## PRESS RELEASE

Madrid, 25 March 2024

### The Central Bank of Ireland is now live on MAPS

Since 12 February 2024, the Central Bank of Ireland (CBI) has been using **MAPS** - Market Activities Processing System - to support its treasury and financial market operations, including related risk management tasks and accounting treatment.

MAPS is the Treasury Management System for Central Banks provided by Banque de France (BdF) and Banco de España (BdE) since November 2016. It offers a solution based on the Adenza (formerly Calypso) software, spanning front office, back office, risk management, accounting and financial reporting functions. MAPS Global offer also includes a comprehensive set of hosting and running services.

With CBI joining BdF, BdE, the Central Bank of Cyprus, De Nederlandsche Bank and the Central Bank of Malta on the common shared platform, the MAPS user community keeps on expanding.

MAPS is open to all members of the European System of Central Banks (ESCB) and other central banks are looking at MAPS for joining in the next coming years.
