

February 24-26th 2025

Description

The course presents the key aspects to be considered when planning and conducting IT Risk inspections.

Aim and content

It aims to introduce the basic concepts of IT Risk management processes to professionals unfamiliar with them and to identify the main IT risks that financial institutions face.

The course will introduce the key aspects of IT Risk inspections by way of practical examples and common experience-based findings.

Professional profile of attendees

Banking supervision inspectors and junior analysts who wish to acquire knowledge, or extend their existing knowledge, of IT Risk and how it is supervised at banks.

Organisation, duration and format

The course is organised jointly by the Banco de España and ASBA. It will be held in Spanish and will be run by Banco de España expert trainers.

It will be held online, over three days, in 3-hour morning sessions, Mexican time.

Morning sessions, Mexican time.

Participation is by invitation only from ASBA.
