1 Introduction

The Banco de España's BELab data laboratory offers economic and financial granular information on non-financial corporations from the Central Balance Sheet Data Office (CBI). The key characteristics are:

- a) More than 20 attributes and 115 numeric variables per company and year.
- b) Historical series since 1995 with a consistent formulation.
- c) Around 900,000 firms a year (for the latest years of the series), of which around 600,000 firms per year have passed CBSO quality standards.
- d) Exit data in .csv format.

2 Description of the dataset

Time series	From 1995 onwards
Frequency	Yearly
Frequency of data submission to BELab	Twice a year (June and December)
Updating schedule	<ul style="list-style-type: none">- In December of year N the year N-1 is uploaded for the first time and year N-2 is updated for the last time;- in June N+1, the year N-1 is updated.
Geographic coverage	CBSO Spanish non-financial corporations
Source of the data	<ul style="list-style-type: none">- The data come from the mandatory deposits of annual accounts in the Mercantile Registries, on the basis of the Agreement signed between the Banco de España and CORPME. Analytical variables are offered, constructed by the Central Balance Sheet Data Office on the basis of the basic information in the annual accounts.- Data are provided whether they meet or not with the CBSO quality standards and indicators are provided to enable them to be realised if necessary.
Information exit formats	<ul style="list-style-type: none">- Exit data in .csv format.- The data distinguish between when the variable takes the value zero from when that variable is missing (blank).- By default, all available variables are provided and it is up to the researcher to use them or not in their project.
Universe	Sample of non-financial companies resident in Spain with coverage exceeding 50% of GVA (Gross Value Added) and employment
