1) Annual growth rates are calculated on the basis of transactions, i.e. from an index of notional stocks which is obtained (starting from a base period) by dividing transactions by the outstanding amounts at the beginning of the period to which they refer. For further details see the technical notes to sections 2.1 to 2.6 of the Statistics Bulletin (available from the ECB's Statistical Data Warehouse).

2) Refers to loans reported by euro area MFIs as securitised through euro area FVCs but which are still on their balance sheets, i.e. the loans have not been derecognised.
