

Javier J. Pérez

Curriculum Vitae

I am currently Director of the International Economics and Euro Area Department, within the Directorate General Economics and Statistics of the Bank of Spain, and member of the International Relations Committee of the Eurosystem. Before, I held other positions at the Bank of Spain: Director of the Economic Developments Department, Head of the Conjunctural Analysis Division, and Manager of the Public Sector and Fiscal Policy Unit. Before joining the Bank of Spain, I was Principal Economist at the DG Economics of the European Central Bank, Associate Professor at University Pablo de Olavide of Seville (Spain), Senior Research Officer at the research foundation centrA (regional government of Andalusia, Spain), and Assistant Professor at University Complutense of Madrid. I have a Ph.D. in Economics (with distinction) from this latter University. I have been also a member of the Monetary Policy Committee of the Eurosystem, and of its substructure dealing with public finances, the Working Group on Public Finance. I contribute regularly to policy and academic conferences and seminars, and to international and national publications, in my fields of interest, mainly on macroeconomics (with a focus on fiscal policies, and European integration and institutions), and data analytics (forecasting; textual analysis; economic-social tensions; computational economics).
