

19 November 2025

### **ECMS R2025.NOV release deployment schedule**

The ECMS R2025.NOV release is scheduled for deployment during the weekend of 22-23 November 2025. In accordance with the general approach, the deployment activities will start on Friday, 21 November 2025, after the completion of the ECMS business day of Friday 21 November 2025.

**The start of the new ECMS business day of Monday 24 November 2025 as well as Night-Time Process (NTP) is shifted from Friday, 21 November 2025 evening to Saturday, 22 November 2025 after the release is successfully deployed.**

The deployment is foreseen to be completed on Saturday, 22 November 2025 midday, allowing the **change of the business day for ECMS, followed by the start of the NTP during the ECMS business day of 24 November 2025**. Following the completion of the deployment activities, the U2A channels will be opened, and ECMS will remain available in U2A mode only until Sunday, 22 November 2025, at 11:00 CET, when ECMS will enter the maintenance window.

This deployment approach allows a full synchronisation with the T2 and T2S deployment schedule where the respective releases are also deployed before the T2 and T2S business day of Monday 24 November 2025 starts.

As per the usual schedule, the ECMS maintenance window will close on Monday, 24 November 2025, morning at 02:30 CET when ECMS will resume the NTP period. **The start of the ECMS maintenance window is also aligned with the start of the T2 and T2S maintenance windows.**
