

RELEVANT ANALYSIS IN A CHANGING ENVIRONMENT THROUGH THE USE OF MACROECONOMIC MODELS

18-19 June

Aim and content

This course overviews different macroeconomic tools addressing the impact on the forecast of Banco de España from specific events such as the War in Ukraine or bottlenecks, and structural aspects like climate change and policies affecting long-term growth. The course will focus on events related to recent high inflation and the impact of fiscal measures on economic growth. Additionally, there will be an exchange of macroeconomic practices through presentations on the use of quantitative tools by the central banks of Mexico, Chile, and the SECMCA

Professional profile of attendees

The event is targeted at senior central bank professionals involved in macroeconomic modelling and forecasting areas or having knowledge of and/or prior experience in this field, enabling them to actively engage in discussions aimed at sharing insights and experiences.

Organisation and format

The seminar is organised by the Banco de España, combining presentations from other institutions. The seminar will be held in Spanish.
