Euro area quarterly balance of payments and international investment position: third quarter of 2024

- [Current account](#) surplus at €403 billion (2.7% of euro area GDP) in four quarters to third quarter of 2024, after a €191 billion surplus (1.3% of GDP) a year earlier.
- [Geographical counterparts](#): largest bilateral current account surpluses vis-à-vis United Kingdom (€210 billion) and Switzerland (€79 billion) and largest deficit vis-à-vis China (€90 billion).
- [International investment position](#) showed net assets of €1.1 trillion (7.4% of euro area GDP) at end of third quarter of 2024.

Current account

The *current account* of the euro area recorded a surplus of €403 billion (2.7% of euro area GDP) in the four quarters to the third quarter of 2024, following a €191 billion surplus (1.3% of GDP) a year earlier (Table 1). This development was mainly driven by a larger surplus for *goods* (from €186 billion to €365 billion) and, to a lesser extent, by widening surpluses for *services* (from €138 billion to €153 billion) and for *primary income* (from €31 billion to €44 billion). Moreover, the deficit for *secondary income* decreased moderately from €163 billion to €159 billion.

The estimates on goods trade broken down by product group show that, in the four quarters to the third quarter of 2024, the increase in the goods surplus was mainly due to a smaller deficit in *energy* products (from €366 billion to €267 billion). In addition, the surplus for *machinery and manufactured* products increased from €259 billion to €306 billion, while the balance for *other* products switched from a €18 billion deficit to a €2 billion surplus.

The higher surplus for *services* in the four quarters to the third quarter of 2024 was mainly due to larger surpluses for *telecommunication, computer and information* (from €162 billion to €192 billion)

Euro area quarterly balance of payments and international investment position: third quarter of 2024

and for *travel* (from €51 billion to €59 billion), and a lower deficit for *other business services* (from €48 billion to €41 billion). This was partly offset by a widening deficit for *other services* (from €59 billion to €82 billion) and a smaller surplus for *transport* (from €8 billion to €1 billion).

The increase in the *primary income* surplus in the four quarters to the third quarter of 2024 was mainly due to larger surpluses in *direct investment* (from €77 billion to €109 billion) and *other primary income* (from €5 billion to €15 billion), partly offset by a larger deficit in *portfolio equity* (from €152 billion to €186 billion).

[Data for the current account of the euro area](#)

Data on the geographical counterparts of the euro area current account (Chart 1) show that in the four quarters to the third quarter of 2024, the euro area recorded its largest bilateral surpluses vis-à-vis the *United Kingdom* (€210 billion, up from €200 billion a year earlier) and *Switzerland* (€79 billion, down from €82 billion). The euro area also recorded a surplus vis-à-vis the residual group of *other countries* of €104 billion, up from €32 billion a year earlier, while the balance vis-à-vis the United States shifted from a deficit (€31 billion) to a surplus (€7 billion). The largest bilateral deficit was recorded vis-à-vis *China* (€90 billion, down from €115 billion a year earlier).

The most significant changes in the geographical components of the current account relative to the previous year were as follows: the *goods* surplus increased vis-à-vis the *United Kingdom* (from €125 billion to €147 billion) and vis-à-vis the *United States* (from €180 billion to €203 billion). The *goods* deficit vis-à-vis *China* declined from €144 billion to €121 billion, while the balance vis-à-vis *Russia* shifted from a deficit (€18 billion) to a surplus (€4 billion). Moreover, the balance vis-à-vis the residual group of *Other countries* shifted from a deficit (€52 billion) to a surplus (€46 billion), which was partly explained by a smaller deficit vis-à-vis Norway (from €30 billion to €20 billion) and a shift from a deficit (€3 billion) to a surplus (€7 billion) vis-à-vis Saudi Arabia. In *services*, the deficit vis-à-vis the *United States* increased (from €117 billion to €146 billion), which was more than offset by a shift from a deficit (€13 billion) to a surplus (€17 billion) vis-à-vis *Offshore centres*. In *primary income*, a smaller deficit was recorded vis-à-vis the *United States* (from €93 billion to €49 billion), partly offset by a smaller surplus vis-à-vis the *United Kingdom* (from €22 billion to €10 billion). The deficit in *secondary income* vis-à-vis the *EU Member States and EU institutions outside the euro area* decreased (from €75 billion to €66 billion).

[Data for the international investment position of the euro area](#)

The developments in the euro area's net international investment position in the third quarter of 2024 were driven mainly by positive transactions, other volume changes and price changes which were partially offset by negative exchange rate changes (Table 2 and Chart 3).

Data revisions

This statistical release incorporates revisions to the data for the reference periods between the first quarter of 2021 and the second quarter of 2024. The revisions reflect revised national contributions to the euro area aggregates because of the incorporation of newly available information.

Next releases

- Monthly balance of payments: 17 January 2025 (reference data up to November 2024)
- Quarterly balance of payments and international investment position: 4 April 2025 (reference data up to the fourth quarter of 2024)

For queries, please use the [Statistical information request](#) form.

Notes

- Data are neither seasonally nor working day-adjusted. Ratios to GDP (including in the charts) refer to four-quarter sums of non-seasonally and non-working day-adjusted GDP figures.
- Hyperlinks in this press release lead to data that may change with subsequent releases as a result of revisions.
