remaining 92% of the value of the euro banknotes in circulation are allocated to the NCBs on a monthly basis too, whereby each NCB shows in its balance sheet a share of the euro banknotes issued corresponding to its paid-up share in the ECB's capital. The difference between the value of the euro banknotes allocated to the NCB according to the aforementioned accounting regime, and the value of euro banknotes put into circulation, is also recorded as an Intra-Eurosystem claim/liability related to banknote issue.

APPENDIX 3 METHODOLOGICAL NOTES

NOTES TO THE TABLES OF CHAPTER 10

INSURANCE CORPORATIONS AND PENSION FUNDS

Introduction

According to the provisions of the ESA 95, insurance corporations and pension funds form a sub-sector within the sector financial institutions. The inclusion of these entities within the sector financial institutions is basically due to the fact that their principal activity, the coverage of risks, involves significant intermediation of financial resources from some sectors to others. In recent years, the activity of this sub-sector has been growing significantly. This can be attributed not only to the increase in the desire of the population to cover the different types of risk that these entities offer but also to the growing use of a certain range of products as vehicles for saving.

The following sections of this note describe the various groups of agents that make up this sub-sector (section 2), the sources of information used and availability of the data (section 3); and the specific information contained in the various tables that make up this chapter (section 4).

The agents who make up the sub-sector

This sub-sector comprises four different groups of agents: private insurance corporations, mutualidades de previsión social (non-profit insurance entities), the Consorcio de Compensación de Seguros (insurance compensation consortium) and pension funds, all of which come under the supervision of the Directorate General of Insurance and Pension Funds (DGSFP).

- **Private insurance corporations** include the activity of public limited companies whose capital may be entirely Spanish, entirely foreign or a mixture of the two, private mutual insurance associations, the offices in Spain of foreign insurance corporations and reinsurance corporations resident in Spain (1).
- **Mutualidades de previsión social** are private beneficent entities generally set up by particular groups as a form of corporate support (they provide small benefits in the event of death, birth, etc. and grant small loans). They are independent of the body they originate from (companies, associations, etc.) and their purpose is to supplement social security pensions. Their main resources are the direct contributions of the members or other persons or patron entities. Membership of these entities may be voluntary or compulsory (for persons belonging to certain professional associations, groups or companies). This group includes cajas de pensiones sustitutorias (substitute pension funds), which existed until 1984 in the Spanish insurance system. These funds were created by particular groups in order to act as substitutes for the Social Security System. Additional provision five of the 1984 budget law required the groups covered by these funds (both retired and active employees) to be transferred to the Social Security System, so that the role of these entities then became one of supplementing social security, a status that they still have today.
- **The Consorcio de Compensación de Seguros (CCS)** is a public law entity with its own legal personality. Its object is to cover extraordinary risks to persons and property. It is basically financed by surcharges on the premiums paid by policyholders of all types of insurance, by State grants and loans and by direct premiums. In addition, it acts as the State's agent in dealings with the Spanish export credit company (CESCE), the public-sector private insurance corporation of which manages, on behalf of the State, the cover of political risks and certain commercial risks to Spanish exports. This latter activity of the CCS is not included in the series, since it is attributed directly to the State.
- **Pension funds** are funds created pursuant to Law 8/1987 of 8 June 1987. They are portfolios of assets separate and independent from the entities that promote them, but without separate legal status. They are made up of funds earmarked for the purposes laid down in the corresponding pension scheme. Their management is entrusted to a managing entity and a custodian, under the supervision of a control committee. These funds are usually known as "autonomous" or "external pension funds" in contrast to "non-autonomous" or "internal pension funds", which are those created by certain credit institutions and non-financial corporations by means of transfers of funds to provisions or internal reserves. Internal funds appear on the balance sheet of the sector or sub-sectors that have created them (other financial institutions and non-financial corporations) and represent a liability to the workers (households) with interests in them. Normally, the balance sheet does not show any separate assets to cover the aforementioned pension rights.

Sources and availability of information

- **Private insurance corporations** The main source of data is the annual balance sheets and other supplementary information that insurance corporations send to the DGSFP, which is published annually in its reports. Annual aggregate data for this group are available from 1962, and relate to three different accounting plans (1962-1982, 1983-

1997 and 1998 onwards). As a result, the compilation of time series has required the Banco de España to chain the different series. This has been done by adapting the information of the two plans prior to 1998, without any breaks arising that are worthy of mention. First, the differences attributable to the different coverage in different years, indicated in footnote 1, were small at the time the chaining was carried out and, second, the other differences due to the change in the accounting plan were, likewise, minor. Also, for a sample of entities whose insurance technical provisions account for approximately 98% of the total, quarterly information is available from 1986, although with certain limitations. Specifically, this quarterly information does not include data on reinsurance entities and data are not available for the quarters of 1990 and for the first three quarters of 1998, so that in the time series these quarters are shown as unavailable.

- **Mutualidades de previsión social** Information is available from 1970, with differing content, and is obtained from the following sources:

For the period 1970-1984 the data come from the individual balance sheets of the entities themselves and from the incomplete and heterogeneous information of the Labour and Social Security Ministry (to which they reported until 1984) and the Economy Ministry. The Banco de España has estimated the series on the basis of these data.

For the period 1985-1997, inclusive, data are available from the annual statistical reports of the DGSFP, which include information relating to the mutualidades with a national scope, which are supervised by this Directorate General, and the information on entities under the supervision of the regional governments, following the transfer of responsibilities in this area.

For 1998 the series only include the data of the mutualidades de previsión social with a national scope, obtained from the quarterly reports of the DGSFP, and of the Catalan and Basque regions' mutualidades for which information is supplied directly by these two regional governments.

Since 1999 the series are Banco de España estimates based on the reports of the Spanish Confederation of Mutualidades. These estimates will be replaced by official data as and when they become available.

- **Consorcio de Compensación de Seguros** The data available for the period 1970-1982 are incomplete and from various sources, primarily the three bodies which in 1982 were merged to form the current CCS: the CCS itself, the Fondo Nacional de Garantía (National Guarantee Fund) and compulsory travel insurance. The Banco de España has estimated the relevant time series using this information. From 1983 the data are from the annual reports of the CCS itself.
- **External pension funds** Data are available from when these funds began to be created in 1988. The source is the annual statistical reports published by the DGSFP.

The information contained in the tables of the chapter

The tables include, in the form of time series, the accounting/administrative information obtained from the DGSFP, the regional governments that supply data and the CCS. The purpose of Table 10.1 is to give an overall view of the relative importance of each of the four groups of entities that make up the sub-sector based on the aggregate balance sheet and the most important item therein: the technical provisions and own funds, in the case of pension funds. Thereafter, Tables 10.2 to 10.6 provide certain details of the assets and liabilities of the aggregated balance sheet of the sub-sector (Table 10.2) and of each of the groups of agents of which it is composed (Tables 10.3 to 10.6). The structure of all these tables is identical so that some minor adaptations have had to be made to the format of the balance sheet which each group of agents sends to the DGSFP.

Footnotes

- Until 1997 (inclusive), the annual series presented include the activity in Spain of corporations resident in Spain (i.e., both those of Spanish nationality and the branches of foreign entities). Since then, information on the insurance business in Spain of branches that have their head office in other EU countries is not included, since the current legal framework makes no provision for these branches to submit information. As for the quarterly series, from 1996 Q1 these include the activity both in Spain and abroad of entities of Spanish nationality. In addition, from 1998, as in the case of the annual series and for the same reason, these series do not include the activity in Spain of the branches of entities that have their head office in other EU countries.

METHODOLOGICAL NOTE

GENERAL GOVERNMENT DEBT COMPILED ACCORDING TO THE METHODOLOGY OF THE EXCESSIVE DEFICIT PROCEDURE (EDP)

Introduction

The functions attributed to the Banco de España by Spanish legislation and, specifically, by the Law of Autonomy of the Banco de España and successive National Statistics Plans include notably, the compilation of a set of statistics, including government debt according to the EDP. Thus, the Banco de España regularly publishes information about government debt on the Internet, in its *Statistical Bulletin*, on a quarterly basis, and in the Economic Indicators, on a monthly basis.

This note describes the methodology used to compile EDP debt. The next section presents the various concepts of debt and indebtedness habitually used, depending on the context to which they refer. The second section then provides a description of the methodology applied. Lastly, the third section details the information published by the Banco de España.

Different concepts of indebtedness

In the framework of any agent's economic activity, expenses (including the net acquisition of financial assets) not financed with current revenue and capital, must be financed through the net contraction of liabilities. This generation of liabilities is usually called debt or indebtedness; however, it is necessary to differentiate between the contraction of liabilities over a period of time (flows) and the outstanding amount of these liabilities at a specific time (stocks). Consequently, flows (operations in the period) are formally called a net change in liabilities, while the stocks are formally called debt, indebtedness or outstanding liabilities. Several concepts are encompassed within this general definition of indebtedness, which are delimited by the instruments included and the methods used for their valuation, and which, consequently, must be considered together with the general definition itself. This section describes the varying coverage of the main concepts of indebtedness that are frequently used and Scheme 1 provides a comparison of them.

1. Total liabilities

This is the broadest possible concept of indebtedness and is reflected in the Financial Accounts of the Spanish Economy (FASE), a quarterly publication of the Banco de España with a high degree of detail (<http://www.bde.es/webbde/en/estadis/ccff/ccff.html>). Chapter 2 of this publication presents the financial transactions (flows) and financial assets and liabilities (stocks) for all the sectors and sub-sectors into which the economy is classified, including general government. Thus, in this specific case, the FASE provide information about the financial activity of government in a full and consistent fashion which is integrated with the other sectors and sub-sectors of the economy and with general government non-financial operations; therefore, they serve as a global framework of reference for analysing general government financial activity as a whole. This publication takes the broadest possible concept of indebtedness because it includes all the liabilities incurred by general government, irrespective of type (issuance of currency, debt securities, equity and investment fund shares or units, short and long-term loans in euro or in other currencies, trade credits and other outstanding payables). The liabilities included in this concept are valued using the methodology established by the 2010 European System of Integrated Economic Accounts (ESA 2010) described in the methodological note of the FASE disseminated on the Banco de España's webpage (<http://www.bde.es/webbde/SES/Secciones/Publicaciones/PublicacionesSeriadas/NotasEstadisticas/07/next05e.pdf>) and which uses market values in the valuation of stocks and flows of liabilities held in the form of debt securities.

The change in this indebtedness is explained by: a) net borrowing i.e. non-financial expenses less non-financial resources, according to the National Accounts criterion which, in turn, must follow the ESA 2010 rules; b) the net acquisitions in financial assets; and, c) adjustments for valuation (which arise, for example, in the case of debt securities and liabilities in currencies other than the euro).

2. Debt compiled according to the EDP

This concept of indebtedness is not as broad as the previous one. The Banco de España publishes a detailed breakdown of this debt concept for each of the sub-sectors comprising general government and it is disseminated with a shorter time lag than the FASE. Likewise, it provides a very complete breakdown by instrument since it distinguishes:

- Currency and deposits (coin issuance)
- Debt securities, in euro and currencies other than the euro, by original maturity.
 - short-term
 - medium and long-term
- Loans
 - a) Lending by resident credit institutions, in euro and currencies other than the euro, by original maturity.
 - short-term (12 months or less)
 - medium and long-term (more than 12 months)
 - b) Lending by non-residents, in euro and currencies other than the euro (rest of the world)
 - c) Imputed loans by public-private partnerships and other infrastructure financing methods.¹

¹ According to the decision of Eurostat of February 2004 on the treatment of public-private partnership contracts for the construction of infrastructure, depending on the characteristics of these contracts, some non-financial assets constructed by private contractors are reallocated to the balance sheet of general government, with consequences for the deficit and debt of this sector (<http://ec.europa.eu/eurostat/documents/1015035/2041337/Treatment+of+PPPs.pdf/af9e90e2-bf50-4c77-a1a0-e042a617c04e>).

d) Non-recourse factoring operations.²

The concept of “Debt compiled according to the EDP” principally differs from the concept of “Total liabilities” in that it does not include general government liabilities held by other general government units, trade credit and other accounts payable. Furthermore, as regards the valuation methods, debt securities are included at their nominal value in debt compiled according to the EDP (see sub-section 3 of the following section).

Scheme 1
General government: different concepts of indebtedness
Percentage structure at 31.12.2014

Instrument		Total liabilities	Debt compiled according to the EDP
Currency and deposits		0.3%	0.3 %
Debt securities	Securities held by general government units	3.2%	
	Other securities (short, medium and long-term)	63.0%	63.0%
Long-term loans held by general government units		14.2%	
Other long-term loans		12.6%	12.5%
Short-term loans held by general government units		0.7%	0.7%
Trade credits and other liabilities		2.4%	
Trade credits and other liabilities held by general government units		3.6%	
Total		100%	76.5%

These two concepts of indebtedness are not the only ones possible. Other definitions also exist in order to value this aspect of public finances such as, for example, net government debt, which would be obtained by deducting from gross debt, as envisaged in the two concepts included in this section, the stock of financial assets (with the idea that a distinction must be made between when an economic agent increases its indebtedness in order to finance a deficit and when it does so to acquire financial assets). Any concept of indebtedness has its own meaning and is valid for economic analysis provided that the area to which it refers is specified in detail. Nevertheless, it is considered worth underlining that the concept of debt compiled according to the EDP has the virtue of being defined according to uniform binding rules for all EU countries and of being scrutinised in depth by the European Commission (Eurostat), so that it is comparable across the various EU Member States. This is not the case for any definition based on the criteria of a single country. Additionally, the concept of debt compiled according to the EDP is useful at a practical level since, on one hand, it is that for which data are published with the shortest time lag and, on the other, changes in it are a good approximation of total liabilities. Total liabilities is the concept of debt used in the financial accounts compiled by all EU Member States.

Methodology. Debt according to the EDP

The definition of this indebtedness is regulated by Council Regulation (EC) No 479/2009 of 25 May 2009 on the application of the Protocol on the excessive deficit procedure annexed to the Treaty establishing the European Community, and by Commission Regulation (EU) No 220/2014 of 7 March 2014 amending Council Regulation (EC) No 479/2009 as regards references to the European system of national and regional accounts in the European Union. These regulations, which have in turn amended Council Regulation (EC) No 3605/93 of 22 November 1993, refer to the ESA to delimit the main terms used.

² According to the Eurostat decision of July 2012, trade credits payable by government units that are discounted by financial institutions through non-recourse factoring operations must be included in EDP debt (<http://ec.europa.eu/eurostat/documents/1015035/2041337/Statist-record-of-some-operations-rel-to-trade-credits-i.pdf/f2238d11-9257-4a0e-bd9a-39dcf1fb2cfd>).

Among other things, this legislation requires EU Member States to report to the European Commission and, specifically, to Eurostat, twice per year (at the end of March and at the end of September) the data corresponding to this definition of debt by sub-sector and with a detailed breakdown of certain items and transactions. The reporting of these data is called an EDP notification.³

For the purposes of this Note, Regulation No 479/2009, amended by Regulation No 220/2014, like its predecessor, Regulation No 3605/93, defines the concepts of general government and government debt as follows:

1. Institutional scope of general government

Regulation No 479/2009 specifies that the general government sector includes the sub-sectors central government, state government [regional (autonomous) government], local government and social security funds, to the exclusion of commercial operations, as defined in ESA 2010. The exclusion of commercial operations means that the general government sector comprises only institutional units producing non-market services as their main activity.

In the case of Spain, the general government sector comprises the following four sub-sectors:

- **Central government** comprises institutional units which have general powers throughout the country and which, in Spain, include the State, the central government agencies and enterprises classified as central government.
- **Regional (autonomous) government** which includes the governing bodies of the regional (autonomous) government and the regional administrative and similar agencies. The latter group includes the universities in each region and, also, the enterprises classified as regional (autonomous) government.
- **Local government** comprises local (municipal, provincial and island) authorities, associations and groupings of municipalities, autonomous cities (Ceuta and Melilla) and the independent administrative and similar bodies reporting to them.
- **Social security funds** which include the institutional units of a legal nature and with diverse territorial scope that undertake functions relating to the provision of social benefits. Since 2000 Q1, in accordance with the sectorisation of base year 2000 and base year 2008 of the Spanish National Accounts compiled by the INE, the units performing social security functions financed through general taxation (essentially healthcare services) are classified together with the units to which they report in the central government, regional (autonomous) government and local government sub-sectors, whereas the units performing social security functions financed through social security contributions are classified in the social security fund sub-sector.

All these sub-sectors have two basic characteristics: a) they comprise institutional units whose main function is to produce non-market goods and services and/or to undertake operations to redistribute national income and wealth and, b) their principal funds come from compulsory payments made by other institutional units and not from the sale of their output.

In other words, in order to decide whether or not an institutional unit should be included in the general government sector the economic criteria established in ESA 2010 must be taken into account. These criteria determine, first, whether a unit is taken into account: the institutional legal criterion (determining whether a unit is a public or private producer and, second, whether a unit is a market or non-market producer, according to the nature of its output. On the basis of the ESA 2010 the sector general government includes those institutional units controlled by general government that are non-market producers. Non-market producers are considered to be, principally, those institutional units that do not cover more than 50% of their production costs with revenue from the sale of their products. This methodology involves, in fact, subordinating the legal criterion to the economic one when including institutional units in, or excluding them from, the general government sector and its sub-sectors, since a unit may be of a commercial nature from a legal viewpoint but fail to comply with the 50% rule, in which case it will be sectorised under general government.

2 Concept of government debt

Under Regulation 479/2009 and Regulation 220/2014 government debt means the total gross debt at nominal value of the sector of "general government", with the exception of those liabilities the corresponding financial assets of which are held by the sector of "general government". Nominal value corresponds to face value. In the case of index-linked liabilities, the regulation specifies that their nominal value shall correspond to their face value adjusted by the index-related change in the value of the principal accrued to the end of the year.

As for the financial instruments which must be included, government debt shall be constituted by the liabilities of general government in the following categories according to the definitions of ESA 2010: currency and deposits, debt securities and loans.

³ It should be clarified that the version of the ESA in force up to and including the September 1999 EDP notification was the second edition, published in 1979 (ESA 79). As of the March 2000 EDP notification, the version of the ESA in force was the one corresponding to 1995 (ESA 95). Interestingly, this version of the ESA was the first system of national accounts introduced by means of legislation, namely Council Regulation (EC) No 2223/96 of 25 June 1996 (called the ESA 95 Regulation), and EU countries are therefore required to use it by law. The 1979 edition of the ESA was only a "recommendation" to countries for compiling national accounts which were as uniform as possible. The September 2014 EDP notification was the first to be made in accordance with the ESA 2010, established by Regulation (EU) No 549/2013 of the European Parliament and of the Council of 21 May 2013 on the European system of national and regional accounts in the European Union.

Under the regulation, liabilities denominated in foreign currencies shall be converted into the national currency on the basis of the representative market exchange rate prevailing on the last working day of each year.

In the case of Spain, the instruments and statistical sources used to calculate government debt are included in Scheme 2 below:

Instruments and sources

Instruments (liabilities)		Statistical source
Currency and deposits: coin issuance		Banco de España.
Debt securities	Short-term securities issued in euro	<p>Banco de España.</p> <p>Information compiled by the Banco de España through:</p> <ul style="list-style-type: none"> -General Secretariat of the Treasury and Financial Policy -Official gazettes of the State and of the regional (autonomous) governments -National Securities Market Commission. -IBERCLEAR and stock exchanges <p>For issues in currencies other than the euro information from the balance of payments and data from specialist agencies, such as Reuters, are used</p>
	Long-term securities issued in euro	
Loans granted by resident financial institutions		Information compiled through the Banco de España's Central Credit Register, obtained from the data reported by lending credit institutions. For the State the source is the General Secretariat of the Treasury and Financial Policy. The information on imputed loans by public-private partnerships and other infrastructure financing methods comes from the Spanish National Audit Office (IGAE). Since December 2012, non-recourse factoring is included, the source for which is the Central Credit Register.
Loans granted by non-residents		Statistics on credits and loans granted by non-residents based on the data, which for statistical purposes, must be sent by general government units to the Banco de España's Statistics Department on economic transactions and external financial assets and liabilities (Circular 4/2012 of 25 April 2012). For the State, the source is the General Secretariat of the Treasury and Financial Policy.

3. Valuation Rules

The valuation rules used are as follows: the short, medium and long-term debt securities are recorded at their nominal value, according to Regulation 479/2009, taking into account that the nominal value is equal to the face value; at the same time, credits only include the part drawn down. In both cases, where the currency in which the debt securities are issued or in which the credit is arranged is not the euro, they are converted into euro applying to the currency in which the debt securities were originally issued or in which the credit was arranged, the exchange rate of that currency at the end of the period to which the outstanding balance relates.

From the foregoing it can be deduced that the Banco de España's statistics show an estimate of the indebtedness represented by debt securities and loans based on sources which are mostly external to the governments and bodies whose debt is being calculated. This reason explains why the amounts obtained from each of these governments may not coincide exactly with the amounts in the latter's internal records, which obviously are the best source of information on the indebtedness of any government. For this reason, monthly tests are performed in the case of the State and quarterly tests are undertaken in the case of the regional (autonomous) governments and main local governments (local authorities with more than 500,000 inhabitants) with information from their own internal records.

Dissemination of information on government debt.

The Banco de España, in Chapters 11 to 14 of the *Statistical Bulletin* and in Chapters 6 and 8 of the Economic Indicators, disseminates information on its website about the debt of general government, i.e. of the institutional units classified in the general government sector and, separately, information on the debt of public enterprises, i.e. of the units reporting to general government (public producers) which are not classified as general government, whose debt is not included in the scope of the EDP and, consequently, not included in the EDP notifications to the European Commission.

The Banco de España statistics provide general government indebtedness both in absolute figures and in relative terms with respect to GDP. National GDP is used in respect of the total debt of the sector and its sub-sectors, and regional GDP is used to obtain the ratio corresponding to each regional (autonomous) government. In both cases the source of GDP is the INE's publications of Spanish National Accounts and Spanish Regional Accounts. However, since the regional GDP data are updated with a lag in respect of the national GDP data, for the years in which data on regional GDP were not available, the procedure used to calculate each regional (autonomous) government's debt/GDP ratio comprises distributing national GDP according to Spanish National Accounts according to the structure of regional GDP for the last available year.
