

MEETING OF EXPERTS IN DOCUMENT AND ARCHIVES MANAGEMENT AT CENTRAL BANKS

16-18 October

Aim and content

The event is designed as a forum for the exchange of best practices, knowledge and expertise on this field and share all projects and key initiatives contributing to the modernization and transformations of central banks.

In this context, the expositions and discussions will focus on safe and efficient information management, archives processes and services, digital transformation challenges, developments in robotization and automatization of processes, among others.

In addition, emphasis will be placed on the importance of historical archives insofar as they are the living memory of institutions, and on the need to endow them with the means, procedures and resources required for research work. The meeting will also analyse the importance of the corpus of documents as a whole and of those considered to have historic or artistic value and its preservation.

Professional profile of attendees

The meeting is targeted at professionals from CEMLA member Latin American central banks who have knowledge of any of the following: documentation or information management; general archives or records; document digitalisation; electronic administration; processes relating to public information transparency, personal data protection or third party access to information; historical archives or any other topic relating to documentary heritage collections.

Organisation and format

The meeting will be organised by the Banco de España in collaboration with CEMLA. It will be held in Spanish, with simultaneous interpretation into English.

There will be expert speakers from the Banco de España's Associate Directorate General Deputy General Secretariat, others central banks and the experts in attendance, who will provide an overview of the evolution and modernisation of our institutions.

The meeting will be celebrated in the Banco de España central offices located in Madrid.

Participation is by invitation only.
