(a) Official mortgage market reference rates (Order EHA/2899/2011 and BE Circular 5/2012) are official as of their publication in the Spanish Official State Gazette (BOE from its initials in spanish). Until then, they are treated as provisional data, and as such they are reported in this table for information purposes only.

(b) In order to coincide with the data published in the BOE, the columns of this table that contain series for the new Euribor maturities (one week, one month, three months, six months), included by Order ETD/699/2020, show observations from January 2021. The complete statistical series, with prior data, are available in Table 9.1 of the publication Economic Indicators and in Table 1.15 of the Statistical Bulletin.

(c) This rate matches that compiled and published by the ECB with a lag of one month for the purposes of its use as a mortgage market reference rate. As laid down in Annex 8 of Banco de España Circular 5/2012, this index will not be corrected should the European Central Bank subsequently change the rate published.

(d) This official reference rate is defined as the weighted average by nominal trading volumes of the internal rate of return (IRR) on Government bonds with residual maturity between two and six years, traded in simple spot transactions within the preceding six months. This average is taken from the RODE index 2-6 Y (S) which is calculated by Sociedad de Bolsas, S.A. and published on the "BME Renta Variable" website since May 2021.

(e) To consult other reference rates that are no longer considered official mortgage market reference rates, see publications before January 2021.

(f) This interest rate ceased to be considered an official mortgage market reference rate for mortgage loans arranged as from 1 January 2000.
