Financial Stability Review – May 2023

On 24 May 2023 the Governing Council held an exchange of views on euro area financial stability issues on the basis of the May 2023 edition of the Financial Stability Review and authorised its publication on the ECB's website. In addition to providing an overview of key financial stability vulnerabilities in the euro area, this edition includes three special features. The first examines how the interaction between market liquidity and funding liquidity can amplify stress in the financial system. The second investigates the channels through which stress in non-bank financial institutions could affect euro area banks. The third expands on work to identify potential threats from climate change, complete with a primer on associated risks for sovereigns. The Review is scheduled to be published on the ECB's website on 31 May 2023.
